1.4 Rules and limits the system enforces

1.5 A typical day

PART 2 · STEP-BY-STEP WORKFLOWS

2.1 Start your day: notifications and My work

2.2 Verify a UPI or bank-transfer claim

2.3 Verify a cash claim

2.4 Mark a claim as failed

2.5 Request a correction on a verified payment

2.6 Open an invoice and change an instalment due date

2.7 Chase dues in Collections and record a promise to pay

2.8 Pay out and reconcile an approved refund

2.9 Reports with filters and CSV export

How to read the screenshots. Red boxes with numbers 1 2 point at the buttons and fields the steps talk about. Names, phone numbers and amounts are sample data.

PART 1

Your role at a glance

What you can see, what you are responsible for, and the rules the system enforces for you.

1.1 What Accounts is responsible for

Accounts is the gatekeeper for money. Counsellors and the front office record **payment claims**; nothing counts as collected, no receipt number exists and no course is admitted until **you** verify the claim. You also keep invoices and instalment dates right, chase dues, request corrections when a verified payment was wrong, and pay out refunds that an admin has approved.

- **Verify or fail every payment claim**, with a 30-minute target from the moment it is recorded.
- **Request corrections** on verified payments; a different person approves them.
- **Invoices**: open, print, and change an instalment due date; cancel an unpaid invoice.
- **Collections**: dues today, overdue and upcoming, with ageing bands and promises to pay.
- **Refunds**: pay out and reconcile cases an admin has approved. You never decide a refund.
- **Reports** and the Target Master are available to you to read.

> **RULE** You work for one branch. A Guntur Accounts user sees Guntur invoices, payments and collections only.

1.2 Signing in and the home screen

Sign in with your work email and password. You land on the **Overview** dashboard for your branch: verified collections this month, the outstanding balance with the number of payments awaiting verification, a seven-day collections chart and the items that need attention.

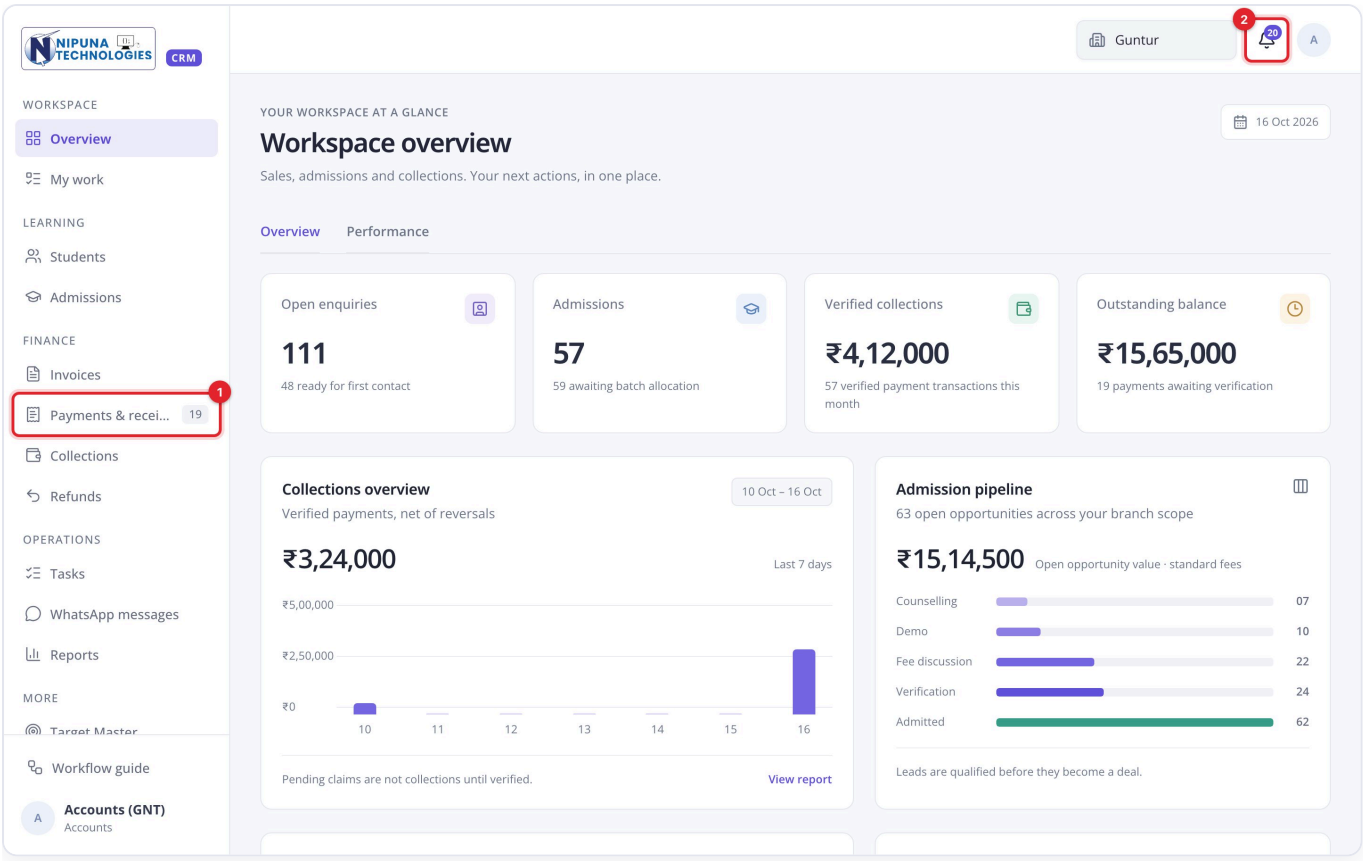

Figure 1 The Overview dashboard

1. Use the **Payments & receipts** menu item 1 for the ledger where claims are verified.
2. Watch the bell 2. Each new claim sends you an action-required notification straight away.

1.3 The menu: what each screen is for

Screen	What you use it for
Overview	Branch dashboard: verified collections, outstanding balance, awaiting verification.
My work	Your open tasks, oldest first. Roles without leads access see tasks only.
Students and Admissions	Look up a learner or an admission created by a verified payment.
Invoices	Every invoice with paid, balance and completion; open one to print it or change an instalment date.
Payments & receipts	The ledger. Verify or fail pending claims, request corrections, allocate advances.
Collections	Instalments due today, overdue and upcoming; ageing bands; promises to pay.
Refunds	Refund cases and support cases. You do payout and reconciliation.

Screen	What you use it for
Tasks and WhatsApp messages	Your tasks, and the WhatsApp messages the system sends to learners.
Reports and Target Master	Management reports with CSV export, and targets (read only).

1.4 Rules and limits the system enforces

RULE Verification is **once and final**: a claim ends as Verified or Failed and cannot be undone. The receipt number (for example `GNT-R-2627-00001`) is issued only at that moment.

RULE Verifying needs two confirmations: **evidence reviewed** and, for cash, an **independent cash check**. A pending claim carries only its transaction number (`TXN-GNT-…`).

RULE Payments can never be edited or deleted. A mistake is fixed by a **correction request** with a reason; a different person (Founder / CEO or Super Admin) must approve it, and the system adds a linked reversal.

RULE A course is admitted automatically on the verification that brings its paid amount to the ₹1,000 token.

RULE You pay out refunds but never decide them, and you can never pay out a case you decided.

RULE Fee changes after admission are approved by Founder / CEO or Super Admin; Accounts (or an admin) then applies them. A fee can never go below what is already paid; use a refund case instead.

Lead 360 opens **read-only** for you, from the claim review, an invoice or a notification. Leads is not in your menu.

1.5 A typical day

When	What you do
Start of day	Open the Overview and the bell. Clear anything marked action required, oldest first.
All day	Verify claims as they arrive. Target: under 30 minutes. At 25 minutes you get a warning; at 30 the Branch Manager is alerted.

When	What you do
Mid-morning	Open Collections. Check what is due today and overdue; log promises to pay.
As needed	Change an instalment date the learner agreed; request a correction for a wrong entry.
End of day	Check that nothing is still pending, and pay out or reconcile any approved refunds.

PART 2

Step-by-step workflows

Your main daily tasks, one at a time, with the screen you will see at each step.

2.1 Start your day: notifications and My work

Each new payment claim sends Accounts an action-required notification. The notification centre is the quickest way to the claim; **My work** lists your own tasks, such as chasing an instalment.

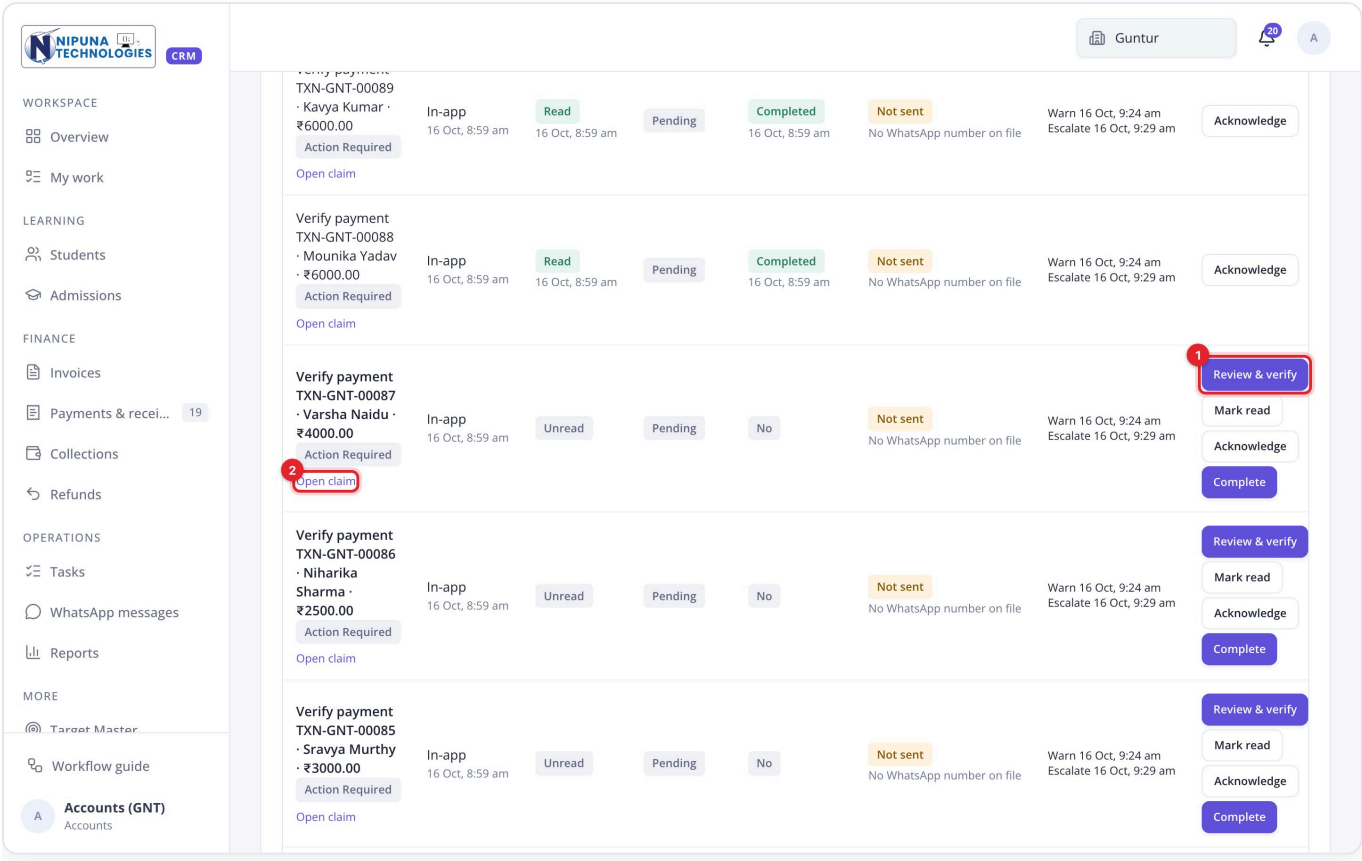

Figure 2 Notifications with a claim waiting for verification

1. Click the bell (top right) or open **Notifications** from the menu.
2. Find the notification for the claim. **Review & verify** (1) opens the claim in place; **Open claim** (2) goes to Payments & receipts with the same dialog.
3. Use **Mark read** or **Acknowledge** on information items so the list stays short.

> **TIP** Tasks are created for you automatically, for example to verify a payment or chase an instalment. Their original deadline never changes; moving one needs a reason.

2.2 Verify a UPI or bank-transfer claim

A counsellor has recorded a payment with proof. Check the proof against the bank statement, then verify. Verification issues the receipt number and, from ₹1,000, admits the course.

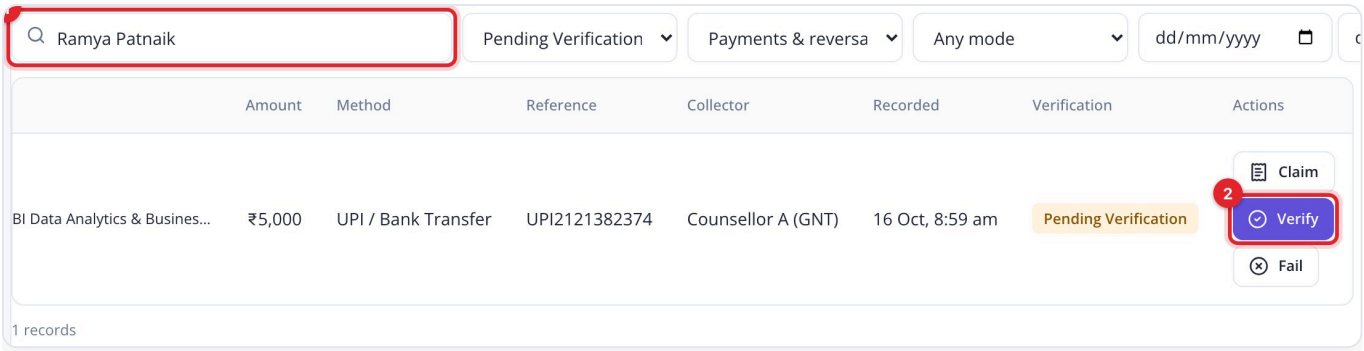

Figure 3 The pending claim in the ledger: no receipt number yet

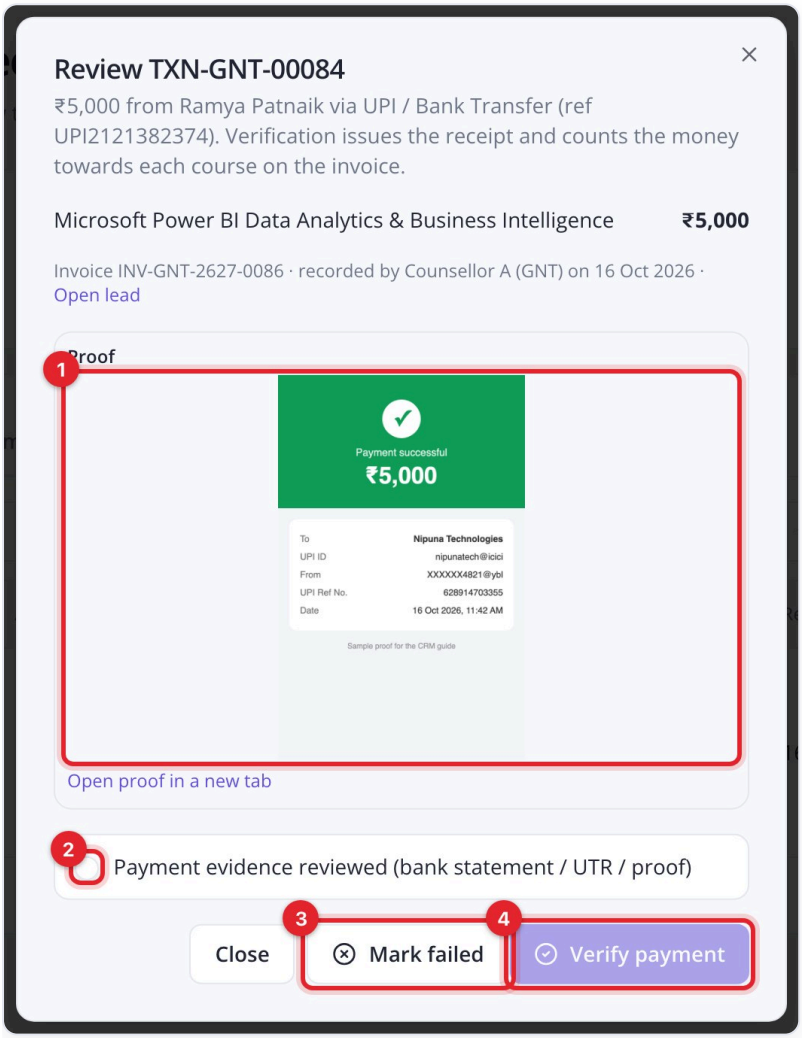

Figure 4 The claim review: amount, proof and the two actions

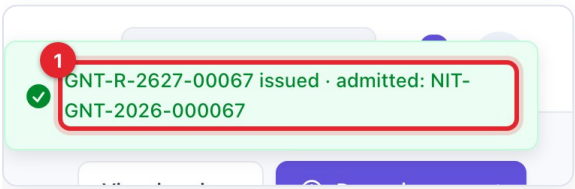

Figure 5 The receipt number and the admission created are confirmed in the toast

1. Open **Payments & receipts** and filter to **Pending Verification**, or search by learner name or transaction number 1.

2. Click **Verify** on the claim 2. The review shows the amount, mode, reference, the courses it pays for and the proof image (1 on the next screenshot).
3. Compare the proof and reference with the bank or UPI statement. If it matches, tick **Evidence reviewed** 2.
4. Click **Verify payment** 4; it stays greyed out until the box is ticked. If asked, enter your password again. **Mark failed** 3 is covered in section 2.4.
5. A message such as **GNT-R-2627-00012 issued · admitted: NIT-GNT-2026-000031** confirms the receipt number and the admission.

> **RULE** Verification cannot be undone. Never tick **Evidence reviewed** before the money is visible in the statement.

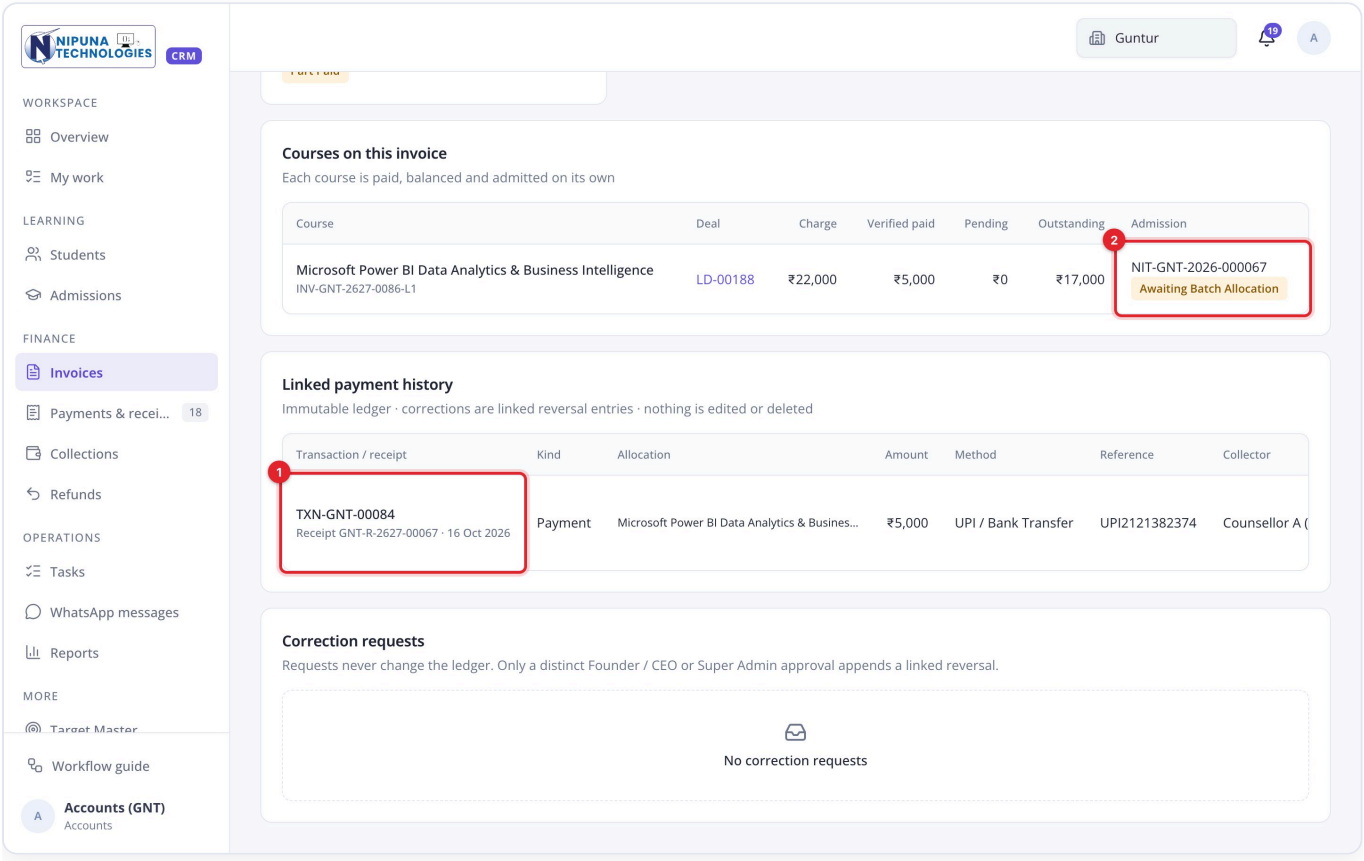

Figure 6 The invoice now shows the receipt, money paid and the admission

The invoice page shows the verified receipt 1 and, beside the course, the admission it created 2. Balance due falls by the verified amount only.

2.3 Verify a cash claim

Cash needs no proof image, but it needs a second confirmation: someone other than the collector has counted the cash. Verify cash only after that count.

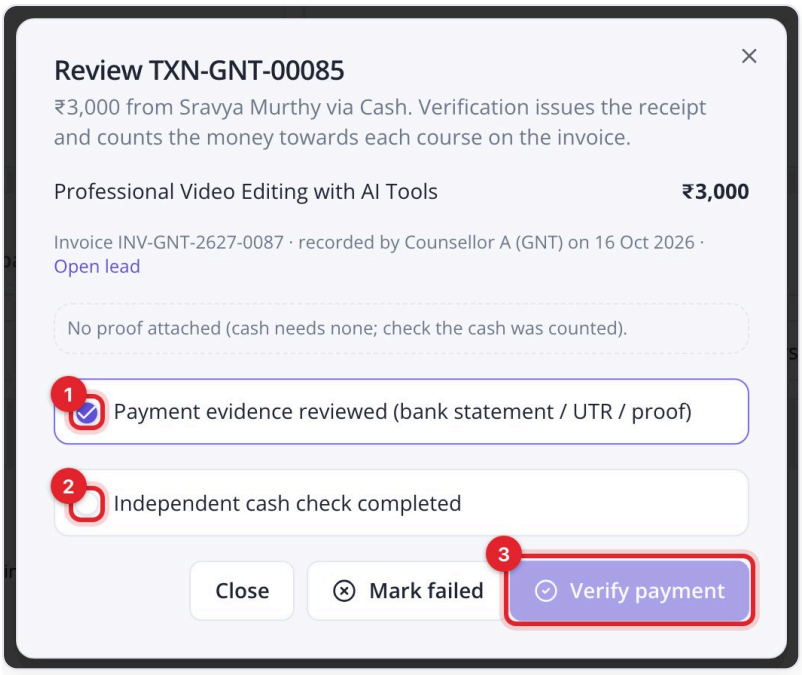

Figure 7 For cash there is a second tick, and Verify stays off until both are ticked

1. Open the cash claim from the ledger or from its notification.
2. The review says **No proof attached** (cash needs none).
3. Tick **Evidence reviewed** 1 once the cash is on record, and **Independent cash check completed** 2 once a second person has counted it.
4. **Verify payment** 3 is enabled only with both ticks. Click it, and confirm your password if asked.

> **TIP** The cash check is the safeguard against one person collecting and approving the same money. Do not tick it on someone else's word.

2.4 Mark a claim as failed

If the money never arrived (a bounced cheque, a reference that is not in the statement), fail the claim. It stays in the ledger as Failed, never gets a receipt, and the counsellor is told the reason.

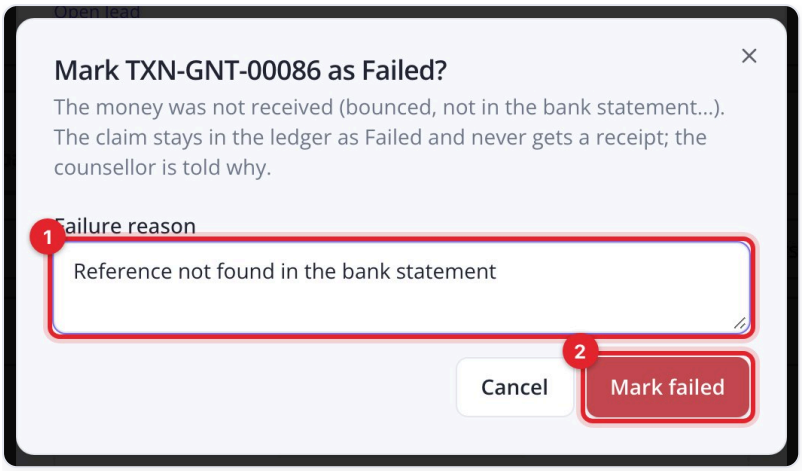

Figure 8 Failing a claim needs a reason

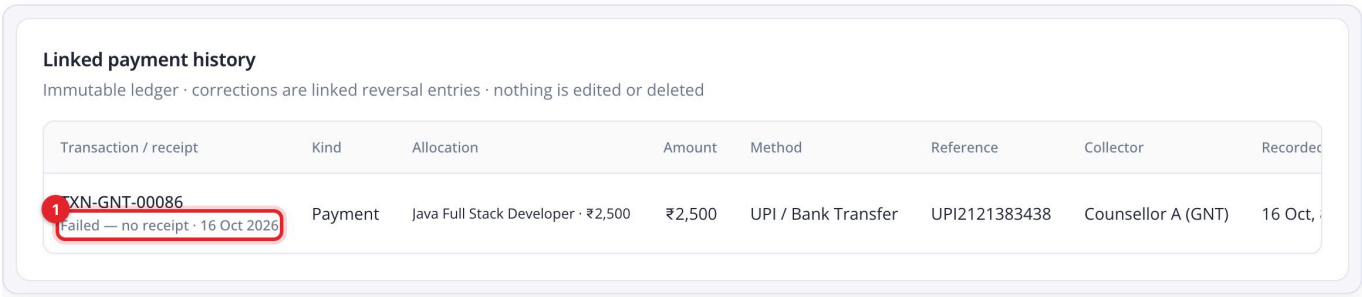

Figure 9 The invoice ledger shows the claim as Failed, with no receipt

1. Open the claim as for any verification.
2. Click **Mark failed**. A confirmation asks for a **Failure reason**; type a clear one 1.
3. Click **Mark failed** in the confirmation 2.
4. The ledger row now reads **Failed — no receipt**. The owner counsellor gets a notification with your reason.

> **RULE** Failed is final too. If the learner pays again, the counsellor records a new claim.

2.5 Request a correction on a verified payment

A verified payment cannot be edited or deleted. If it was wrong (wrong amount, wrong invoice, duplicate), request a correction. A different person approves it, then the system adds a reversal entry linked to the original.

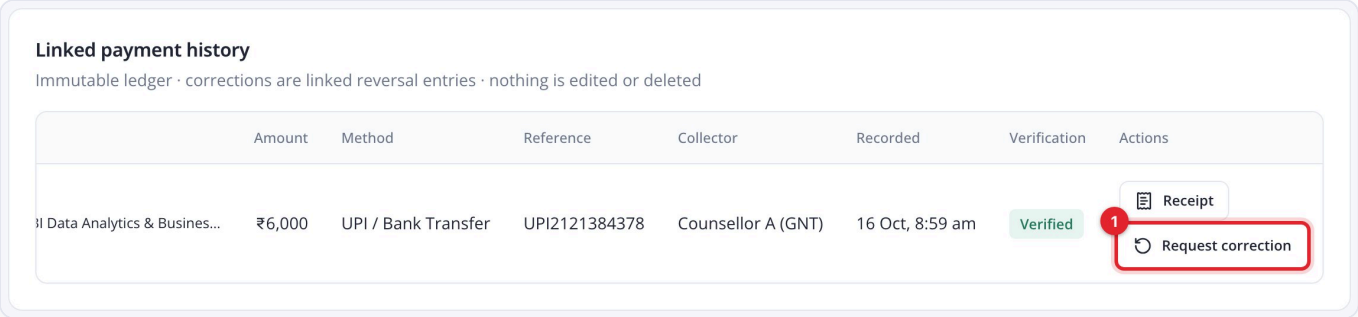

Figure 10 Request correction sits on the verified receipt row

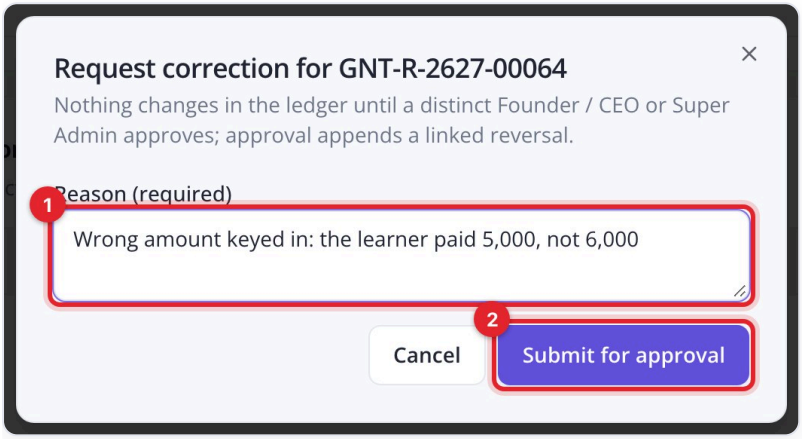

Figure 11 The correction request dialog

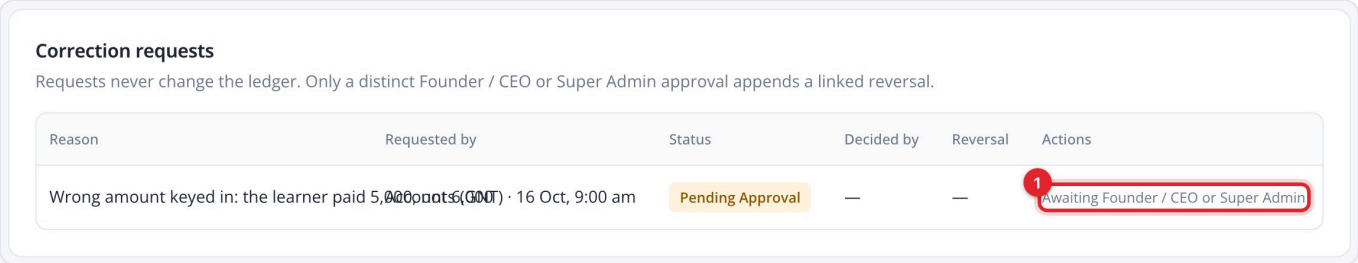

Figure 12 The request waits for a Founder / CEO or Super Admin

1. Open the invoice and find the verified receipt in the payment ledger.
2. Click **Request correction** 1 on that receipt's row.
3. Type a specific **Reason (required)** 1 and click **Submit for approval** 2. Confirm your password if asked.
4. The row now shows **Awaiting Founder / CEO or Super Admin**. You can also follow requests under the **Correction requests** tab of Payments & receipts.

RULE You cannot approve your own request, and no one can approve a request they raised themselves. When it is approved, the original receipt stays visible and a Reversal row is added beside it.

2.6 Open an invoice and change an instalment due date

The invoice page is the branch's official document and the working view of one learner's account. Use it to check the schedule and ledger, print a copy, or move a due date that the learner has agreed.

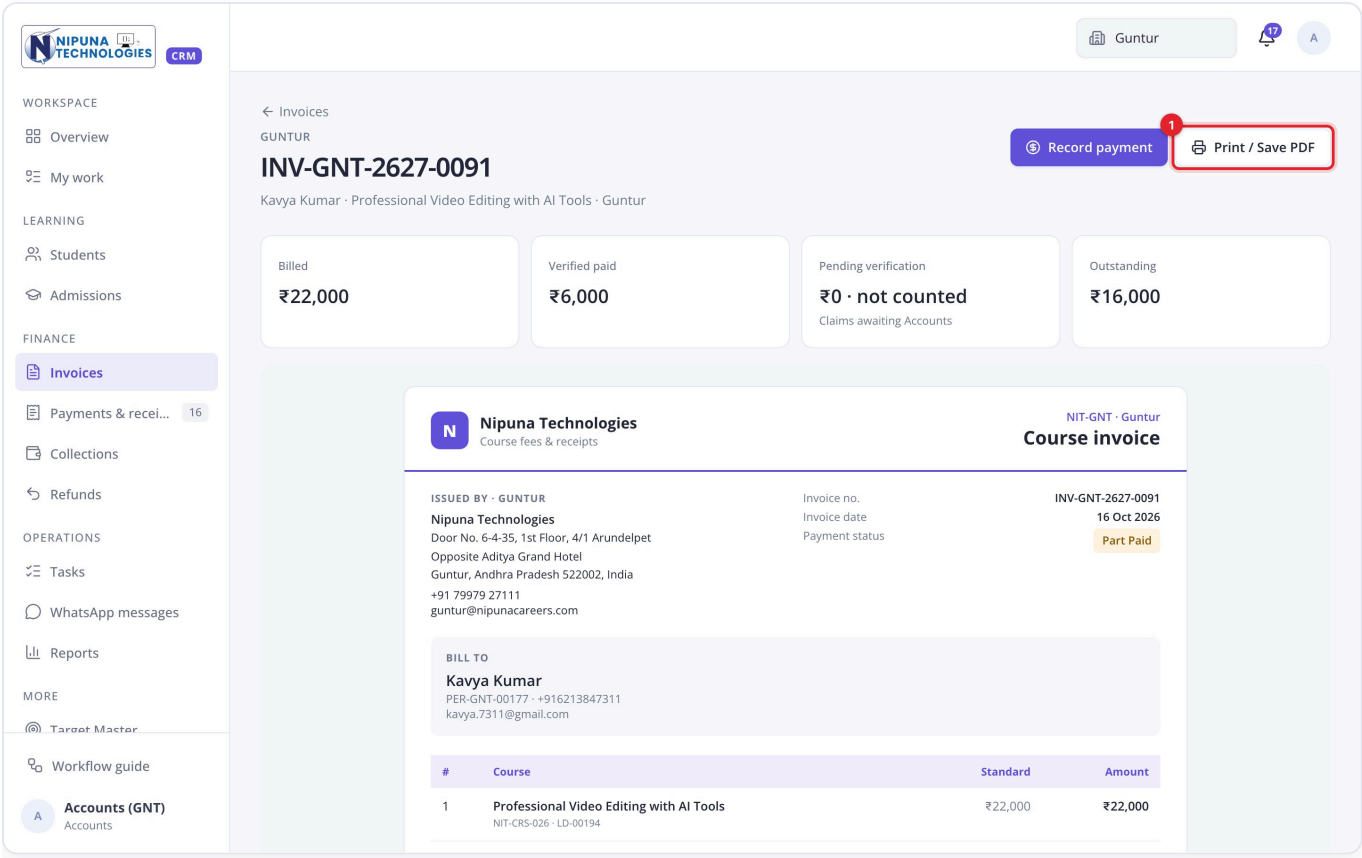

Figure 13 The top of an invoice: totals and the Print / Save PDF button

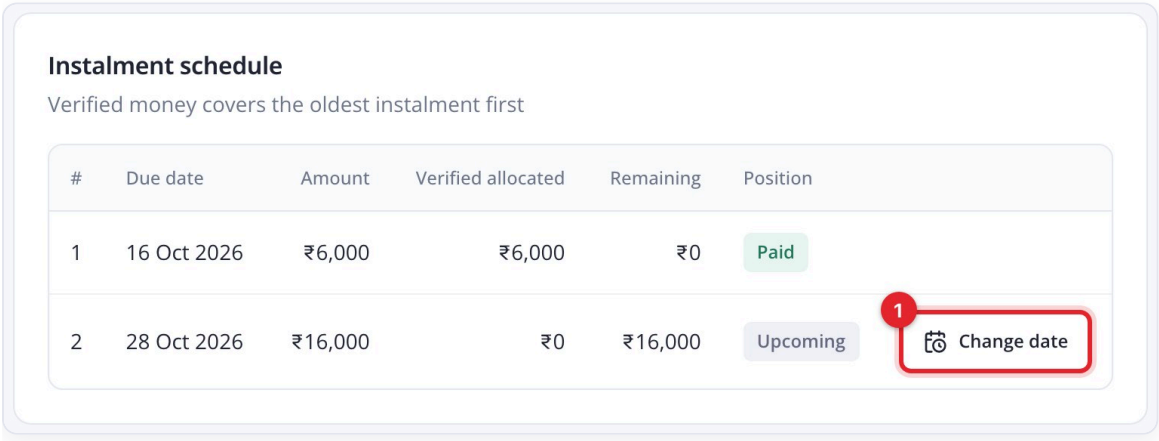

Figure 14 The instalment schedule, with the change-date button on each unpaid instalment

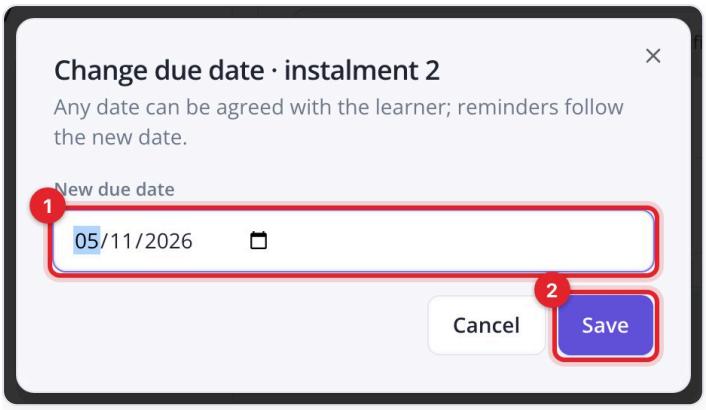

Figure 15 Change the due date of one instalment

1. Open **Invoices**, then use the search box or the **Payment completion** filter on the register to find the invoice. Click its number.
2. Check the money tiles, the **Instalment schedule** and the payment ledger. A pending claim shows **No receipt until verified** and never counts as paid.
3. To print or save a PDF, click **Print / Save PDF** (1 in the second figure). The invoice prints on its own, A4.
4. To move a date, click the pencil next to the instalment (1 in the third figure). Pick the **New due date** 1 and click **Save** 2. Reminders follow the new date.

> **TIP** Instalments already paid cannot be moved. Invoices cannot be edited; an unpaid invoice can be cancelled with **Cancel invoice** (a reason is required).

2.7 Chase dues in Collections and record a promise to pay

Collections lists every instalment still unpaid. Use it each morning to see what is due today, what is overdue and how old it is, and to log what the learner promises.

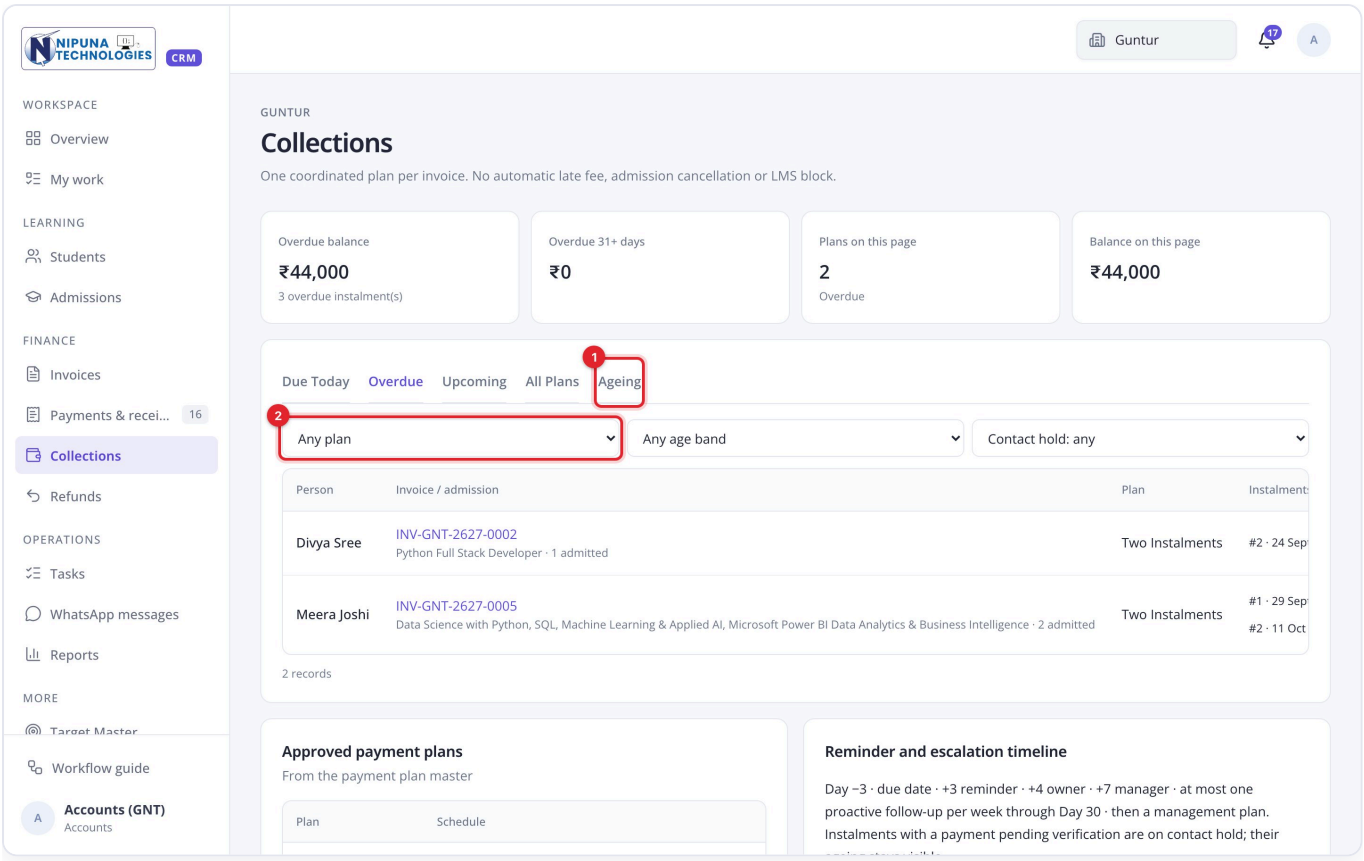

Figure 16 Collections: tabs for Due today, Overdue and Upcoming, plus the filters

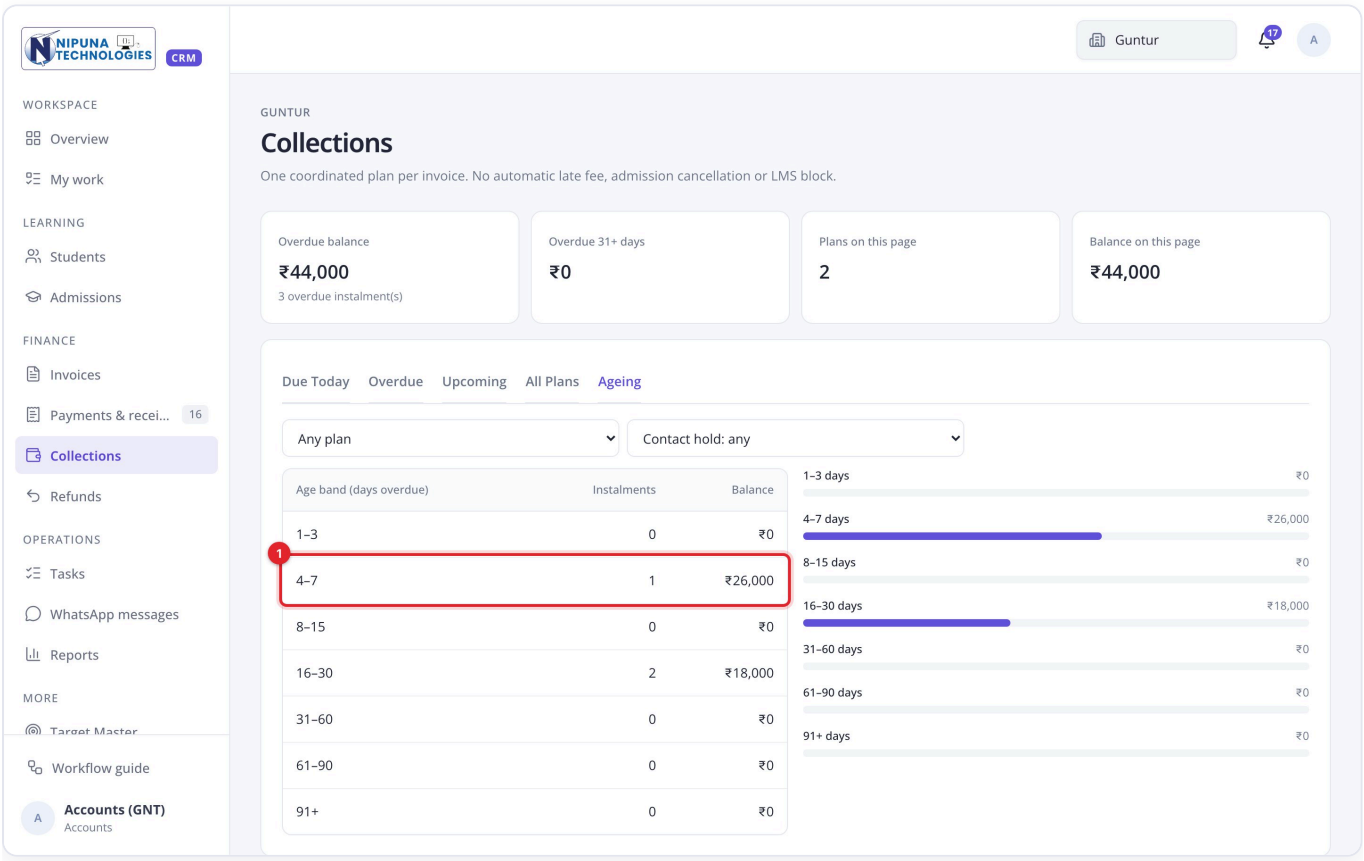

Figure 17 The Ageing tab groups overdue money into bands

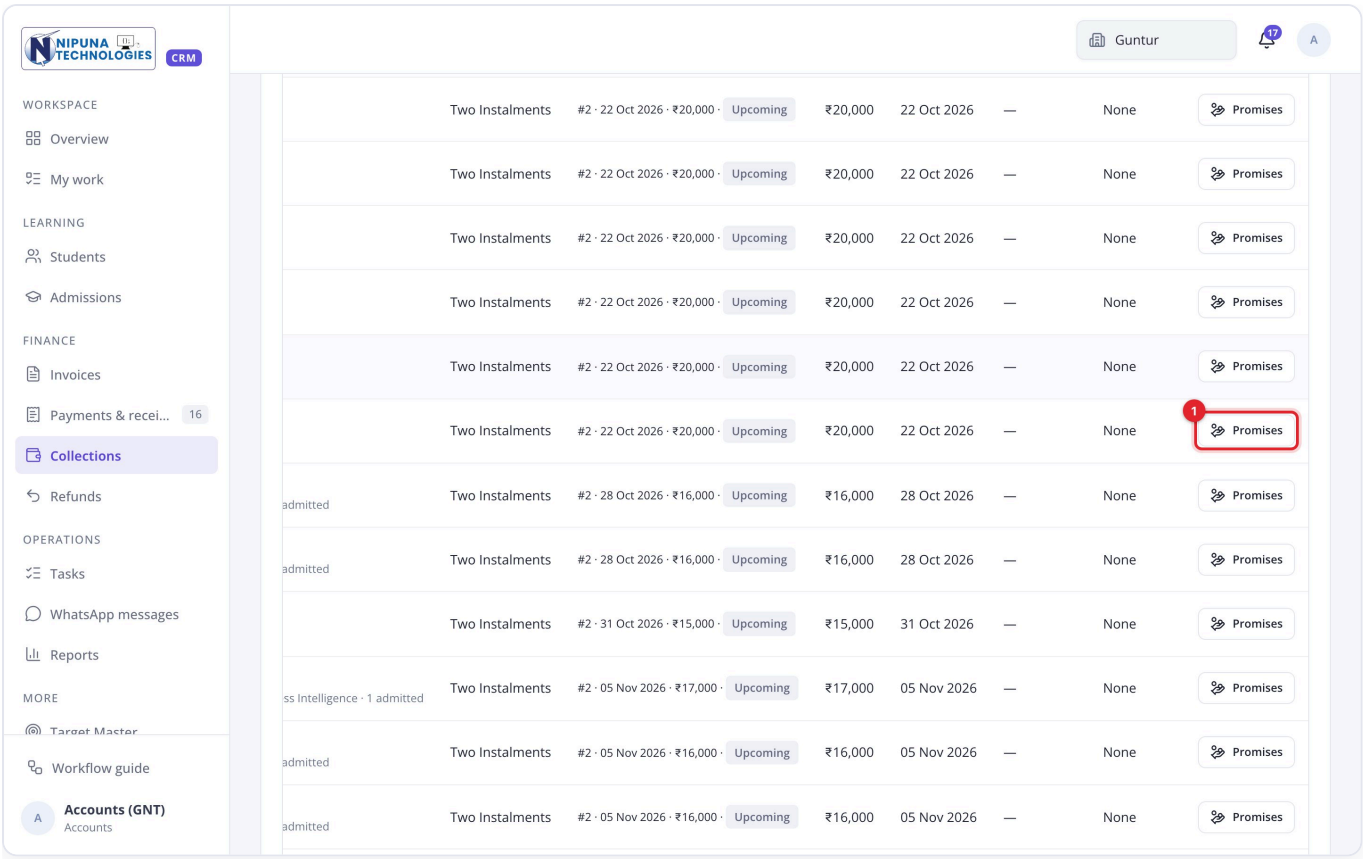

Figure 18 Find the learner and open Promises

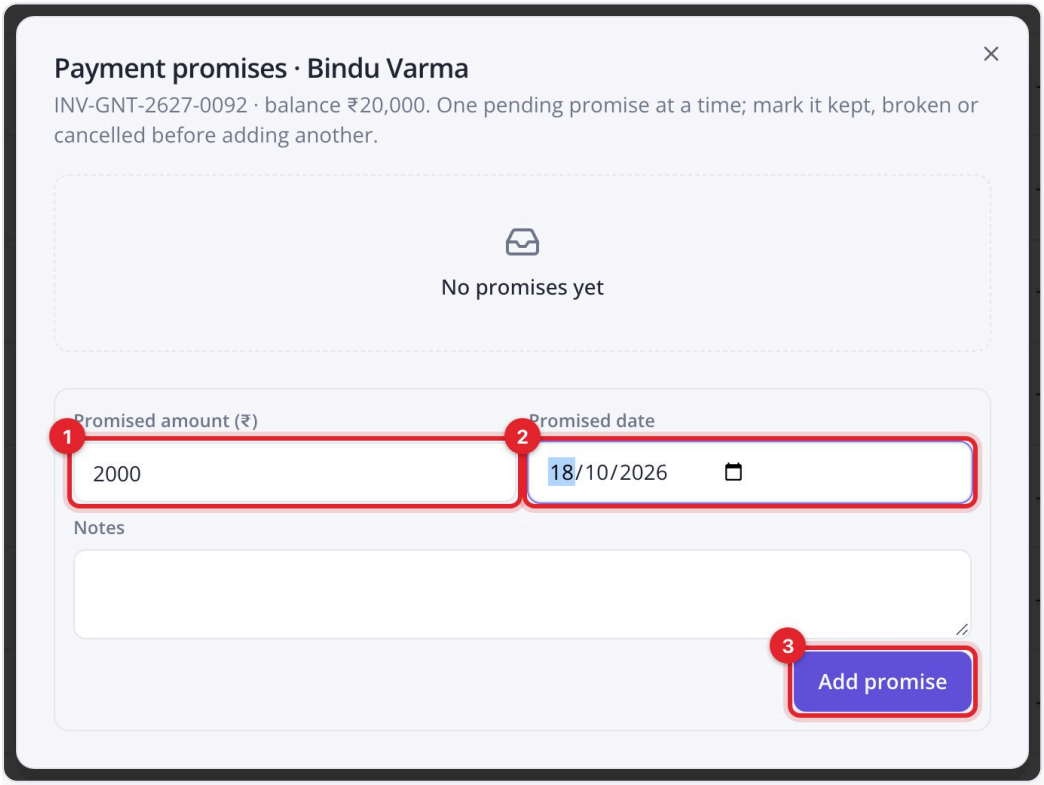

Figure 19 Record what the learner promised

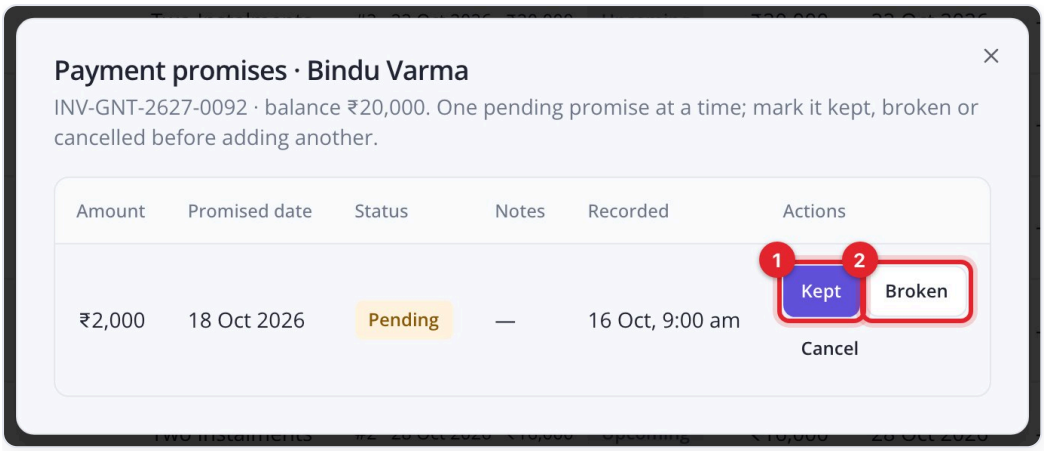

Figure 20 The promise is logged; mark it Kept or Broken later

1. Open **Collections**. Use the tabs for **Due today**, **Overdue** and **Upcoming**, and **Ageing** for the bands (1–3, 4–7, 8–15, 16–30, 31–60, 61–90, 91+ days). Filter by **Payment plan** 2.
2. Find the learner and click **Promises** on their row.
3. Enter the **Promised amount (₹)** 1 and **Promised date** 2, then click **Add promise** 3.
4. When the date passes, open Promises again and mark it **Kept** 1 or **Broken** 2. Broken promises escalate.

> **TIP** Reminders are automatic: 3 days before the due date, on it, and 3 days after (day 4 to the owner, day 7 to the Branch Manager). A learner with a claim awaiting verification is on contact hold and is not chased.

2.8 Pay out and reconcile an approved refund

The Branch Manager registers a refund case and assesses it, and a Founder / CEO or Super Admin decides it. When it is approved, the money is yours to pay and reconcile. You cannot decide a refund, and the person who decided it cannot pay it out.

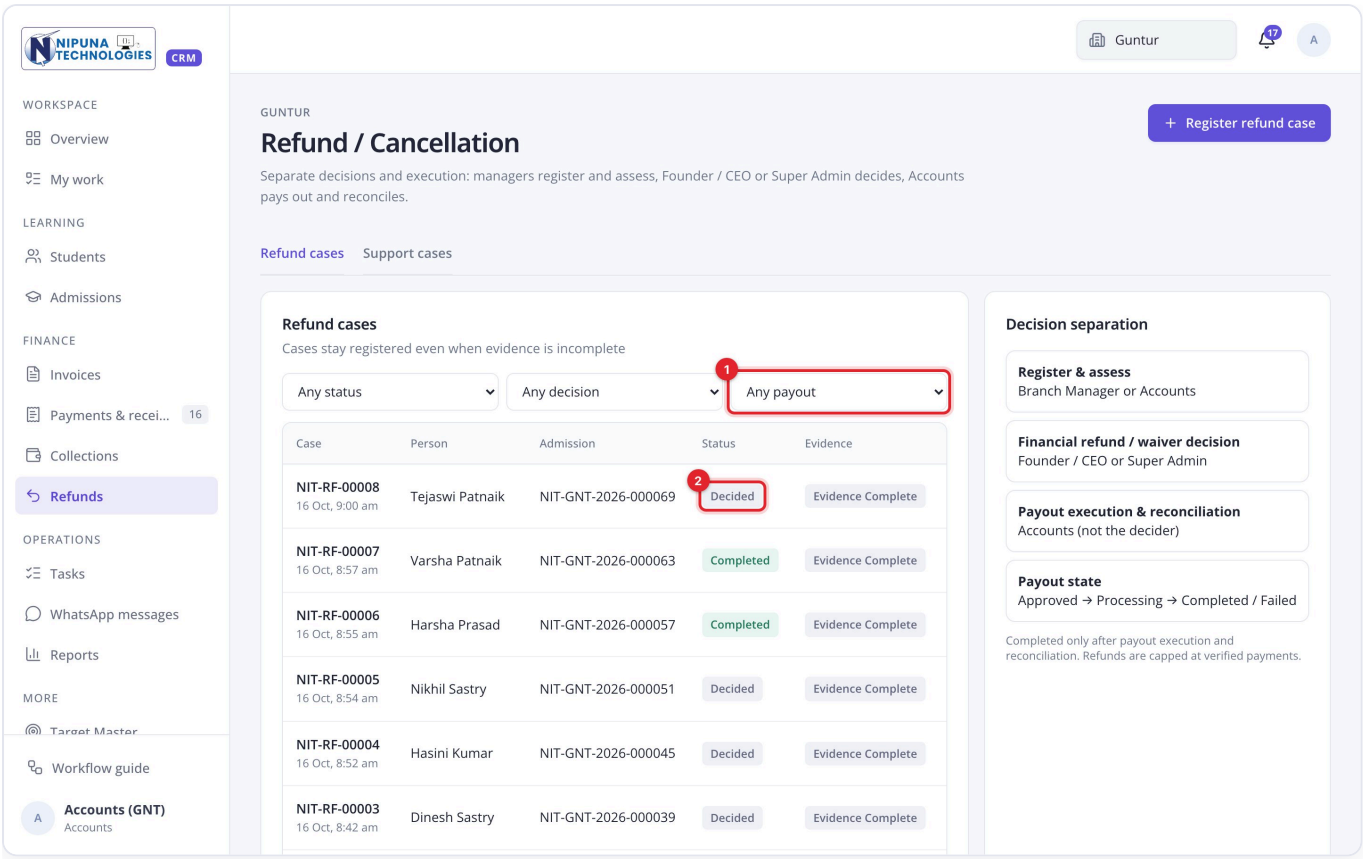

Figure 21 Refund cases: status, decision and payout at a glance

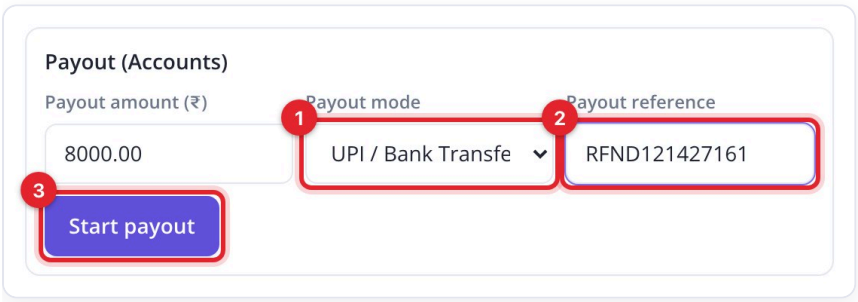

Figure 22 The approved case: payout details

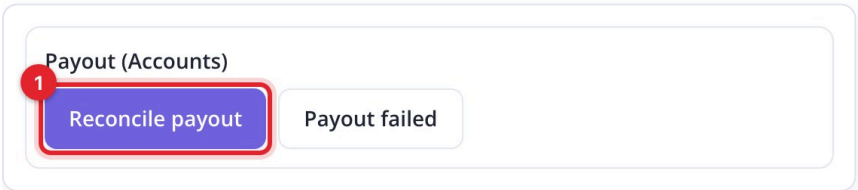

Figure 23 After the payout is sent: reconcile it against the bank

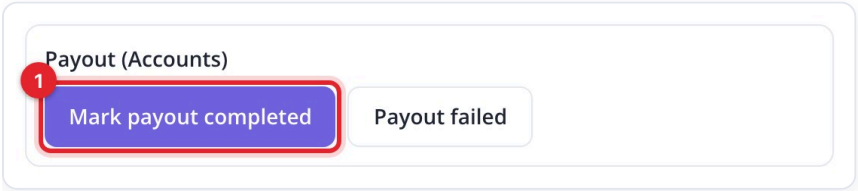

Figure 24 Then mark the payout completed

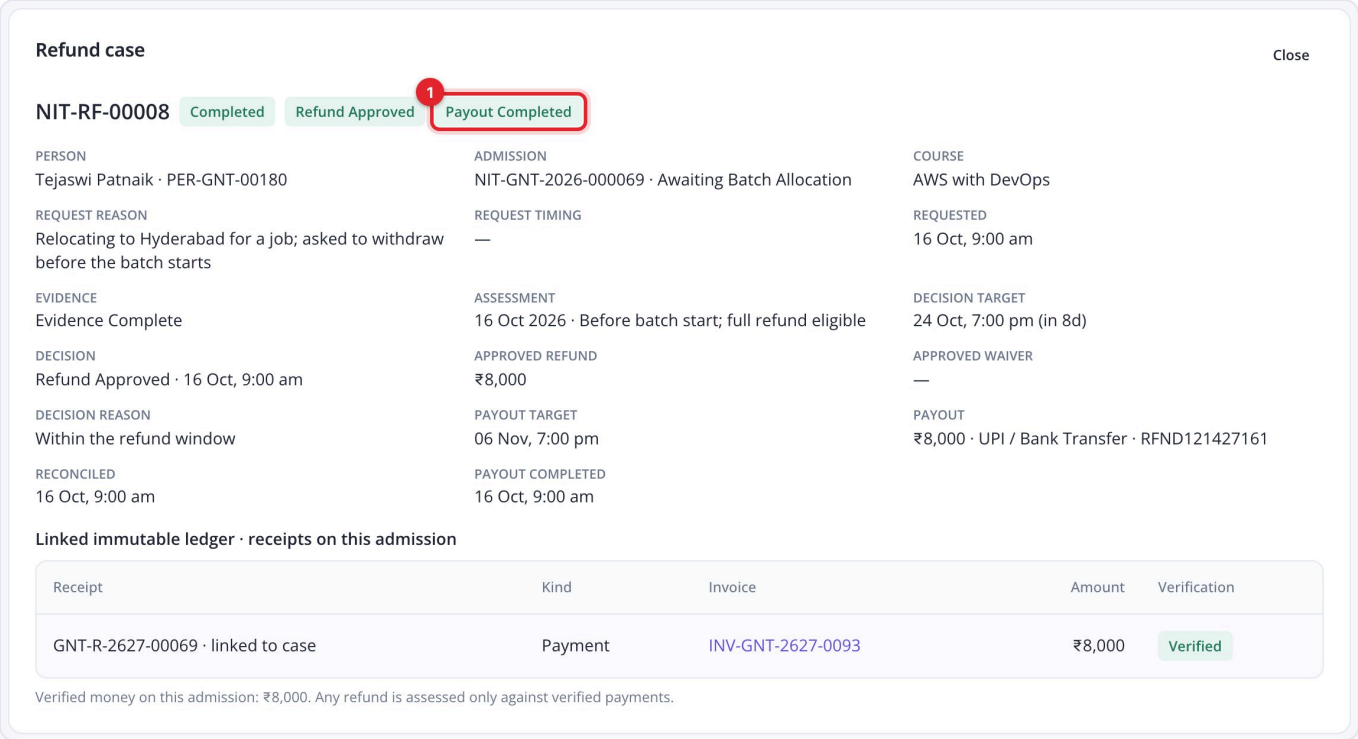

Figure 25 The case is completed

1. Open **Refunds**. Filter by **Payout status** 1 to see approved cases waiting for you.
2. Open the case. Check the approved amount, the receipts it covers and the decision reason.
3. Choose the **Payout mode** 1, type the **Payout reference** 2 from your bank transfer and click **Start payout** 3. The case moves to Processing.
4. When the bank shows the transfer, click **Reconcile payout** 1.
5. Click **Mark payout completed** 1. If the transfer fails, use **Payout failed** and give a reason; the case returns for another attempt.

> **RULE** Targets: a decision within 7 working days of registration and the payout within 18 working days of approval. A refund can never exceed what was verified as paid.

2.9 Reports with filters and CSV export

Reports gives the same figures as the dashboards, with filters. Use it for month-end checks and to hand figures to management.

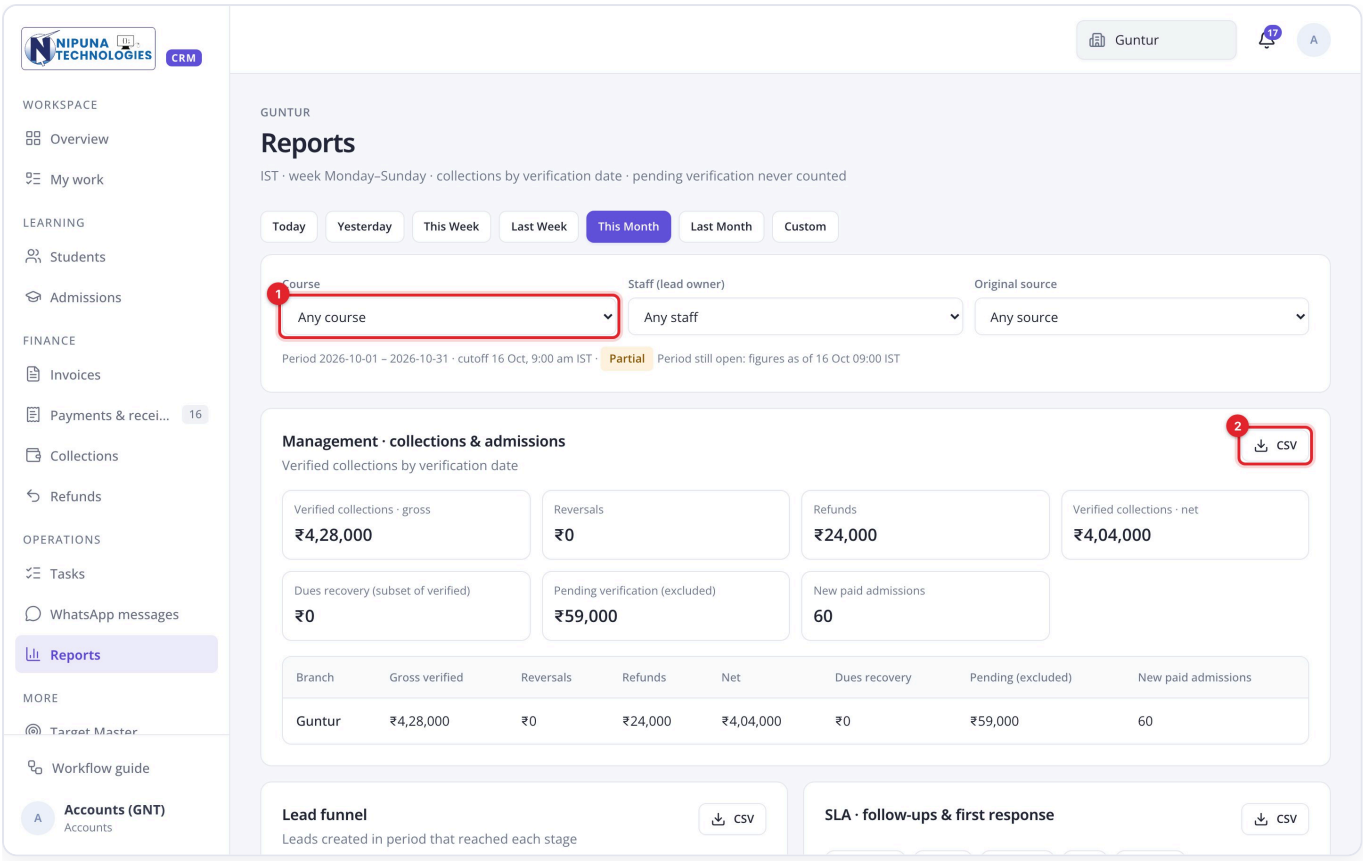

Figure 26 Reports: filters on top, CSV export on each report

1. Open **Reports** and set the date range, **Course** 1 or other filters at the top.
2. Read the figures on screen, then click **CSV** 2 beside a report to download the filtered rows.

Lead 360 for Accounts. From a claim review (**Open lead**), an invoice or a notification you can open the learner's Lead 360. It is read-only: you see the next-step bar, delivery plan, demos, timeline and invoices, but you act only on what the bar assigns to you, which is verifying a payment.

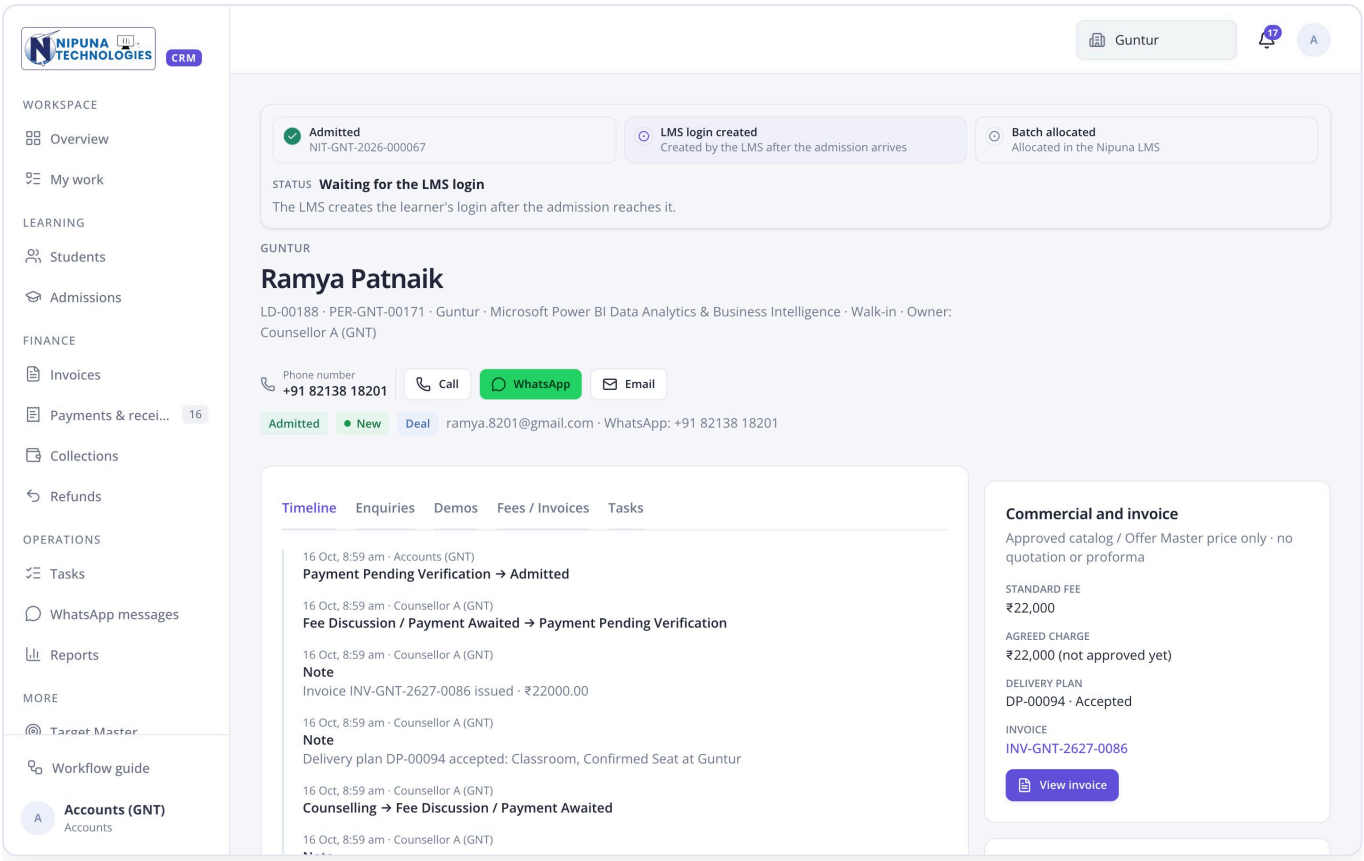

Figure 27 Lead 360 opens read-only for Accounts
