2.7 Cancel or transfer an admission

2.8 Follow the money: payments, collections and refunds

2.9 Reports, Target Master and Offer Master

How to read the screenshots. Red boxes with numbers 1 2 point at the buttons and fields the steps talk about. Names, phone numbers and amounts are sample data.

PART 1

Your role at a glance

What you can see, what you are responsible for, and the rules the system enforces for you.

1.1 What a Branch Manager does

The Branch Manager (BM) runs one branch day to day. You keep leads moving by giving every enquiry an owner, you decide discount requests that fall within your limit, you watch the pipeline and the money coming in, and you handle changes to admissions such as cancellations and transfers.

You can do everything a counsellor can do on leads and deals, and on top of that you have manager tools: assigning leads, changing a pipeline card's owner, approving special closing requests, reactivating lost leads and clearing a stop-contact flag.

- **Team and leads**: assign and bulk-assign leads, reactivate lost leads, clear a stop-contact flag.
- **Approvals**: special closing requests up to your concession limit; fee versions; third demos; next-course paths.
- **Admissions**: cancel an admission or transfer it to the other branch; pause and resume an enrolment.
- **Money**: see payments, collections and promises; open and withdraw refund cases.
- **Visibility**: Reports, and read-only Target Master and Offer Master.

> **RULE** Your scope is your own branch (Guntur here). You do not see the other branch's leads, deals or money.

1.2 Signing in and your home screen

After signing in you land on the **Branch Manager** view. It is built for the start of the day: how your branch is doing and which queues need you.

1. Open the CRM and sign in with your work email and password.
2. You arrive on **Branch Manager**. Check the **Team queues** 1 first: approvals pending, unassigned leads, overdue tasks and payments waiting for verification.
3. Each queue is a link. Click one to open the matching list, already filtered. The **Leads** menu item 2 also shows how many leads are waiting.

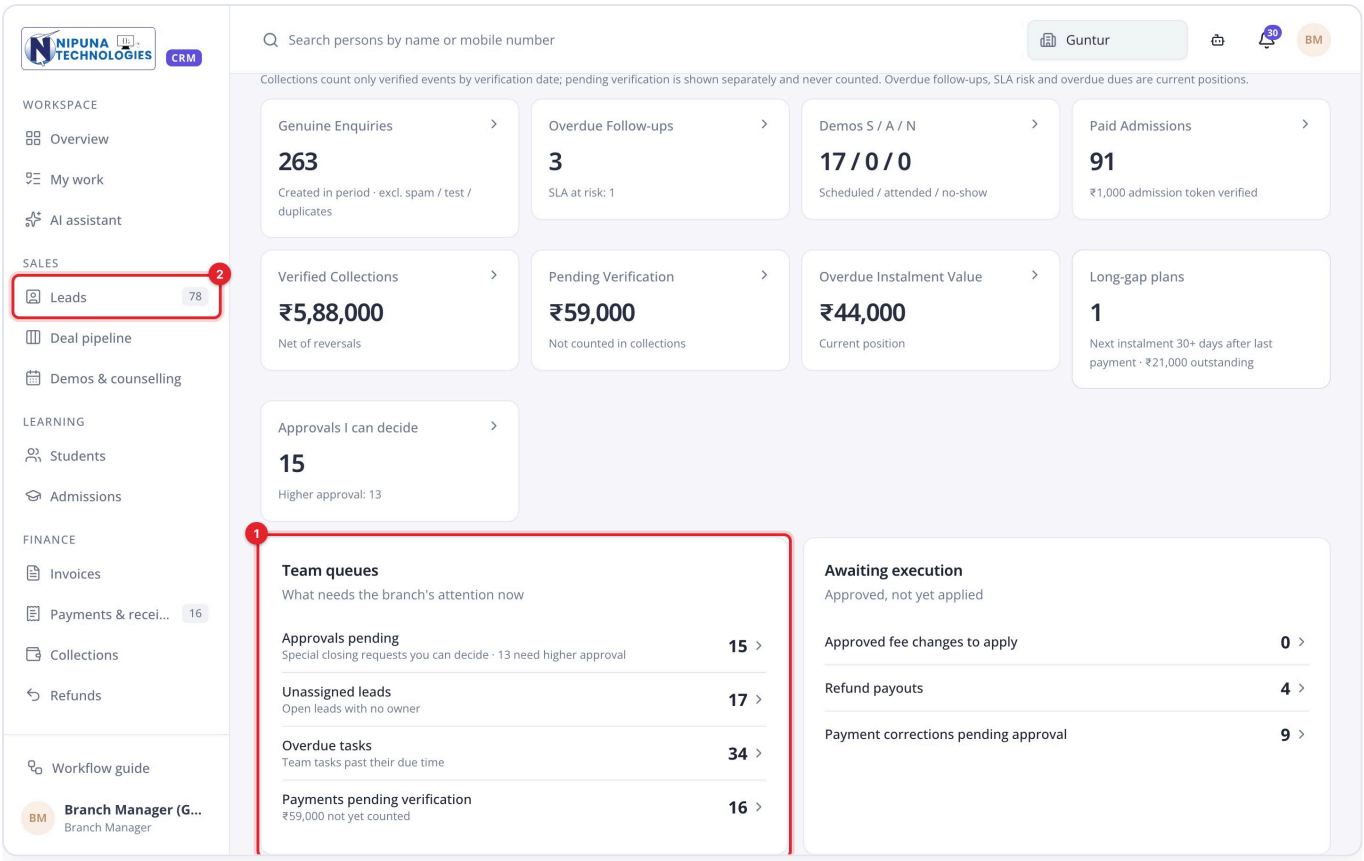

Figure 1 The Branch Manager view after sign-in

1.3 The menu: what each screen is for

The left menu is grouped by area. Screens that are not used in this branch yet are hidden. Academic scheduling (batches and waiting-for-batch lists) is run in the LMS for now, so you will not see those screens here.

Menu group / screen	What you use it for
Overview, **My work**	Your dashboard and your own to-do list (tasks, follow-ups, approvals waiting for you).
Leads, **Deal pipeline**	Assign leads, follow up, watch every deal by stage and change a card's owner.
Demos & counselling	Demo classes booked for your branch.
Students, **Admissions**	Student 360 and admissions; cancel or transfer from the admission sheet.
Invoices, **Payments & receipts**, **Collections**, **Refunds**	See the money. Accounts verifies payments; you open refund cases.
Tasks, **Communications**, **Reports**	Team tasks (reassign, cancel), the inbox and branch reports.

Menu group / screen	What you use it for
More: **Branch Manager**, **Discount Approvals**, **Offer Master**, **Target Master**, **Sales playbook**, **Ask Nipuna**	Manager tools. Offer Master and Target Master are read-only for you.

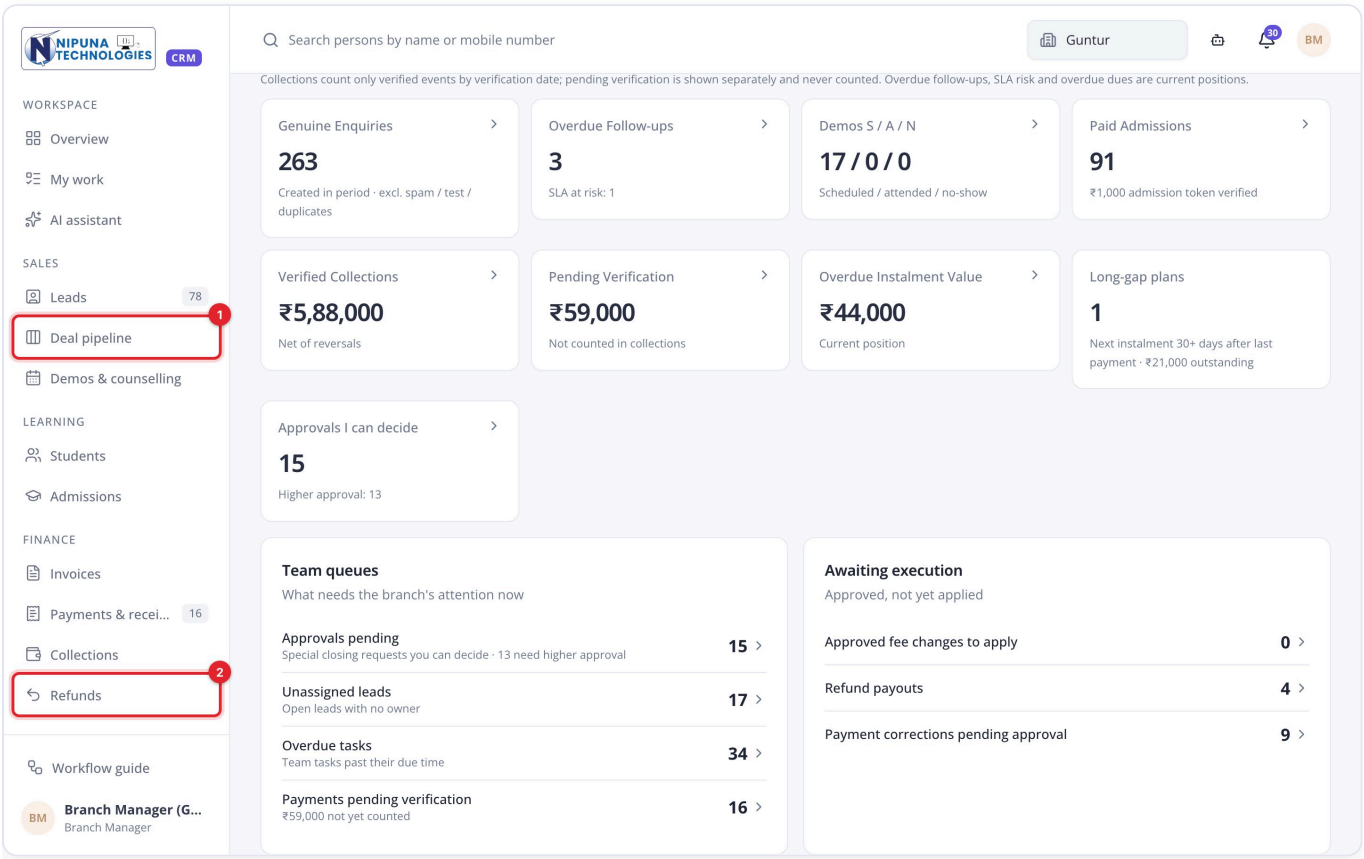

Figure 2 The left menu, grouped by area

1.4 Rules and limits the system enforces

Rule	What it means for you
Concession limit	You can approve an extra concession up to the **lower of 5% or ₹1,000** of the standard fee. Anything above goes to the Founder / CEO or Super Admin.
Two-person rule	Nobody approves their own request. A counsellor raises, you decide. If you raise something yourself, someone else must decide it.
Fresh password	Sensitive decisions ask you to type your password again, even though you are signed in.
70% floor	A price below 70% of the standard fee always needs the Founder / Super Admin plus a second independent approver.
Decision time	Special closing requests should be decided within 5 staffed minutes: a warning at 4, escalation to the Founder / Super Admin at 5. A timeout never approves.

Rule	What it means for you
You cannot	Verify payments, decide refunds, approve fee changes after admission, create or activate offers, or open Admin / Settings.

TIP The system creates a task for you for every unassigned lead (due in 60 staffed minutes), and you are the escalation point for payments waiting longer than 30 minutes and enquiries nobody has attempted within 10 staffed minutes.

1.5 A typical day

1. Start on **Branch Manager**: check **Team queues** and **My work**.
2. Assign every unassigned lead to a counsellor or front-office colleague.
3. Open **Discount Approvals** and decide what is waiting; keep an eye on the 5-minute target.
4. Look at the **Deal pipeline** for stuck cards and rebalance owners if a counsellor is away.
5. Check **Payments & receipts** and **Collections** for anything late; ask Accounts about unverified claims.
6. Handle admission changes (cancellations, transfers) and refund cases as they come in.
7. End the day on **Reports** to see how the branch is doing against target.

PART 2

Step-by-step workflows

Your main daily tasks, one at a time, with the screen you will see at each step.

2.1 Start your day: Branch Manager view and My work

Do this first thing. It tells you where the branch needs you before you open any list.

1. Open the **Branch Manager** view (it is also where you land after sign-in).
2. Read the **Team queues** (1): each line is a count, and clicking it opens the matching list.
3. Open **My work** (1 in the second screen) to see what is yours personally: follow-ups, callbacks and tasks due today.

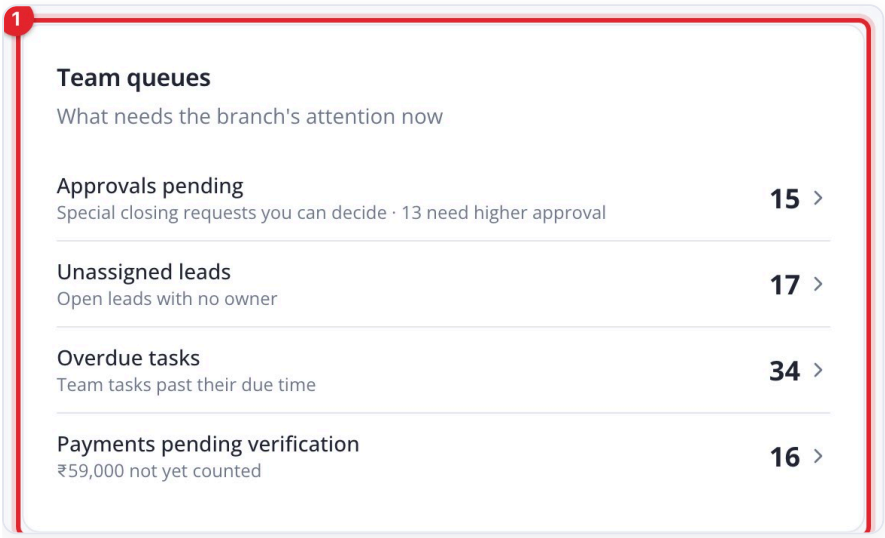

Figure 3 Branch KPIs and team queues

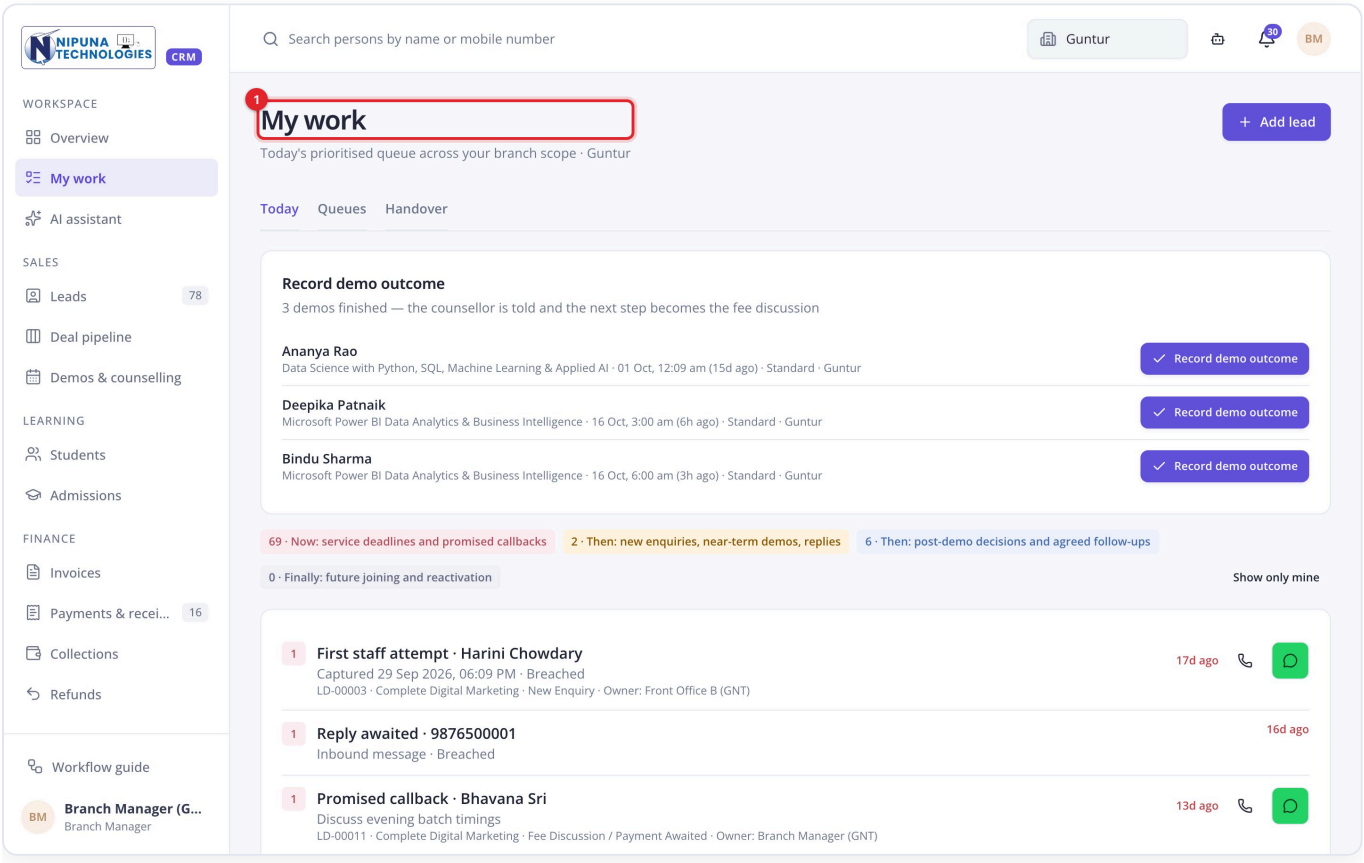

Figure 4 My work: your personal to-do list

> **TIP** Click **Unassigned leads** in the team queues to jump straight to the leads that still need an owner.

2.2 Assign an unassigned lead, and bulk-assign several

An enquiry nobody owns is not being worked. Give each one to a counsellor as soon as it arrives. You can assign one lead from its page, or several at once from the list.

1. Open **Leads** and set **Assigned** to **Unassigned**, or click **Unassigned leads** in the team queues.
2. Tick the leads you want to give out (1). A bar appears showing how many are selected.
3. Choose the **New owner** (2) and click **Assign** (3). All selected leads move to that person and a message confirms it.
4. For a single lead, open it and click **Reassign** (1 in the next screen). Choose the **New owner** (1) and click **Reassign** (2).

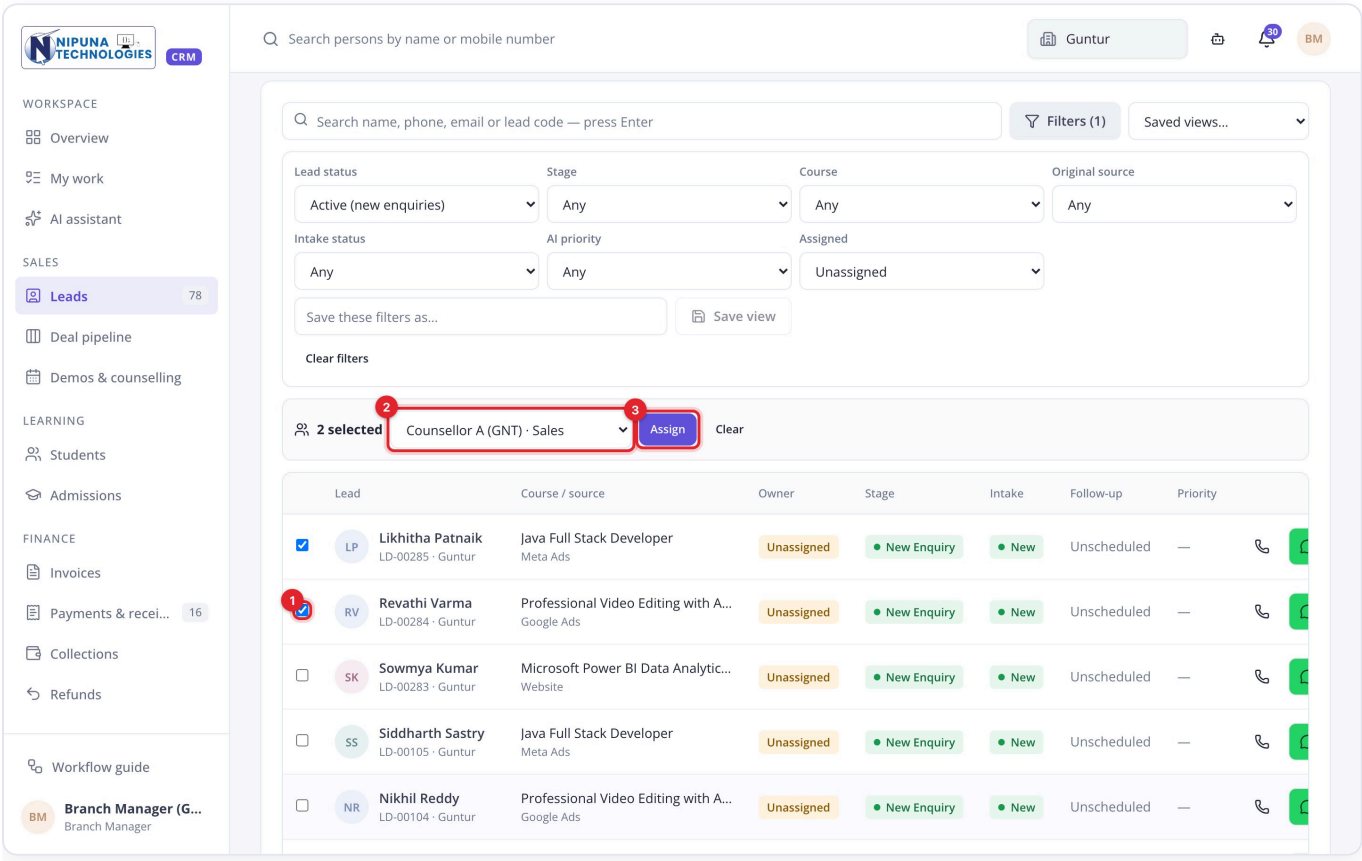

Figure 5 Leads filtered to Unassigned, two selected, owner chosen

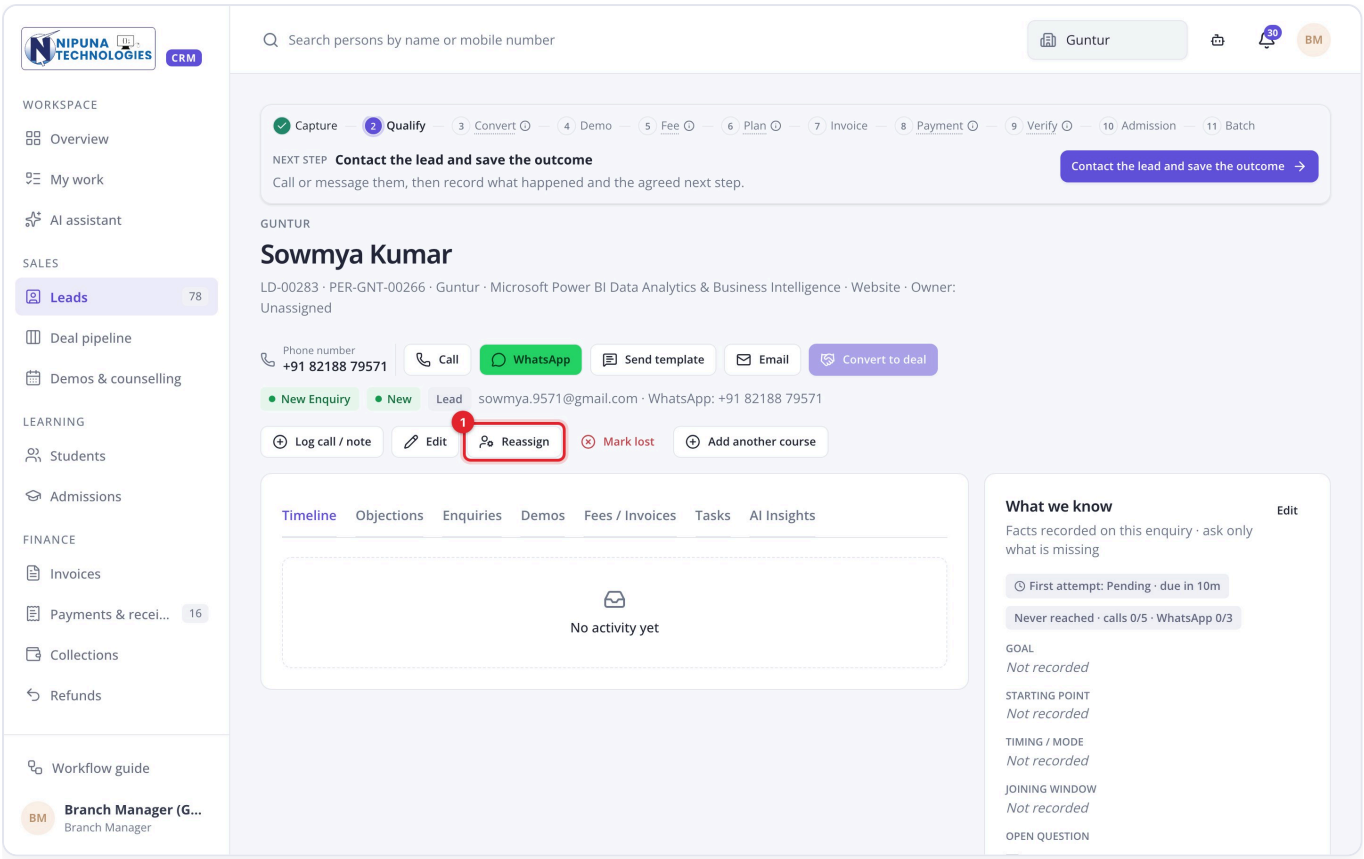

Figure 6 Lead 360 of an unassigned lead, with the Reassign button

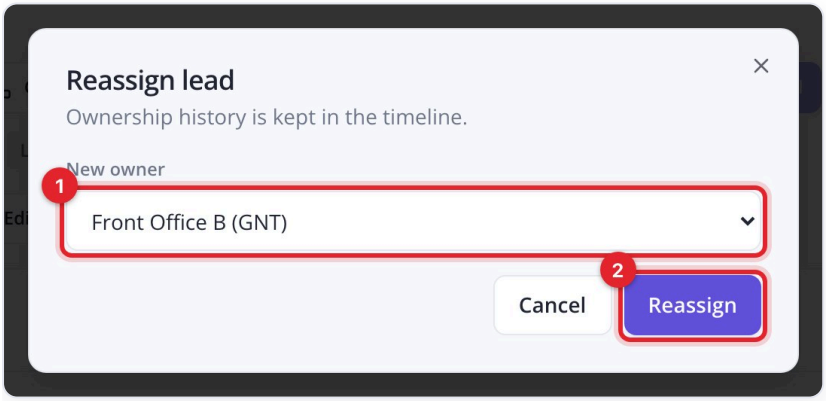

Figure 7 Choosing the new owner

> **RULE** Owners are branch-scoped: you can only select leads from one branch at a time and assign them to people in that branch.

> **TIP** Ownership history is kept in the lead's timeline, so you can always see who had the lead before.

2.3 Approve a special closing request within your limit

When a counsellor needs to give an extra concession to close a sale, they raise a special closing request. You decide it. Within your limit you can approve it yourself.

1. Open **Discount Approvals** (under **More**). The **I can approve** tab (1) lists requests you may decide.
2. Click a request to read its terms on the right: standard fee, requested extra, final payable and the counsellor's reason.
3. Check that the extra is within your limit and that **Floor (70%)** is not marked below.
4. Click **Approve** (2). In the dialog add a **Decision reason** (1) and click **Approve** (2).
5. Type your password when asked. A message confirms the request is **Approved**, and the fee version is approved so the counsellor can invoice.

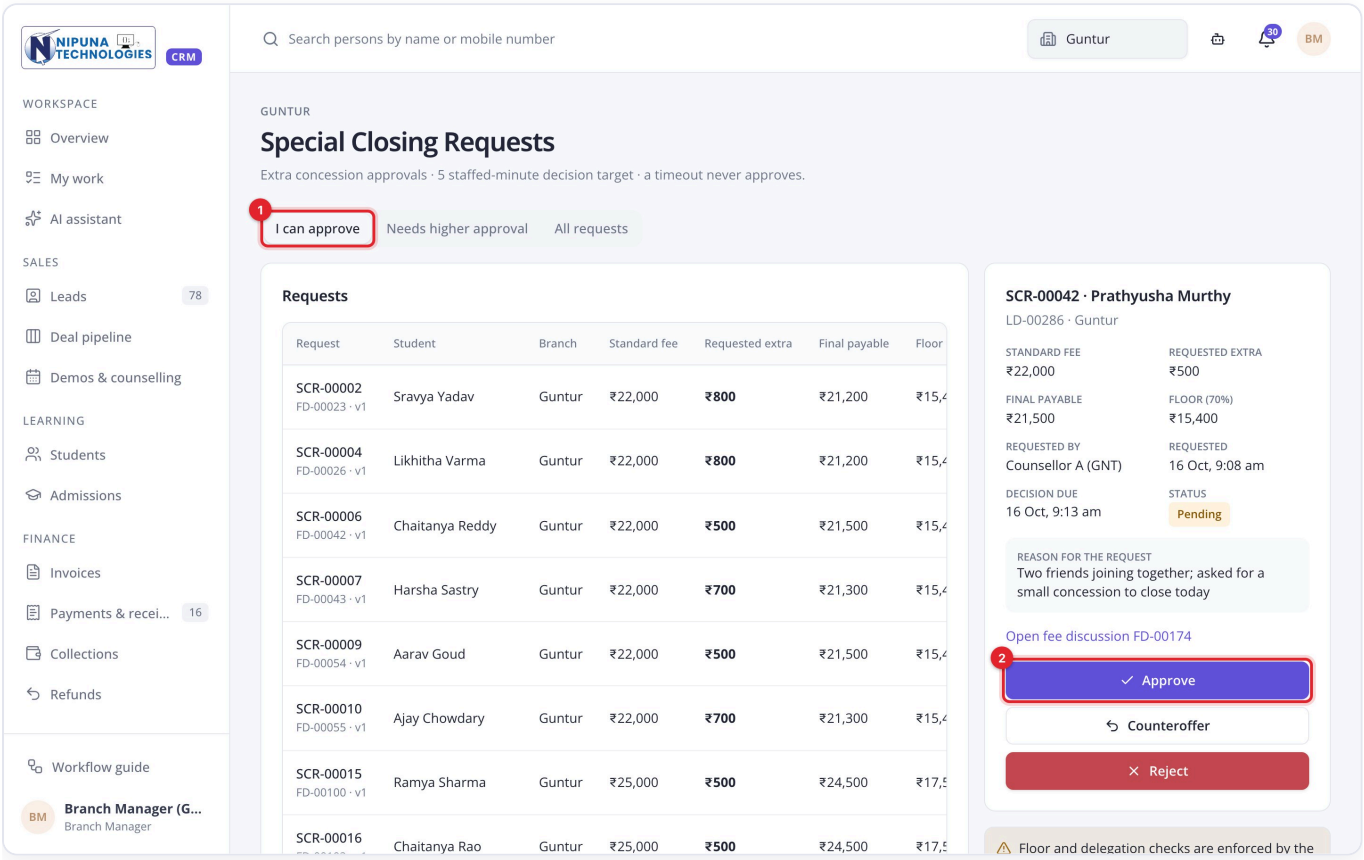

Figure 8 Discount Approvals with a request selected

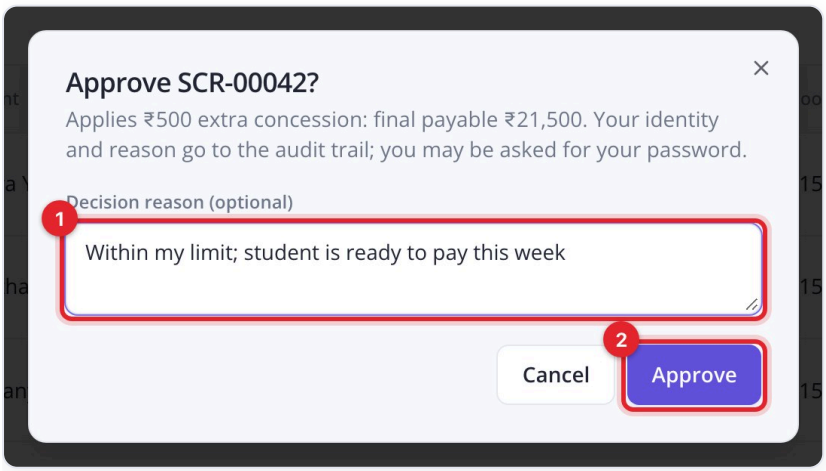

Figure 9 The approve dialog with a reason

RULE Approving needs a fresh password confirmation, and you can never approve a request you raised yourself.

TIP **Counteroffer** lets you offer a lower extra concession instead of a flat yes or no. The counsellor then saves a new version at your amount.

2.4 Reject a request, and what happens above your limit

If the concession is not justified, reject it with a reason. If it is above your limit it is not yours to approve: it goes to the Founder / CEO or Super Admin.

1. Select the request in **Discount Approvals** and click **Reject**.
2. Type a **Reason** 1. It is required and the counsellor sees it. Click **Reject** 2 and confirm with your password.
3. Open the **Needs higher approval** tab 1. Requests above your limit sit here for the Founder / Super Admin; you can read them but the system will not let you approve them.

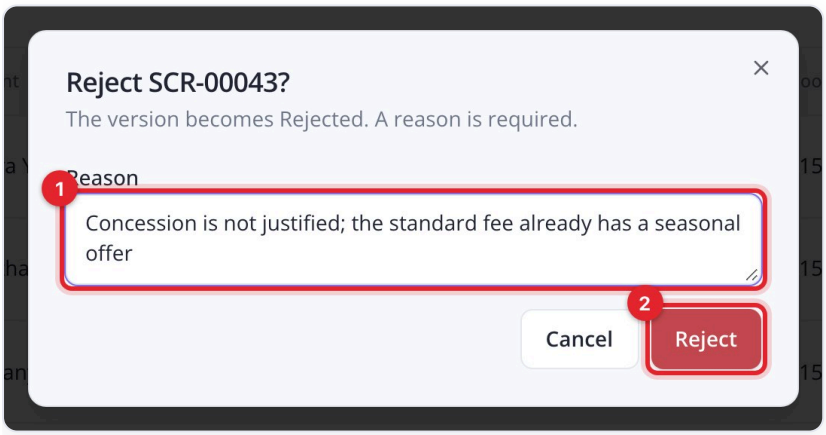

Figure 10 Rejecting with a reason

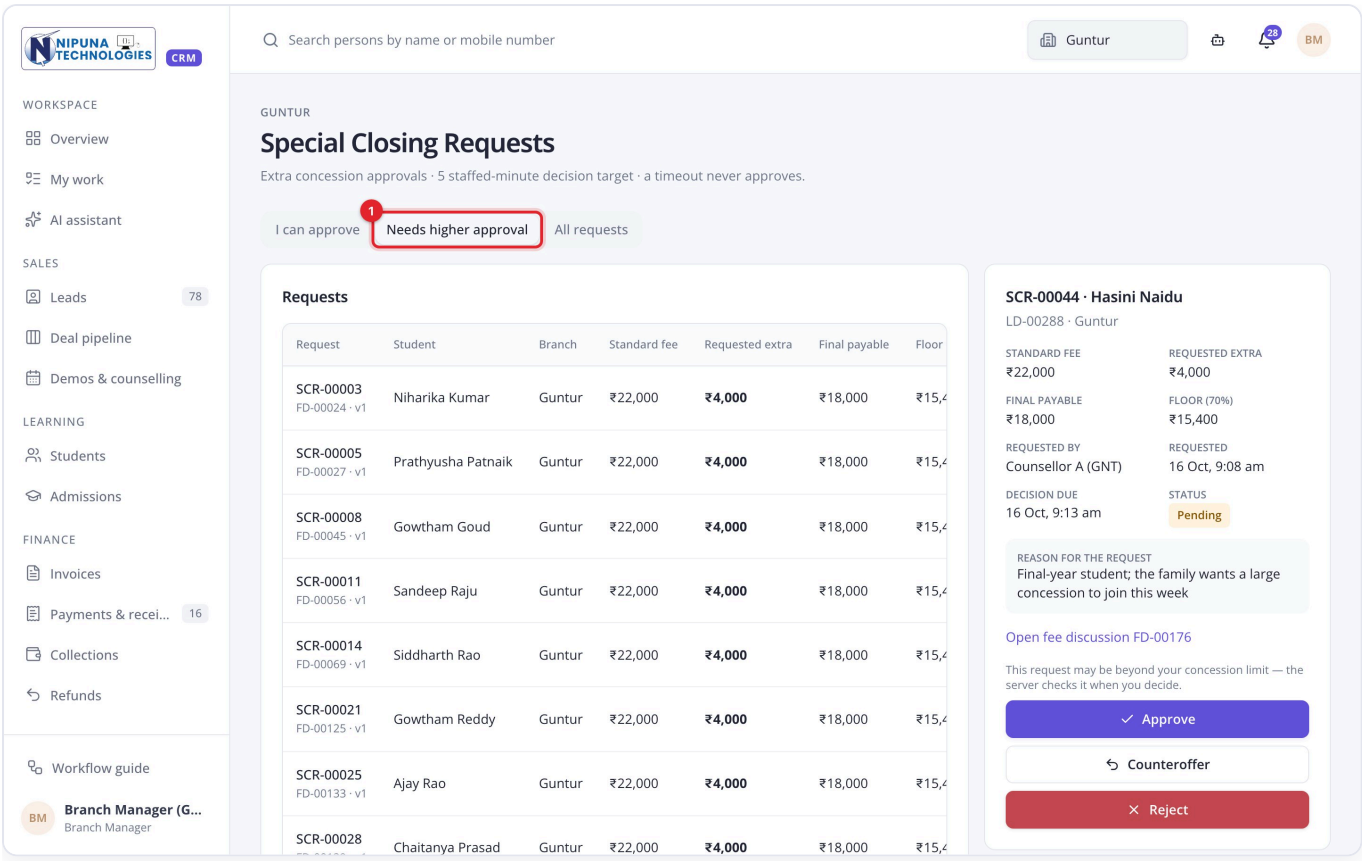

Figure 11 A request above your limit: Needs higher approval

> **RULE** Your limit is the **lower of 5% or ₹1,000** of the standard fee. A request that is bigger than this, or that is not decided within 5 staffed minutes, escalates to the Founder / CEO or Super Admin automatically.

> **TIP** A price below 70% of the standard fee always needs the Founder / Super Admin plus a second independent approver, whatever the amount.

2.5 Watch the pipeline and change a card's owner

The **Deal pipeline** shows every deal in your branch by stage. Only managers can change who owns a card, for example when a counsellor is away or overloaded.

1. Open **Deal pipeline**. The stage chips (1) show how many deals are at each stage. Use **Owner**, **Priority** or the search box to narrow the board.
2. Find the card and click the small **Manage** icon (1 in the next screen).
3. Choose the **Owner** (1) and, if needed, set the **Next follow-up**. Click **Save** (2).
4. The card now shows its new owner at the bottom.

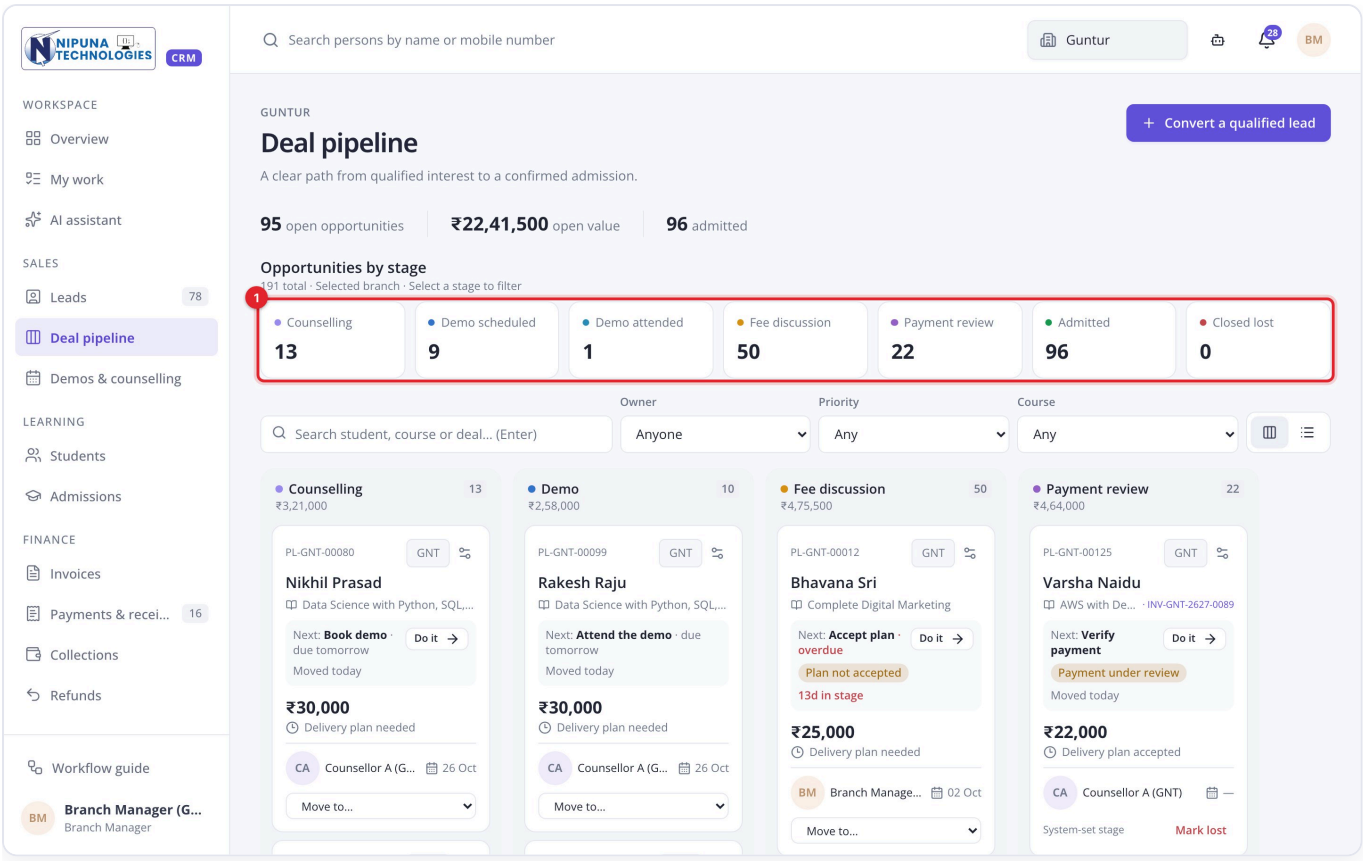

Figure 12 The Deal pipeline board for your branch

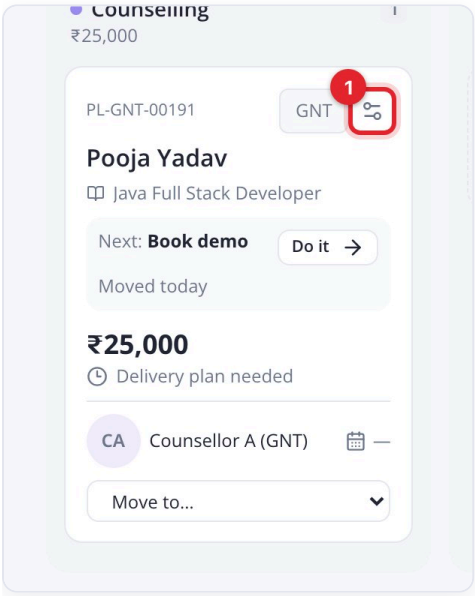

Figure 13 Searching for a card and its Manage icon

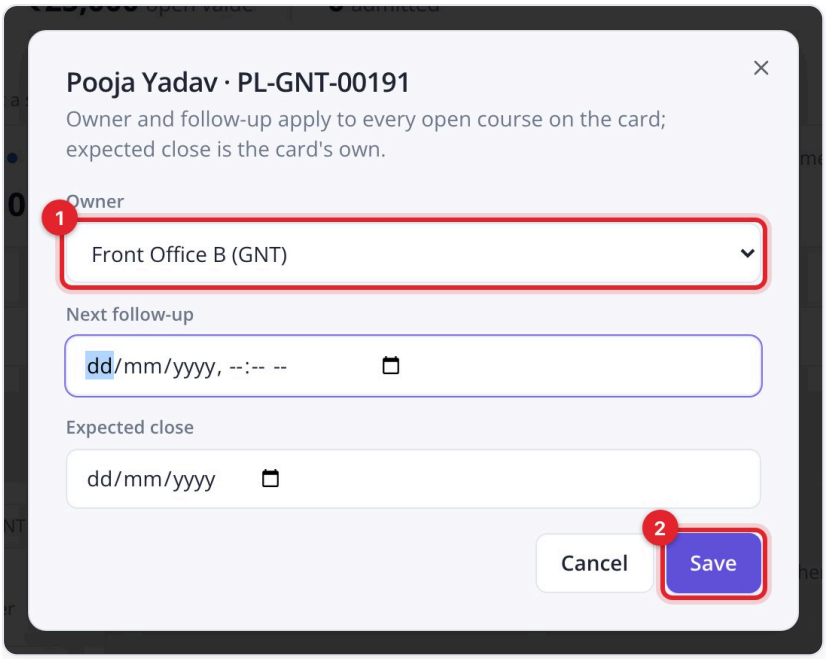

Figure 14 Changing the card owner

> **RULE** A counsellor can move a card's follow-up but not its owner: the dialog tells them "only a branch manager can change it".

2.6 Reactivate a lost lead and clear a stop-contact flag

Two things only a manager can undo. A lost lead can come back if the learner is interested again. A stop-contact flag blocks all outreach until the learner asks to be contacted.

1. Open the lost lead (find it in **Leads** with **Lead status** set to **Inactive** or **All**). Its stage shows **Lost - closed**.
2. Click **Reactivate** 1. Choose the stage to **Return to** (1 in the next screen) and an optional next follow-up. Click **Reactivate** 2.
3. For a stop-contact flag, open the lead. A warning 1 tells you since when and why. Click **Clear** 2, type the reason 1 and click **Clear stop contact** 2.

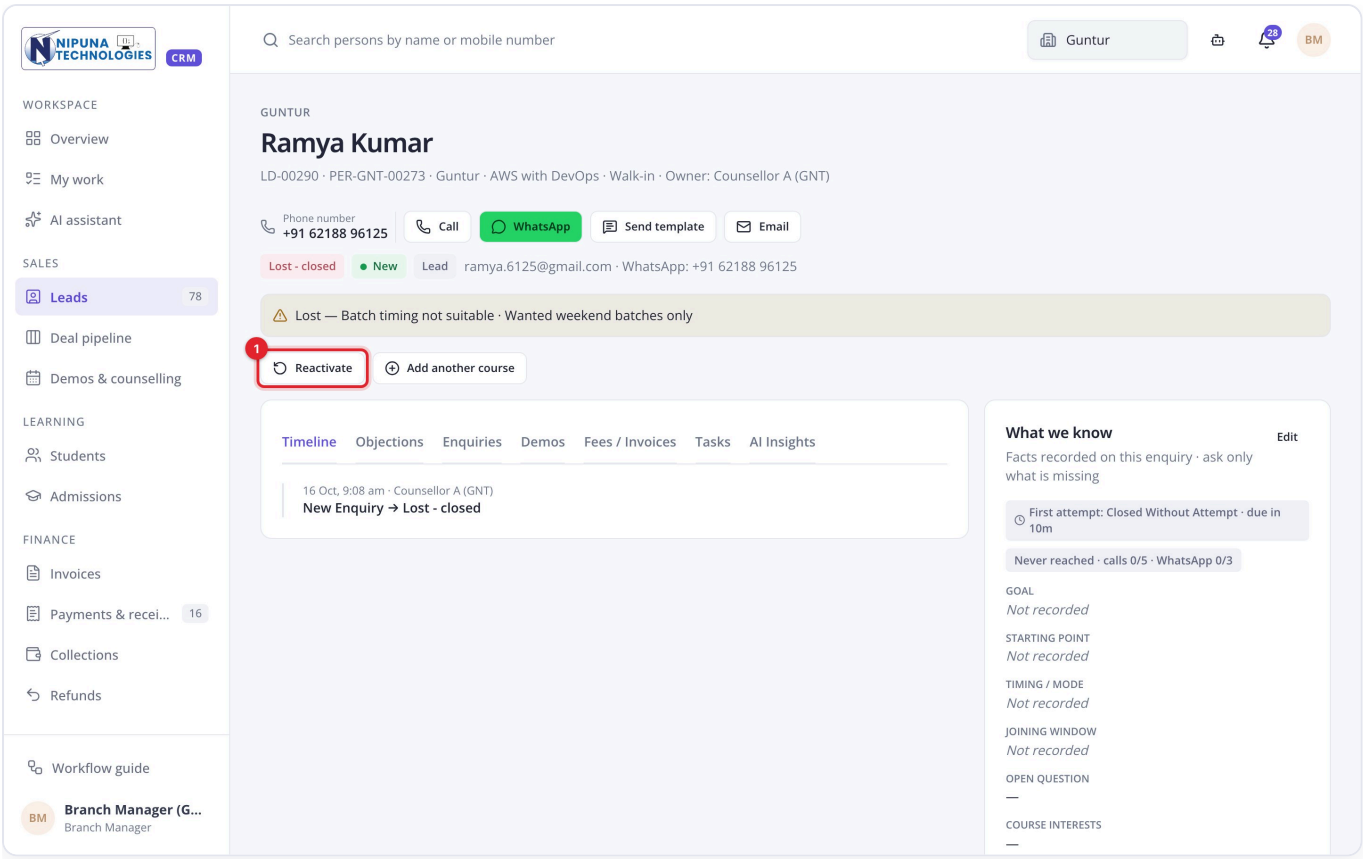

Figure 15 A lost lead, with the Reactivate button

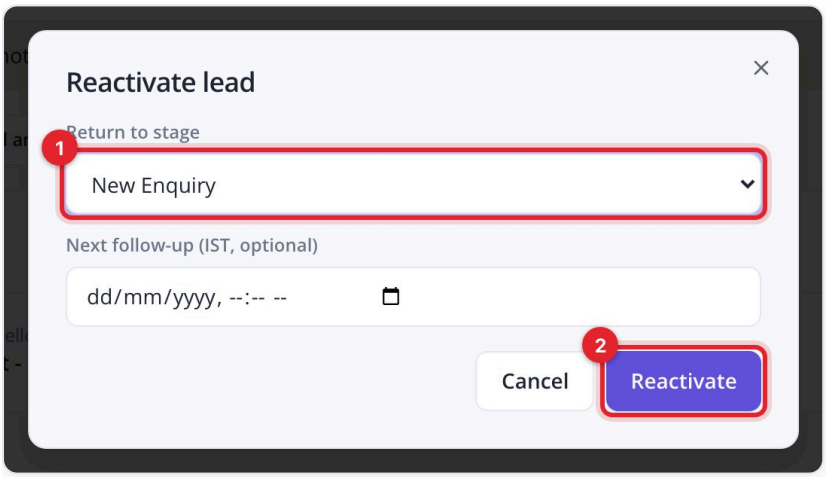

Figure 16 Choosing the stage to return to

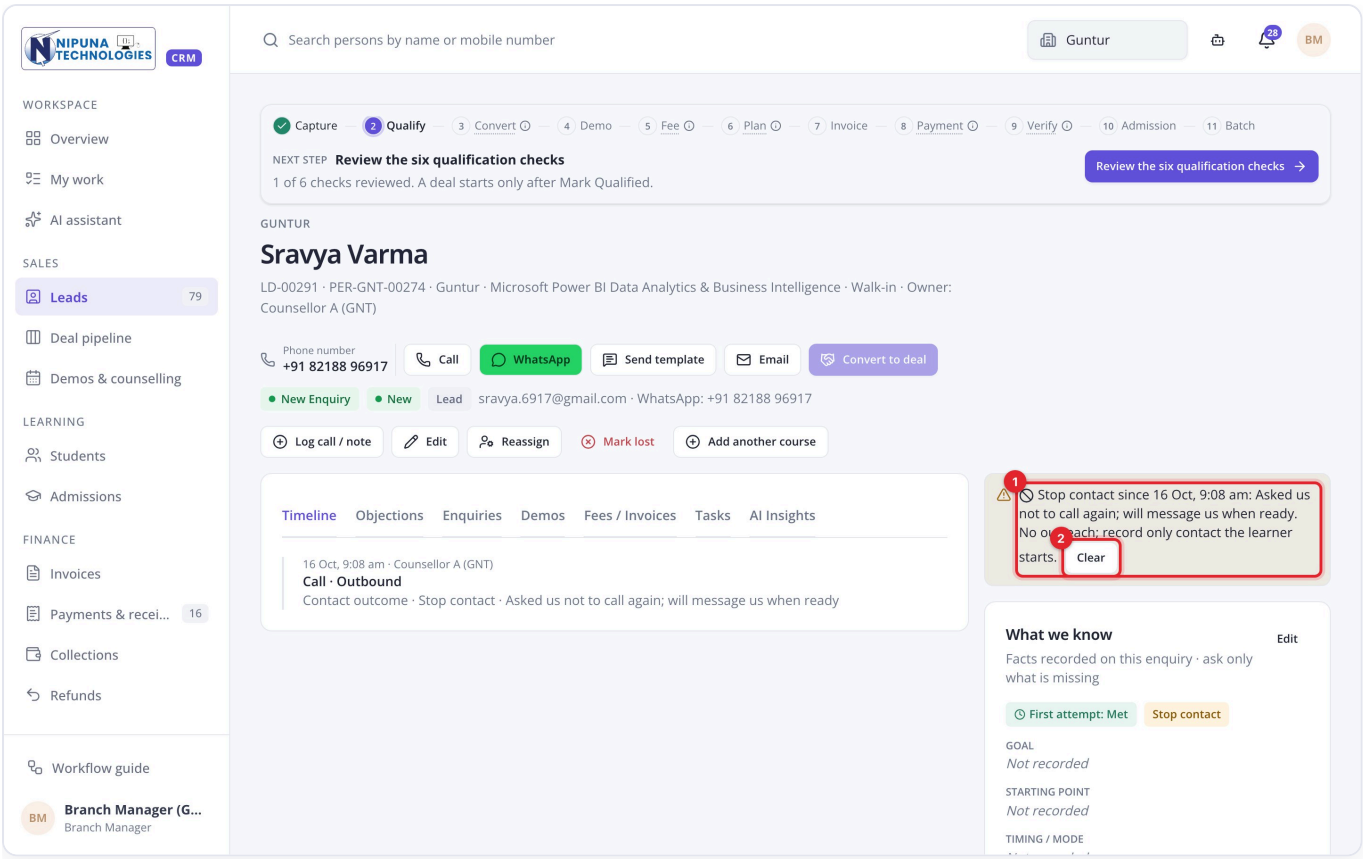

Figure 17 A lead with a stop-contact flag

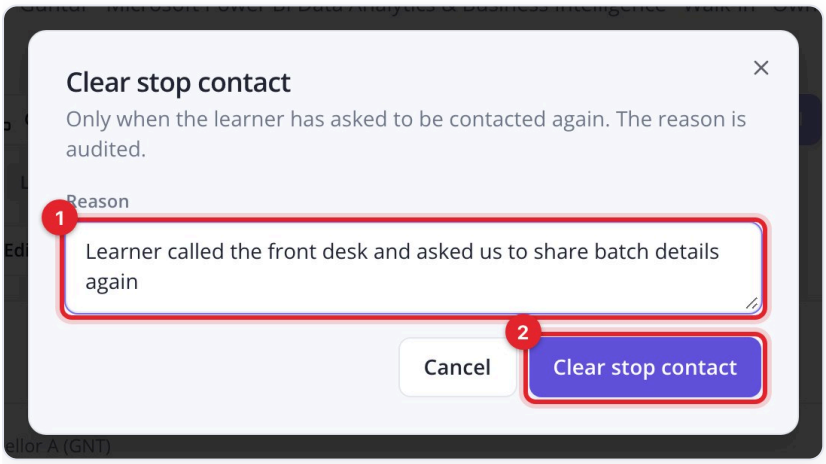

Figure 18 Clearing the flag with a reason

> **RULE** Clear a stop-contact flag only when the learner has asked to be contacted again. The reason is kept in the audit trail.

2.7 Cancel or transfer an admission

After a learner is admitted, a manager may have to cancel the admission (for example the learner relocates) or move it to the other branch. Both are manager-only actions and both need a reason.

1. Open **Admissions** and click the admission. The **Admission detail** sheet opens.
2. To cancel, click **Cancel admission** 1. Type the **Cancellation reason** 1 and click **Cancel admission** 2.
3. To move it to another branch, click **Transfer** on the same sheet. Choose **To branch** 1, write the **Transfer reason** 2 and click **Save** 3.

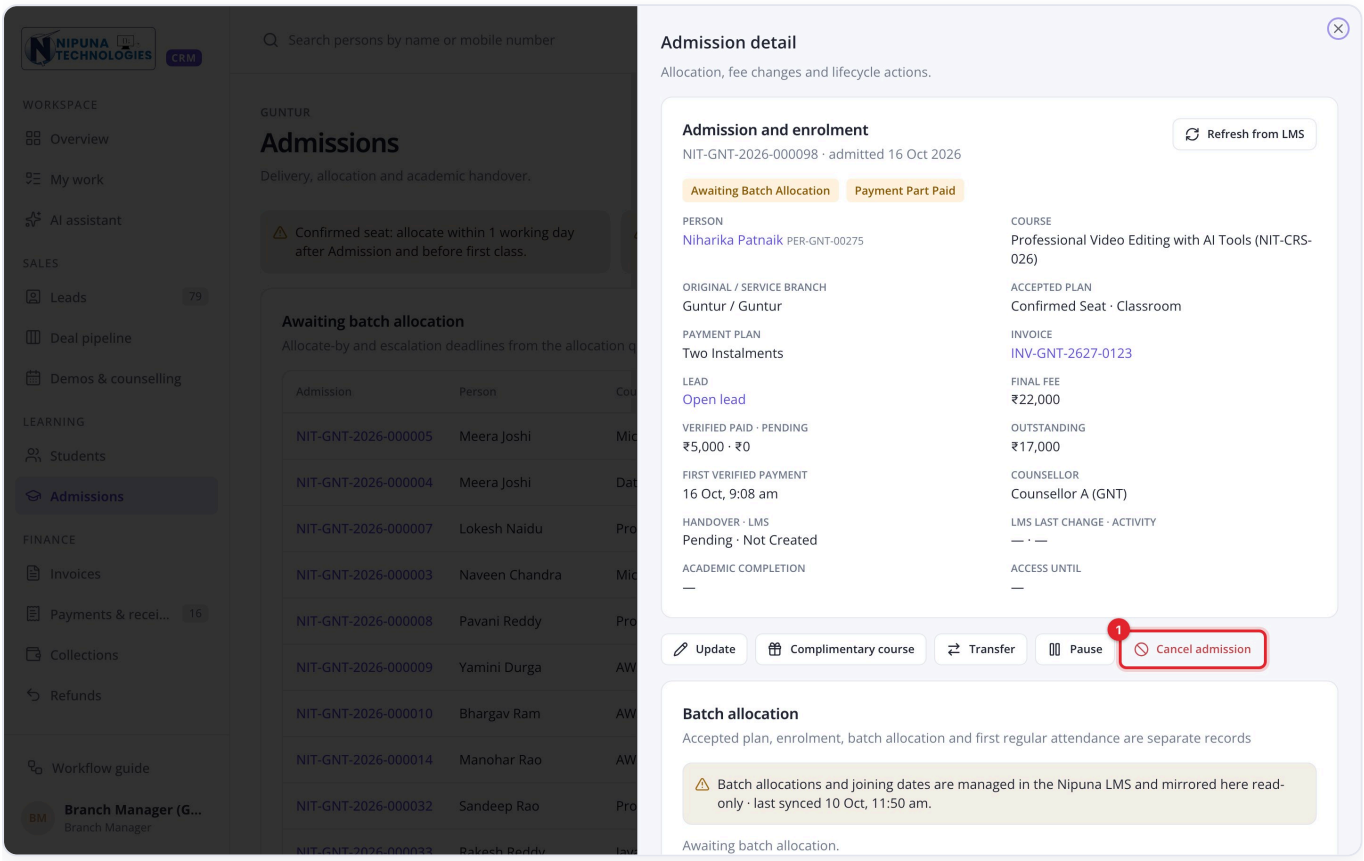

Figure 19 The admission sheet with Cancel admission

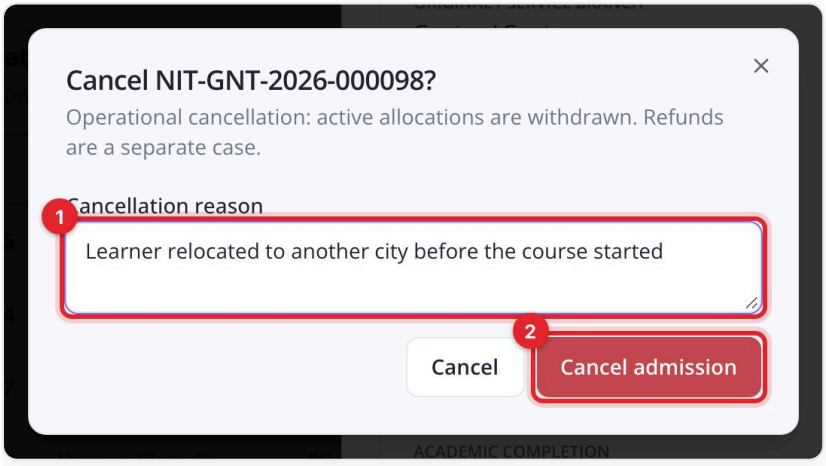

Figure 20 Cancelling with a reason

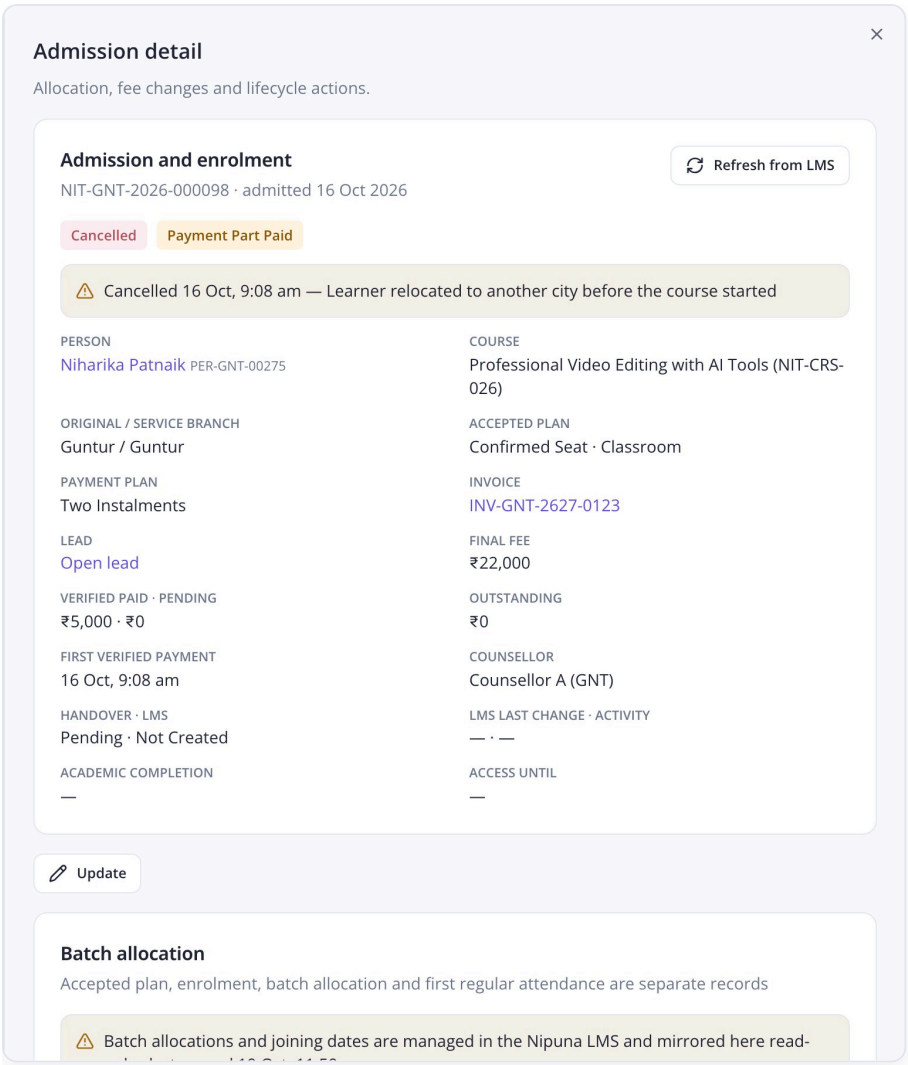

Figure 21 The admission now shows as Cancelled

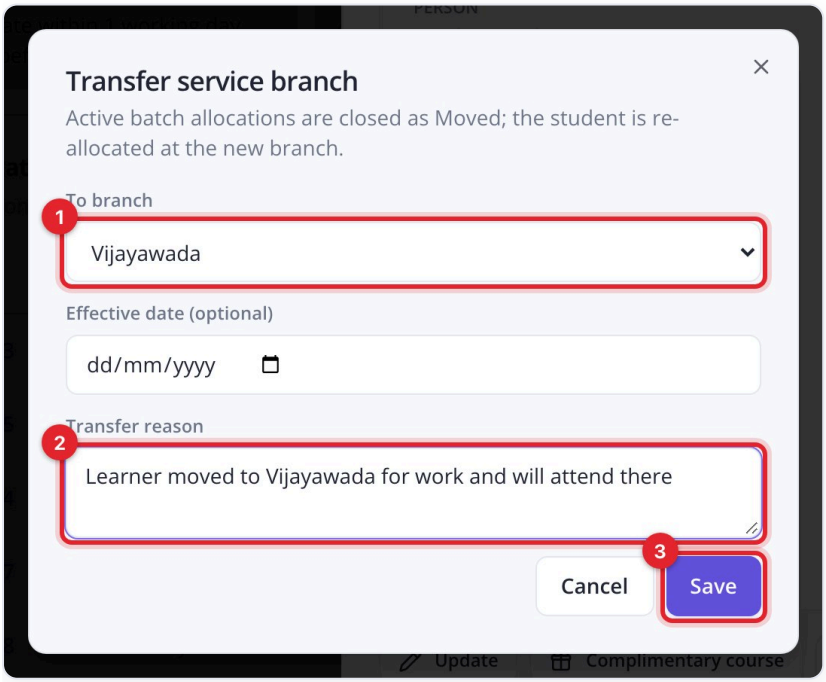

Figure 22 Transferring to the other branch

> **TIP** A transfer keeps the original branch on record. **Pause** and **Resume** on the same sheet are for a learner who has to wait (exams, health, travel).

> **RULE** Academic work (batches, allocations, joining) is run in the LMS for now.

2.8 Follow the money: payments, collections and refunds

Accounts verifies payments, but as the Branch Manager you need to see what is coming in, what is overdue, and you can open a refund case when a learner asks for money back.

1. Open **Payments & receipts** (1 in the first screen). You see the branch ledger with receipts and status; verification buttons belong to Accounts.
2. Open **Collections** (1 in the second screen) to see what is due, overdue or promised, and follow up with the counsellor.
3. Open **Refunds** and click **Register refund case**. Find the admission 1, tick the receipts 2, give a reason 3 and click **Register case** 4.
4. Add your **Assessment notes** 1 and click **Save assessment** 2. The Founder / Super Admin decides and Accounts pays out.

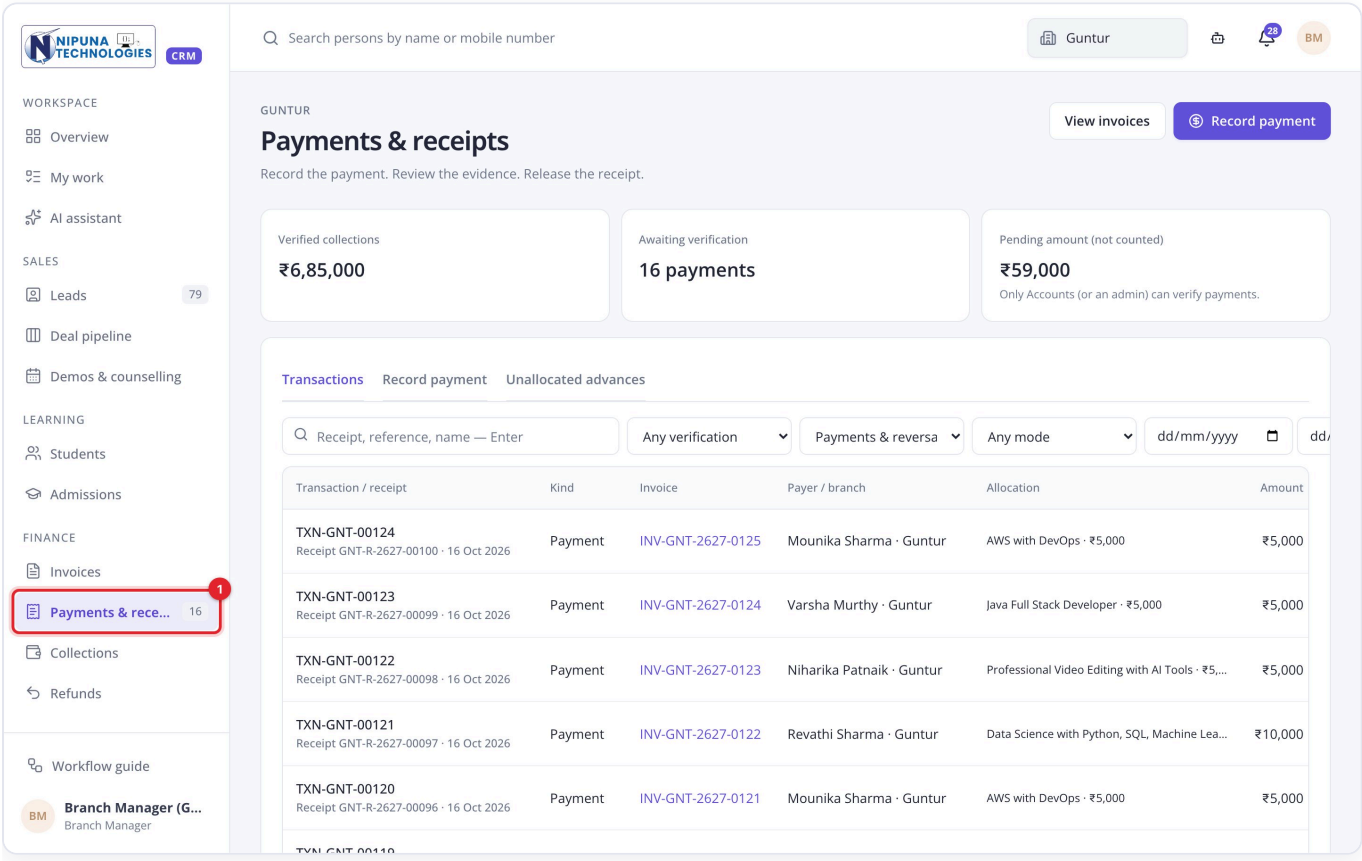

Figure 23 Payments & receipts: the branch ledger

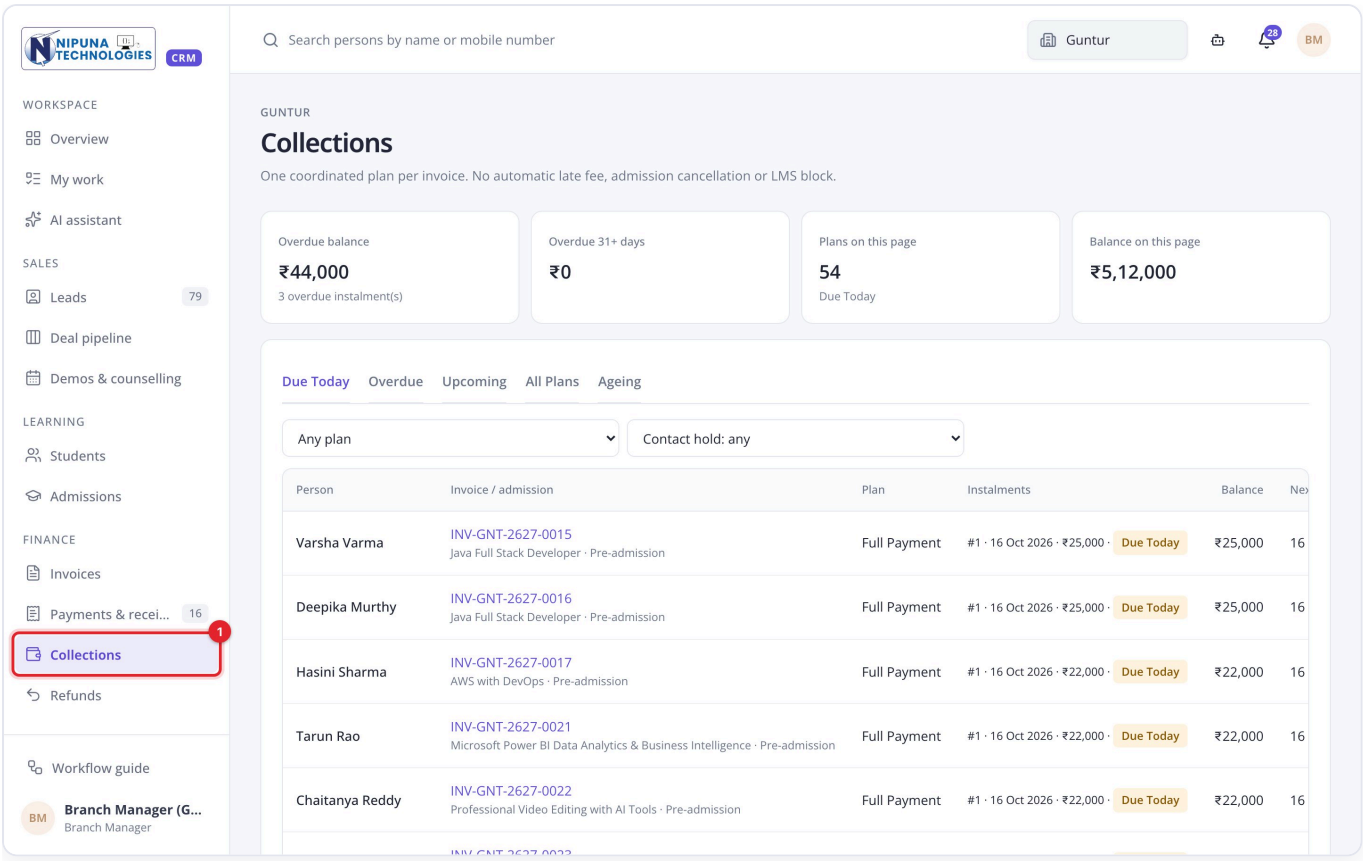

Figure 24 Collections: what is due and overdue

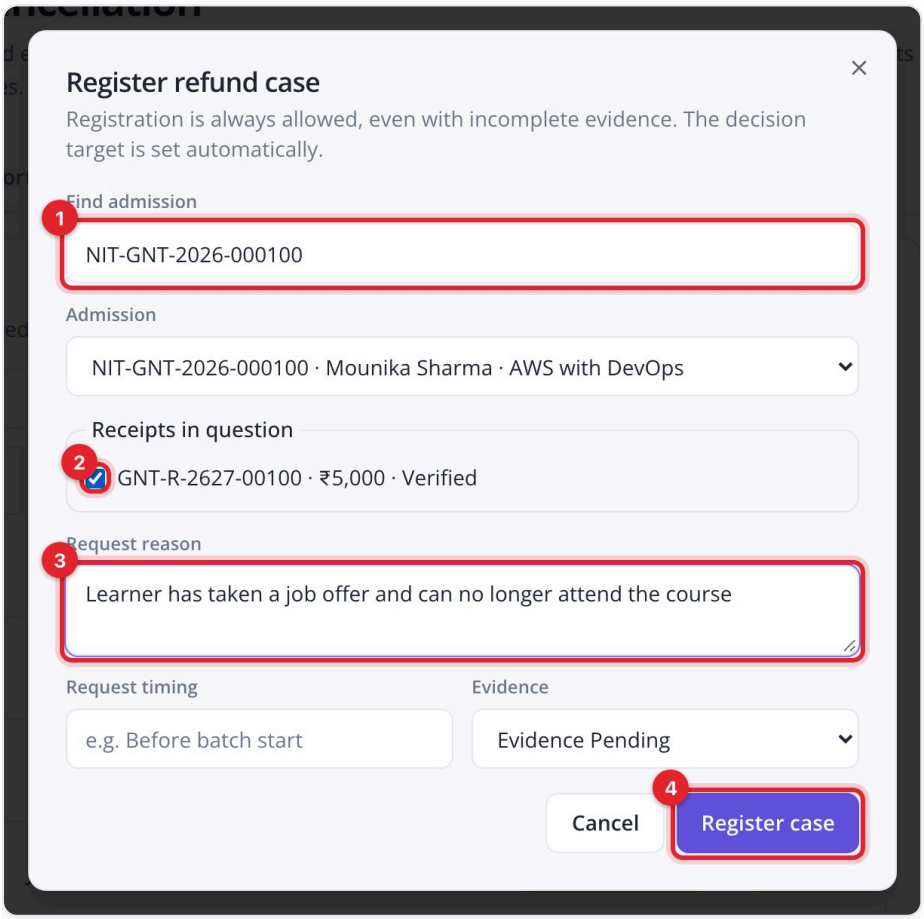

Figure 25 Registering a refund case

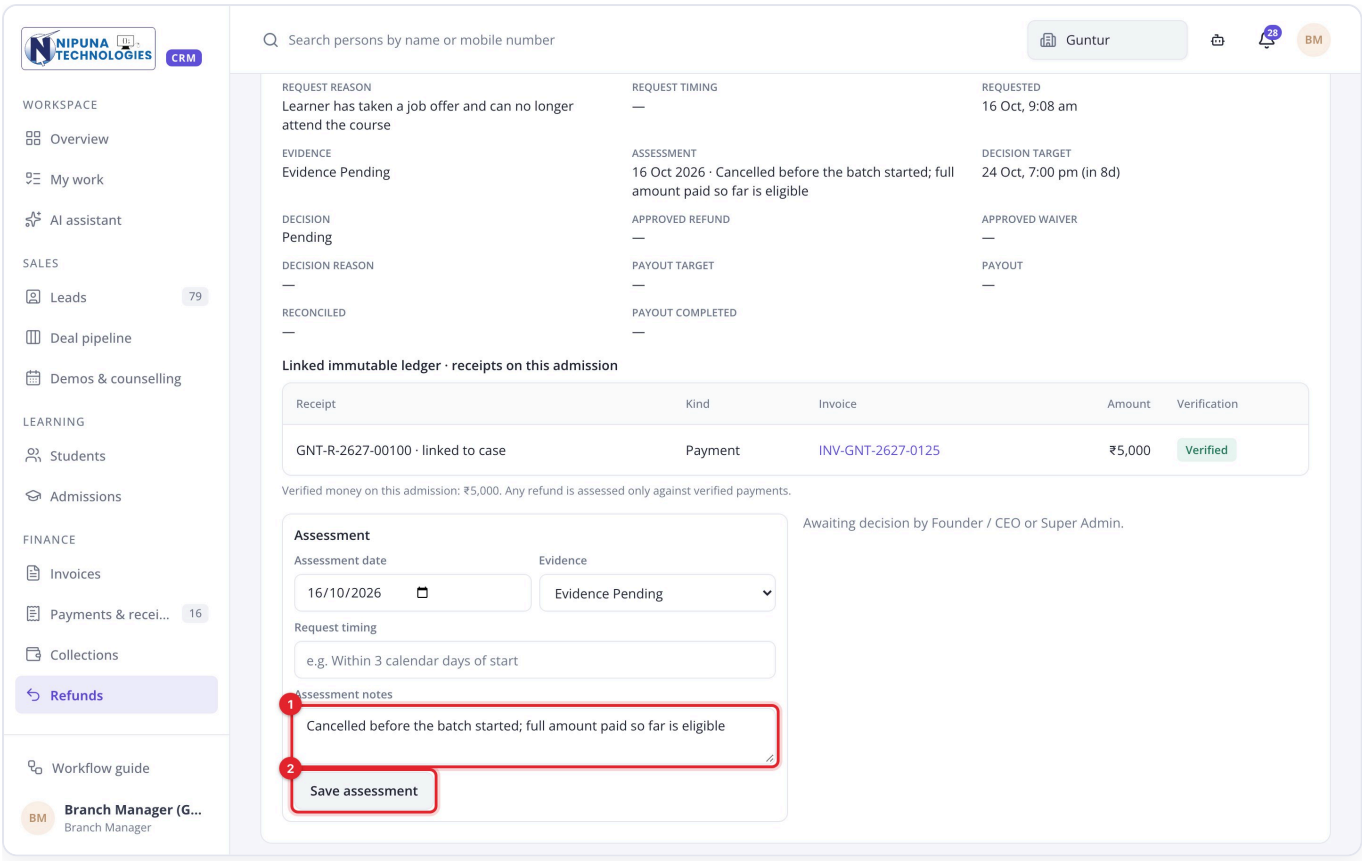

Figure 26 The case after assessment: waiting for the Founder / Super Admin

> **RULE** You open and assess refund cases but you cannot decide them: the Founder / CEO or Super Admin decides, then Accounts pays out. A refund is never more than what was verified as paid.

2.9 Reports, Target Master and Offer Master

Use these to see how the branch is doing against its targets and which offers are running. For you, Target Master and Offer Master are read-only.

1. Open **Reports**. Use the period buttons (1, 2) such as **This Month** and **Last Month**, and the filters to narrow down.
2. Open **Target Master** from **More** to see the targets set for your branch and your current achievement.
3. Open **Offer Master** from **More** to read offers, their scope and complimentary courses. There is no **New offer** button for you: offers are created and activated by the Founder / CEO or Super Admin.

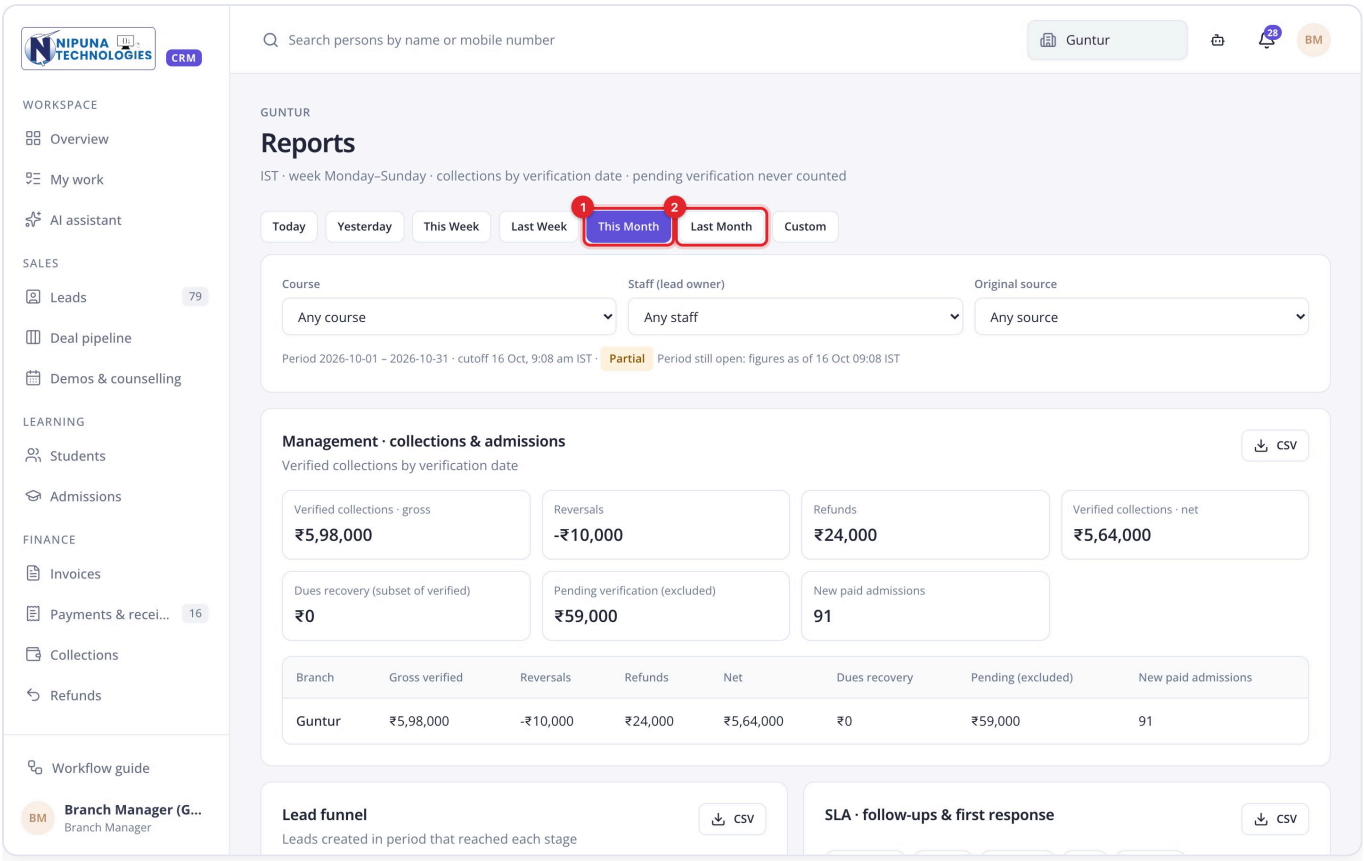

Figure 27 Reports for your branch

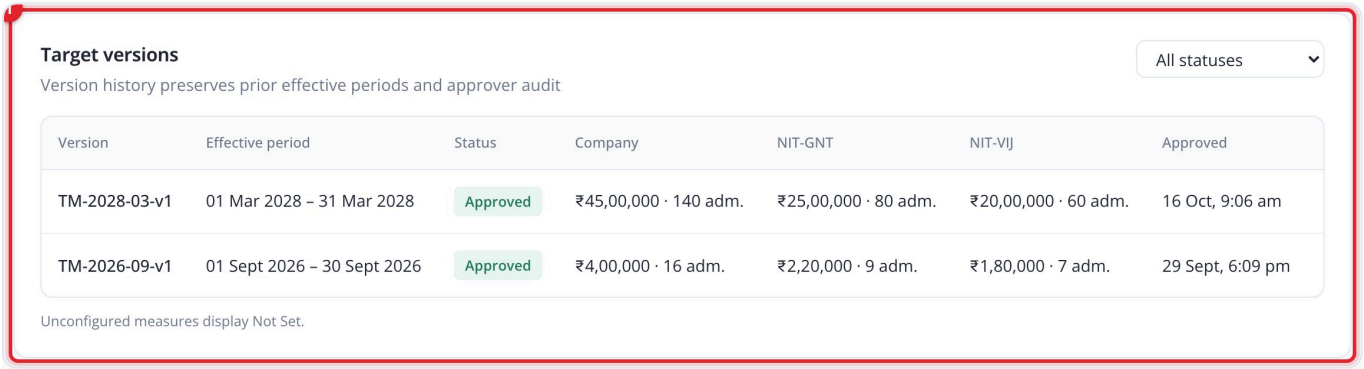

Figure 28 Target Master (read-only): the approved target versions

> **TIP** Targets and offers are created and approved by the Founder / CEO or Super Admin. If you think one needs changing, ask them.
