NIPUNA CRM · PRODUCT GUIDE

Founder / CEO & Super Admin

Final approvals, company-wide visibility and the settings that run the CRM

Edition	**16 October 2026**
Screenshots	**Taken in the development system with sample data (account: founder@nipuna.test · admin@nipuna.test)**
Covers	**5 overview sections · 10 step-by-step workflows**

Contents

PART 1 · YOUR ROLE AT A GLANCE

1.1 What a Founder / CEO and Super Admin does

1.2 Signing in and your home screen

1.3 The menu: what each screen is for

1.4 Rules and limits the system enforces

1.5 A typical day

PART 2 · STEP-BY-STEP WORKFLOWS

2.1 Start your day: Overview and the Founder / CEO Dashboard

2.2 Approve a special closing request above the Branch Manager's limit

2.3 Approve a payment correction requested by Accounts

2.4 Decide a refund case opened by a Branch Manager

2.5 Set and approve targets in Target Master

2.6 Create and activate an offer in Offer Master

2.7 Create a user, grant access and reset a password

2.8 Settings, concession limits, notifications and branch hours (view only)

2.9 Force sign-out, deletion requests and the audit log

2.10 Reports and scheduled reports

How to read the screenshots. Red boxes with numbers 1 2 point at the buttons and fields the steps talk about. Names, phone numbers and amounts are sample data.

PART 1

Your role at a glance

What you can see, what you are responsible for, and the rules the system enforces for you.

1.1 What a Founder / CEO and Super Admin does

You have the same permissions as a Branch Manager, at every branch, plus the final say on money and the keys to the configuration. The Founder / CEO and the Super Admin can do exactly the same things, with one difference: only a Founder / CEO can grant Founder / CEO access or create a recovery account.

- **Final approvals**: special closing requests with no limit, prices below the 70% floor (with a second approver), payment corrections, fee changes after admission, refund decisions, targets and deletion requests.
- **Visibility**: the Founder / CEO dashboard with company totals and a branch comparison, Reports, Target Master and Offer Master.
- **Configuration**: users and their access, settings, branch hours and holidays, dropdown lists, concession limits and notification rules.
- **Control**: active sessions (force sign-out), integrations and incidents, scheduled reports and the audit log.

> **RULE** Admins are exempt from the usual self-approval and separation blocks (for example, you may approve a fee change you requested and pay out a refund you decided). Your own requests are still recorded in the audit log.

1.2 Signing in and your home screen

After signing in you land on the **Workspace overview**, whose **Performance** tab is the Founder / CEO Dashboard. Sign in with your work email and password; this guide uses two accounts, the Founder for approvals and dashboards and the Super Admin for the Admin / Settings screens, which behave the same for both roles.

1. Open the CRM, type your work email 1 and password 2 and click **Sign in** 3.
2. You arrive on the **Workspace overview**. The **Overview** tab 1 shows your next actions; the **Performance** tab 2 is the Founder / CEO Dashboard with company KPIs, a branch comparison, the lead funnel and progress against target.
3. Sensitive actions later ask for your password once more if you last typed it more than 15 minutes ago.

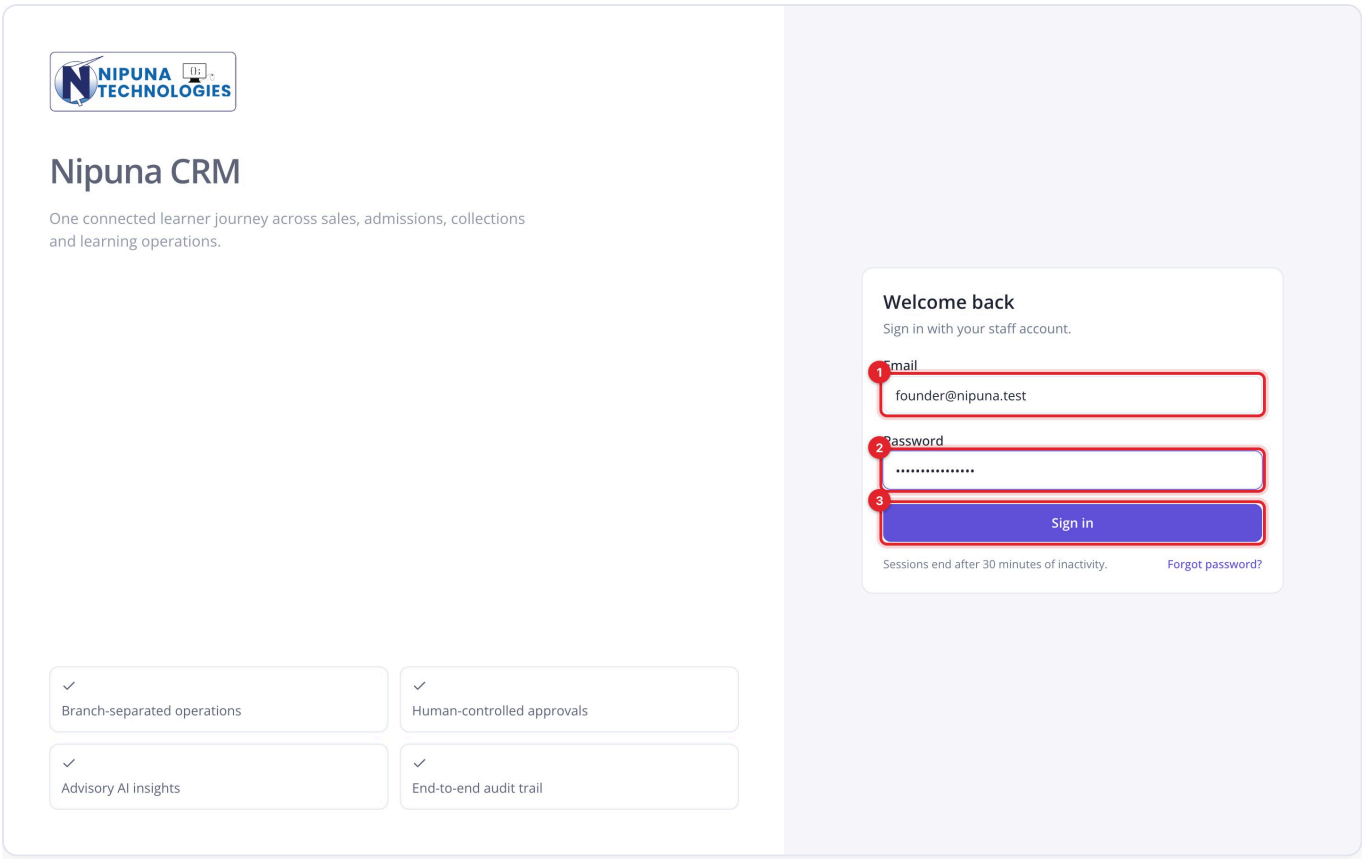

Figure 1 The sign-in screen

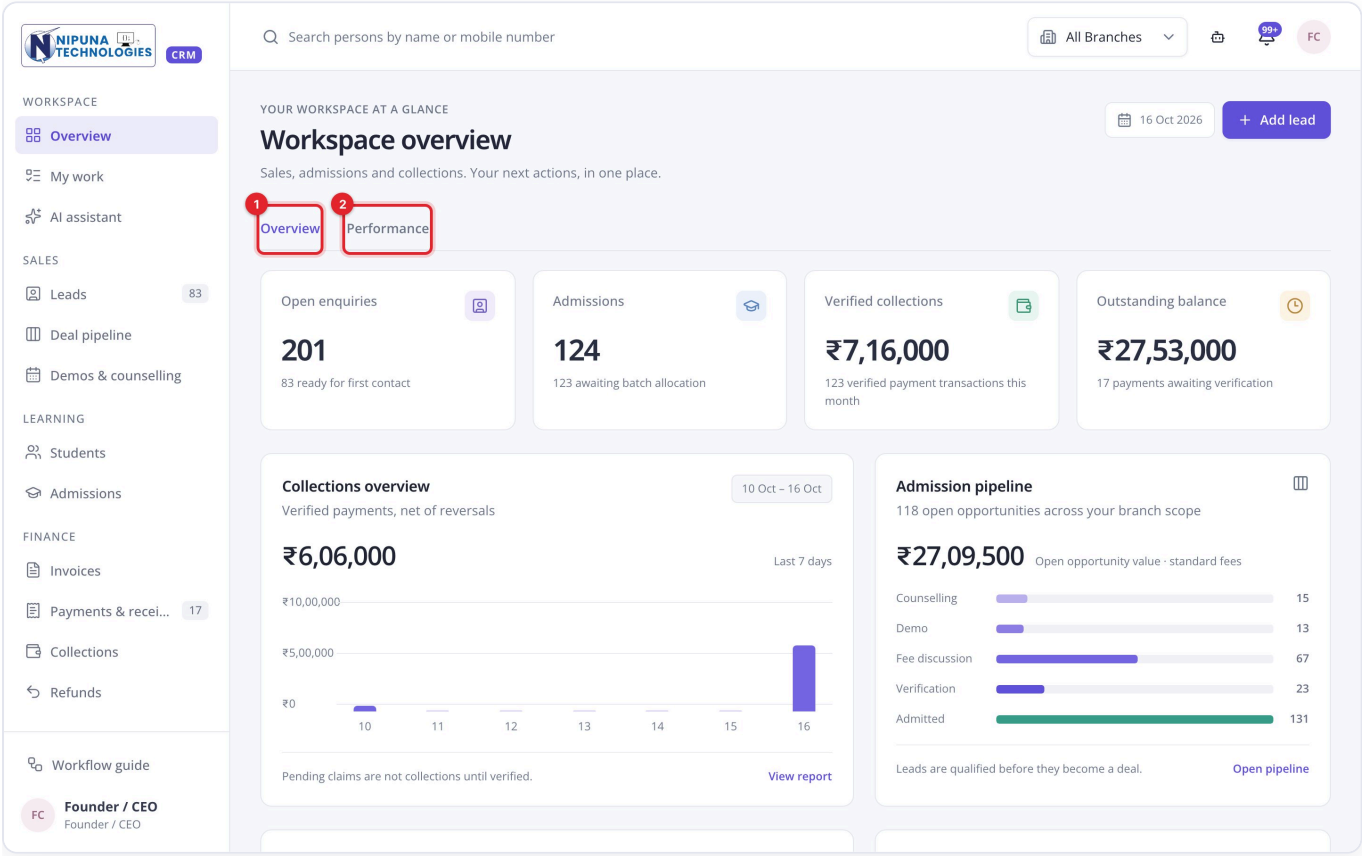

Figure 2 The Workspace overview after sign-in

1.3 The menu: what each screen is for

The left menu is grouped by area. You see every screen a Branch Manager sees, plus **Admin / Settings** at the bottom of the **More** group. Screens that are not used yet (batches, waiting for batch, LMS access and placement) are hidden.

Menu group / screen	What you use it for
Workspace: **Overview**, **My work**	The Founder / CEO Dashboard and your own to-do list, including approvals waiting for you.
Sales: **Leads**, **Deal pipeline**, **Demos & counselling**	Look at any branch's leads and deals; step in when a branch needs help.
Learning: **Students**, **Admissions**	Student 360 and admissions across both branches.
Finance: **Invoices**, **Payments & receipts**, **Collections**, **Refunds**	The money. Payment corrections are approved in **Payments & receipts**; refund decisions are made in **Refunds**.
Operations: **Tasks**, **Communications**, **WhatsApp messages**, **Reports**	Team tasks, the inbox, outgoing messages and management reports with scheduled delivery.
More: **Discount Approvals**, **Offer Master**, **Target Master**, **Course Master**, **Admin / Settings**	Approvals above the Branch Manager's limit, the masters and every system setting.

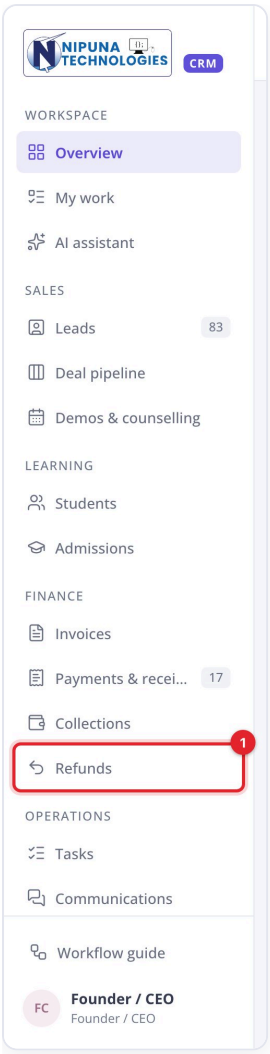

Figure 3 The left menu, grouped by area

1.4 Rules and limits the system enforces

Rule	What it means for you
No approval limit	You can approve any extra concession. Below **70% of the standard fee** the system also needs a second independent approver.
Two-person rule	Nobody approves their own request. As an admin you are exempt from self-approval and separation blocks, so you may approve a fee change you requested or pay out a refund you decided.
Fresh password	Approving special closing, payment corrections, refunds and targets, activating offers, changing settings and creating or resetting users all ask for your password if you last typed it more than **15 minutes** ago.
Original records are never edited	A payment correction adds a linked reversal entry; the original payment stays. Lookup values are deactivated, never deleted.

Rule	What it means for you
Decision time	A special closing request waits 5 staffed minutes with the Branch Manager, then escalates to you. A timeout never approves.
Targets	Only approved targets count. A new approved version replaces the overlapping one and keeps the history.

1.5 A typical day

1. Open **Overview** and its **Performance** tab, the Founder / CEO Dashboard: collections, admissions, the branch comparison and the AI management brief.
2. Open **My work** and **Discount Approvals** for anything escalated to you.
3. In **Payments & receipts**, approve or reject payment corrections raised by Accounts.
4. In **Refunds**, decide the cases that managers have assessed.
5. Look at **Reports** for the week and let scheduled reports reach you by email.
6. When the business changes, adjust **Target Master**, **Offer Master** or a user's access in **Admin / Settings**.

PART 2

Step-by-step workflows

Your main daily tasks, one at a time, with the screen you will see at each step.

2.1 Start your day: Overview and the Founder / CEO Dashboard

Do this first. It shows how the whole company is doing and how the two branches compare, before you open any approval queue.

1. Open **Overview** 1 from the menu and click the **Performance** tab 2. The **Branch scope** selector 3 at the top is set to **All Branches**; choose one branch to narrow the page.
2. Choose a period with the buttons 4, for example **This Month** or **Last Month**. Every figure refetches for that period.
3. Click a KPI tile such as **Genuine Enquiries** to open the matching list.
4. Scroll to **Branch comparison**, the lead funnel and progress against target.

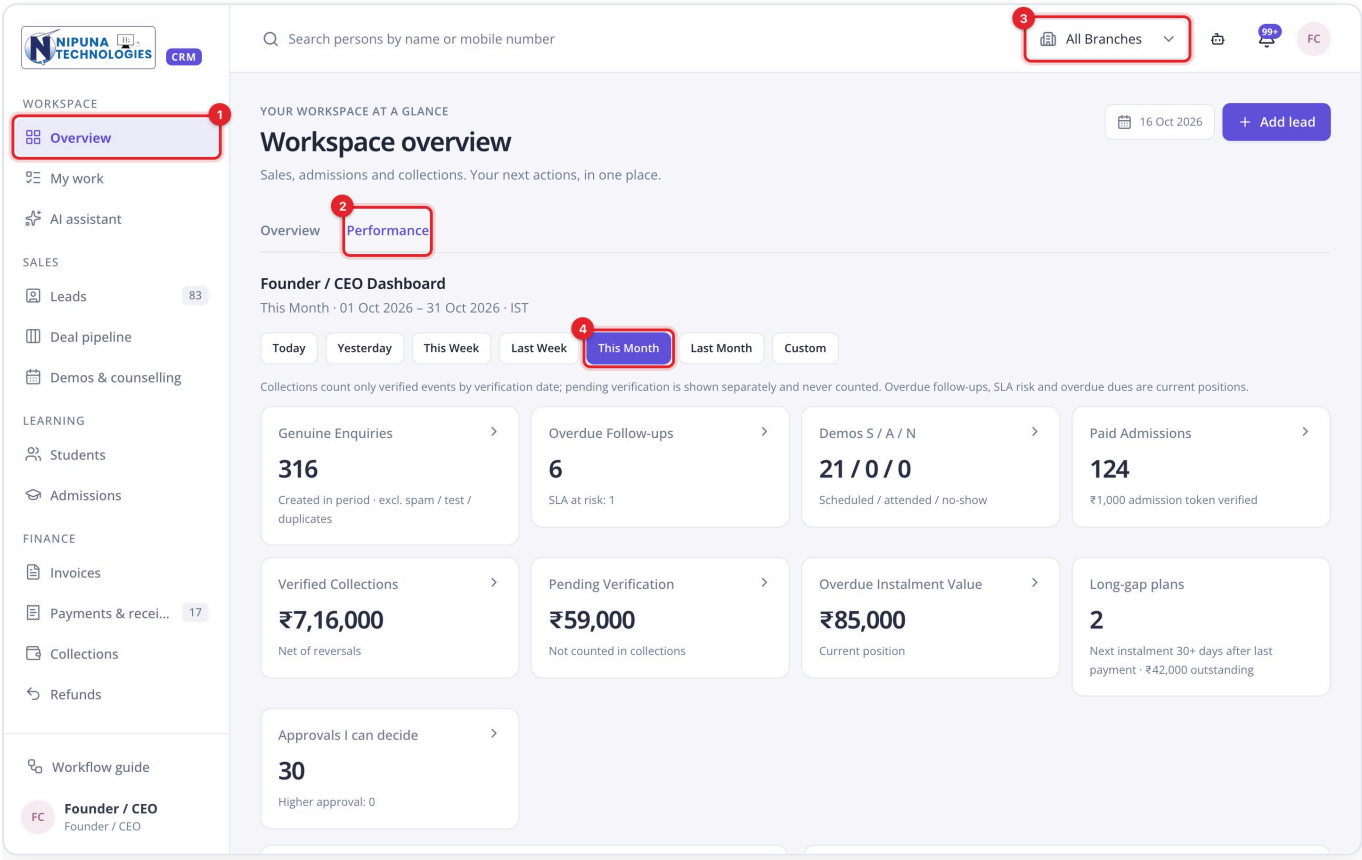

Figure 4 Company KPIs and the period buttons

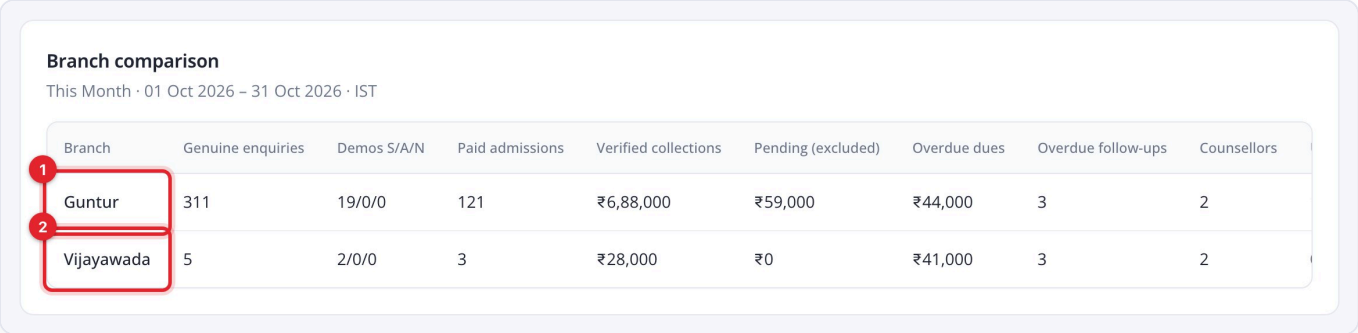

Figure 5 Branch comparison: both branches side by side

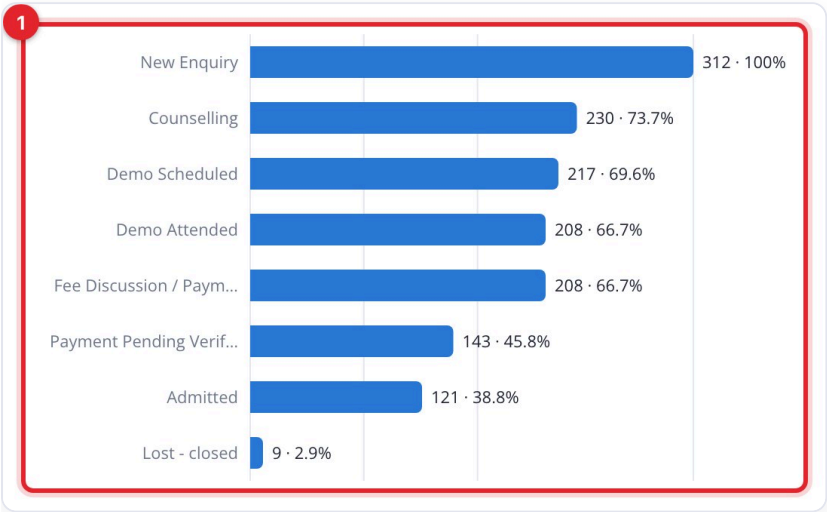

Figure 6 The lead funnel by stage

> **TIP** The **AI Management Brief** on the dashboard is advisory: it summarises recorded facts and lists what evidence is missing. Use the **Helpful** or **Missing Context** buttons to tell the team how useful it was.

2.2 Approve a special closing request above the Branch Manager's limit

A counsellor asks for an extra concession to close a sale. Branch Managers decide requests up to the lower of 5% or ₹1,000; anything above that, or anything a Branch Manager has not decided within 5 staffed minutes, comes to you.

1. Open **Discount Approvals** 1 under **More**. The **I can approve** tab lists what you may decide.
2. Click the request 2 to read its terms: standard fee, requested extra concession, final payable and the counsellor's reason.
3. Check the **Floor (70%)** marker. Below the floor a second independent approver is needed as well.
4. Click **Approve** 3. In the dialog, add a decision reason 1 and confirm with **Approve** 2.

5 Type your password when asked. The request becomes **Approved** and the fee version is approved, so the counsellor can issue the invoice.

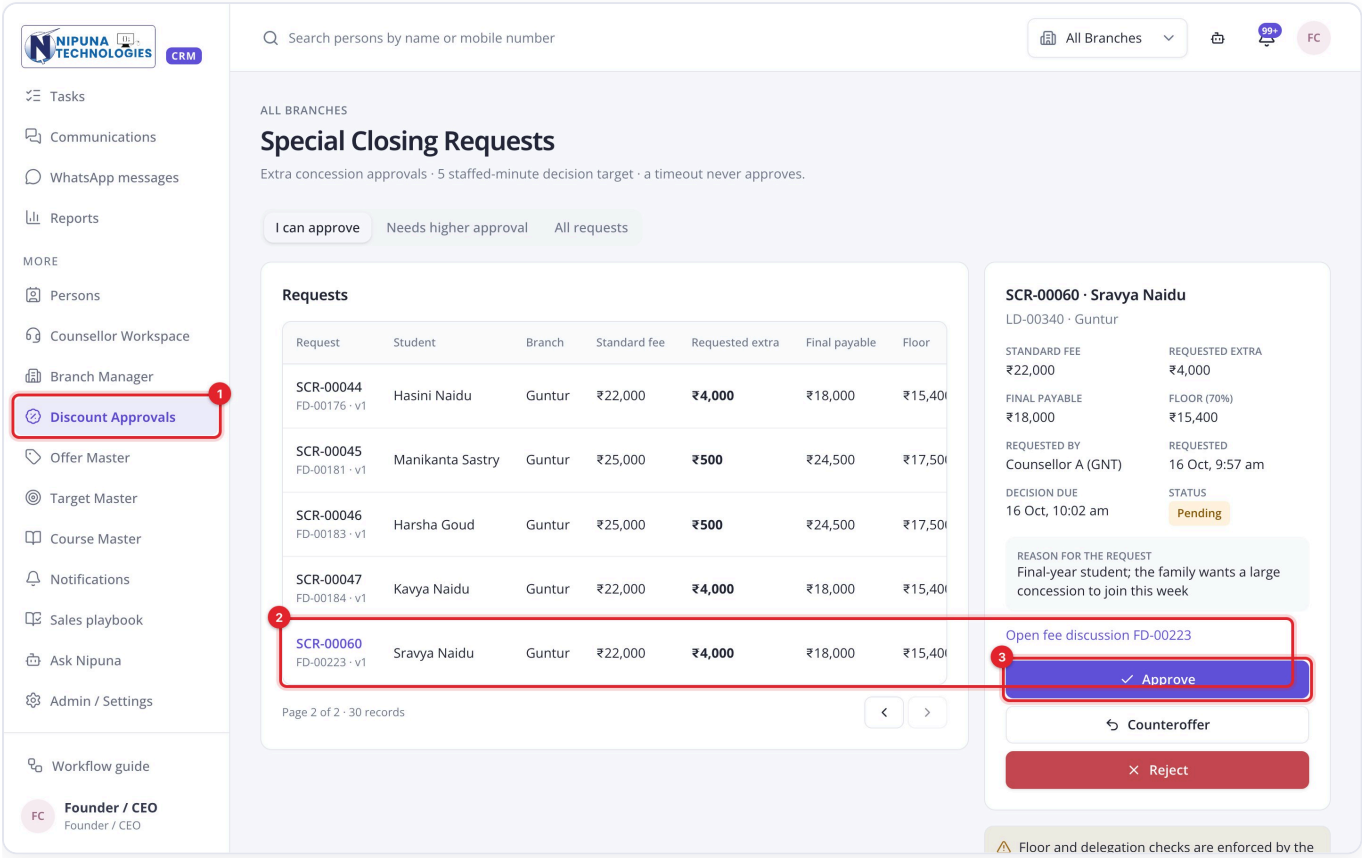

Figure 7 Discount Approvals with the request open

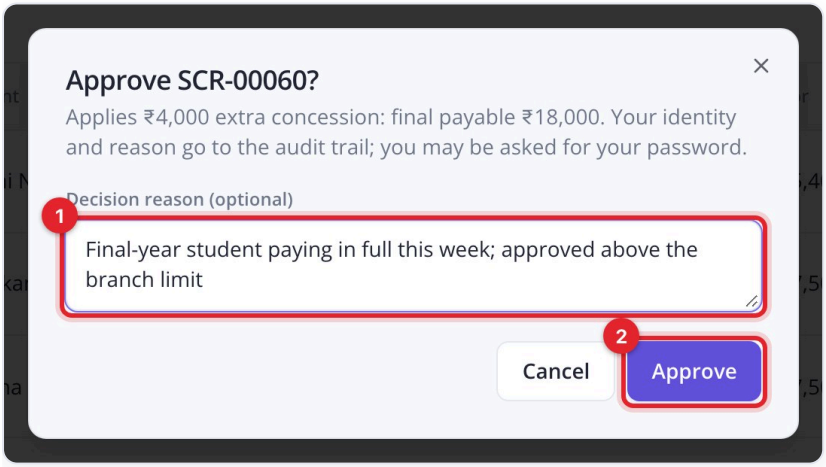

Figure 8 The approve dialog

> **RULE** **Counteroffer** lets you offer a smaller extra concession instead of a flat yes or no. **Reject** needs a reason that the counsellor sees.

2.3 Approve a payment correction requested by Accounts

Accounts finds a mistake in a verified payment and asks for a correction. The original payment is never edited: when you approve, the system adds a linked reversal entry. Accounts cannot approve its own request, so it comes to you.

1. Open **Payments & receipts** 1 and click the **Correction requests** tab 2.
2. Find the request by its receipt and reason. Read who asked and why.
3. Click **Approve** 3 on the row. The dialog explains that a reversal entry will be added.
4. Click **Approve & reverse** 1 and type your password if asked. The request shows **Approved** and the invoice gains a **Reversal** row 1, as in the last screenshot.

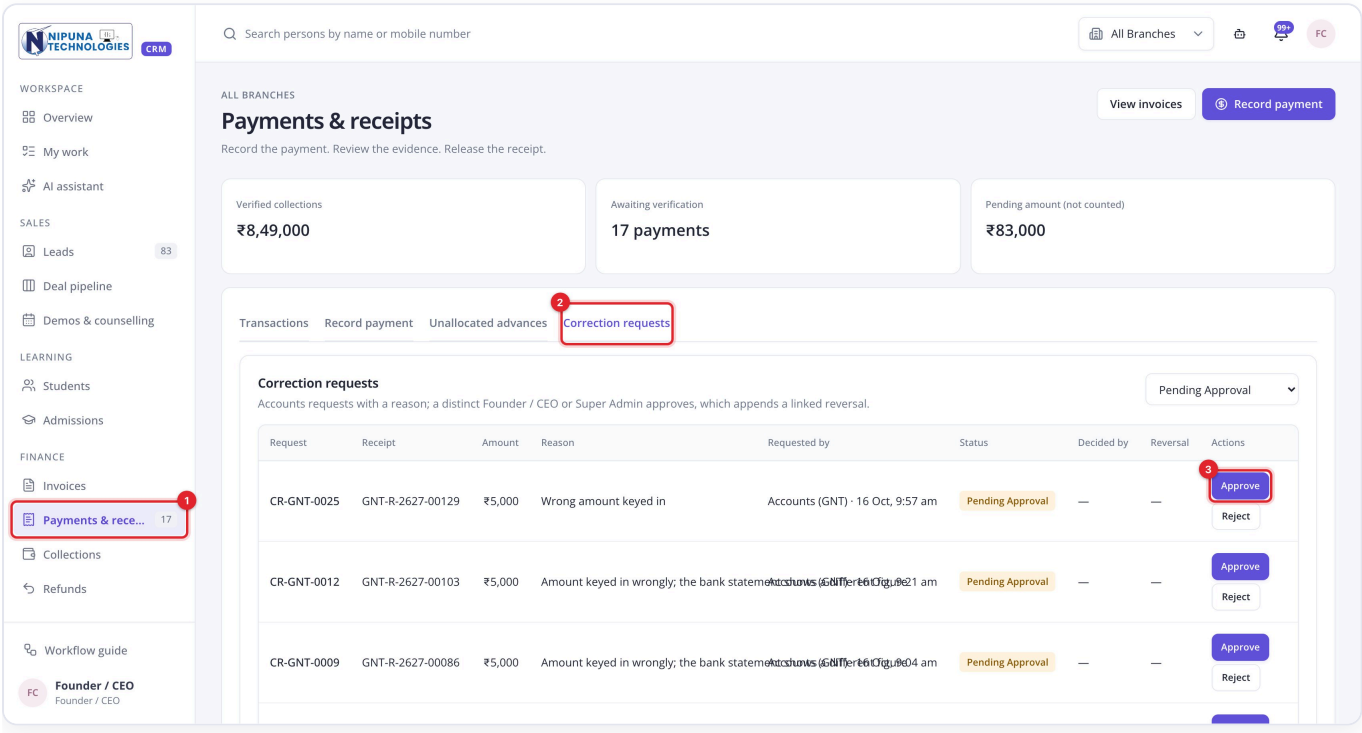

Figure 9 Correction requests waiting for approval

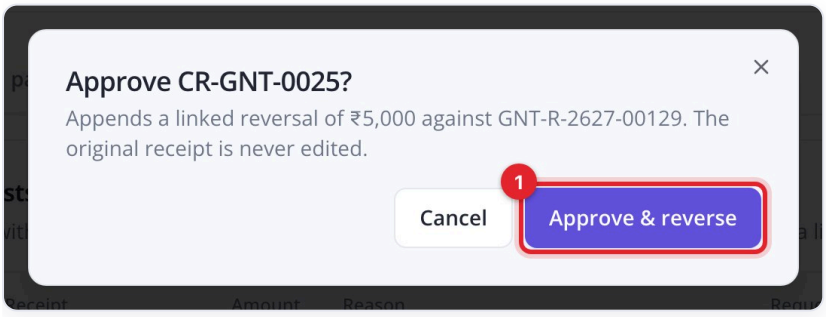

Figure 10 Confirming the approval

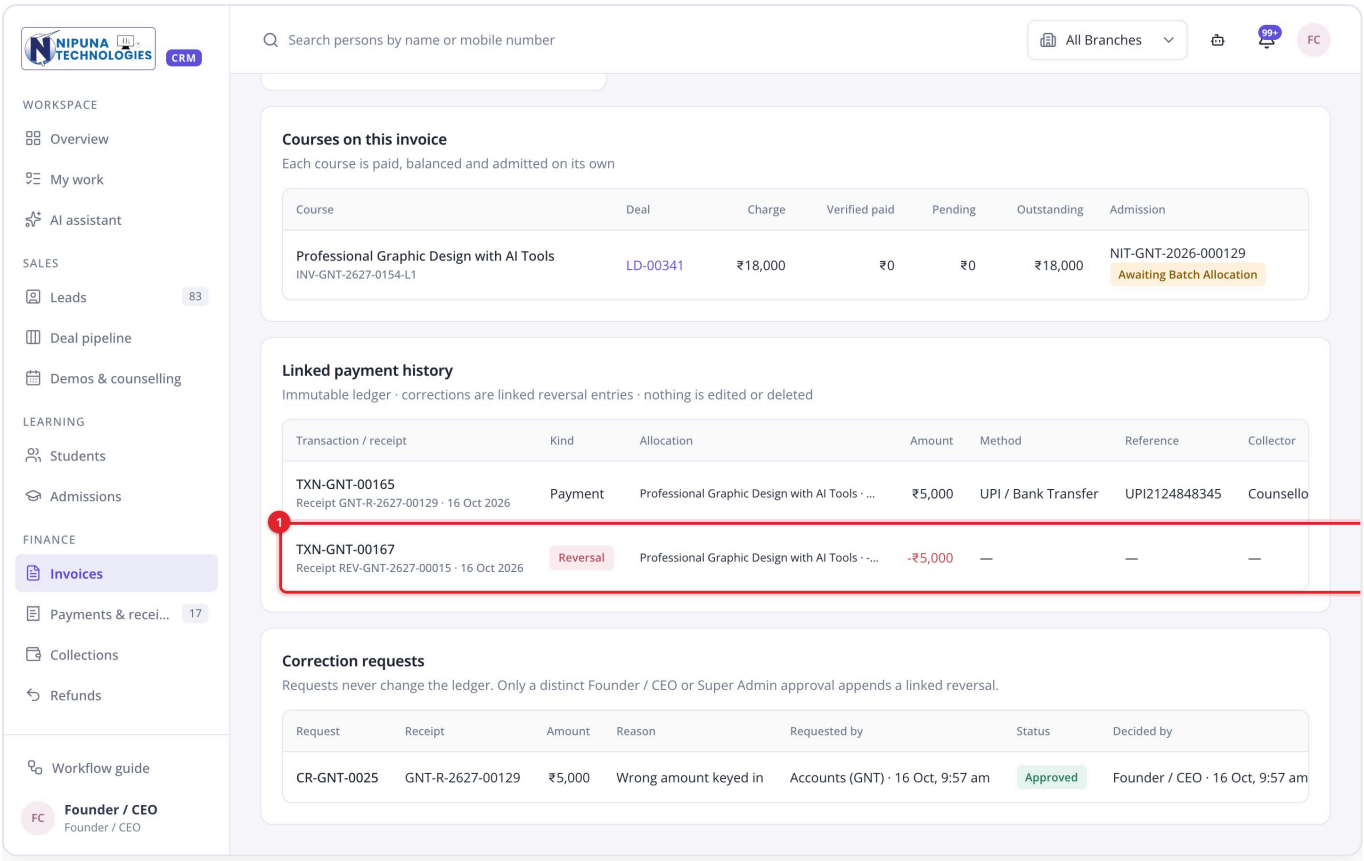

Figure 11 The invoice now shows a linked reversal entry

> **TIP** Collections figures use verified payments minus corrections, so an approved correction changes the dashboard and reports straight away.

2.4 Decide a refund case opened by a Branch Manager

A Branch Manager registers a refund case and writes an assessment. You decide how much is refunded; Accounts then pays it out. A refund can never be more than what was verified as paid.

1. Open **Refunds** 1. The case appears under **Registered** with the manager's assessment.
2. Open the case. Read the **Request reason**, the linked receipts and the assessment notes.
3. Type the **Refund amount (₹)** 2 you approve, up to the verified amount.
4. Click **Record decision** 3 and type your password if asked. The case moves to **Refund Approved** and waits for payout by Accounts.

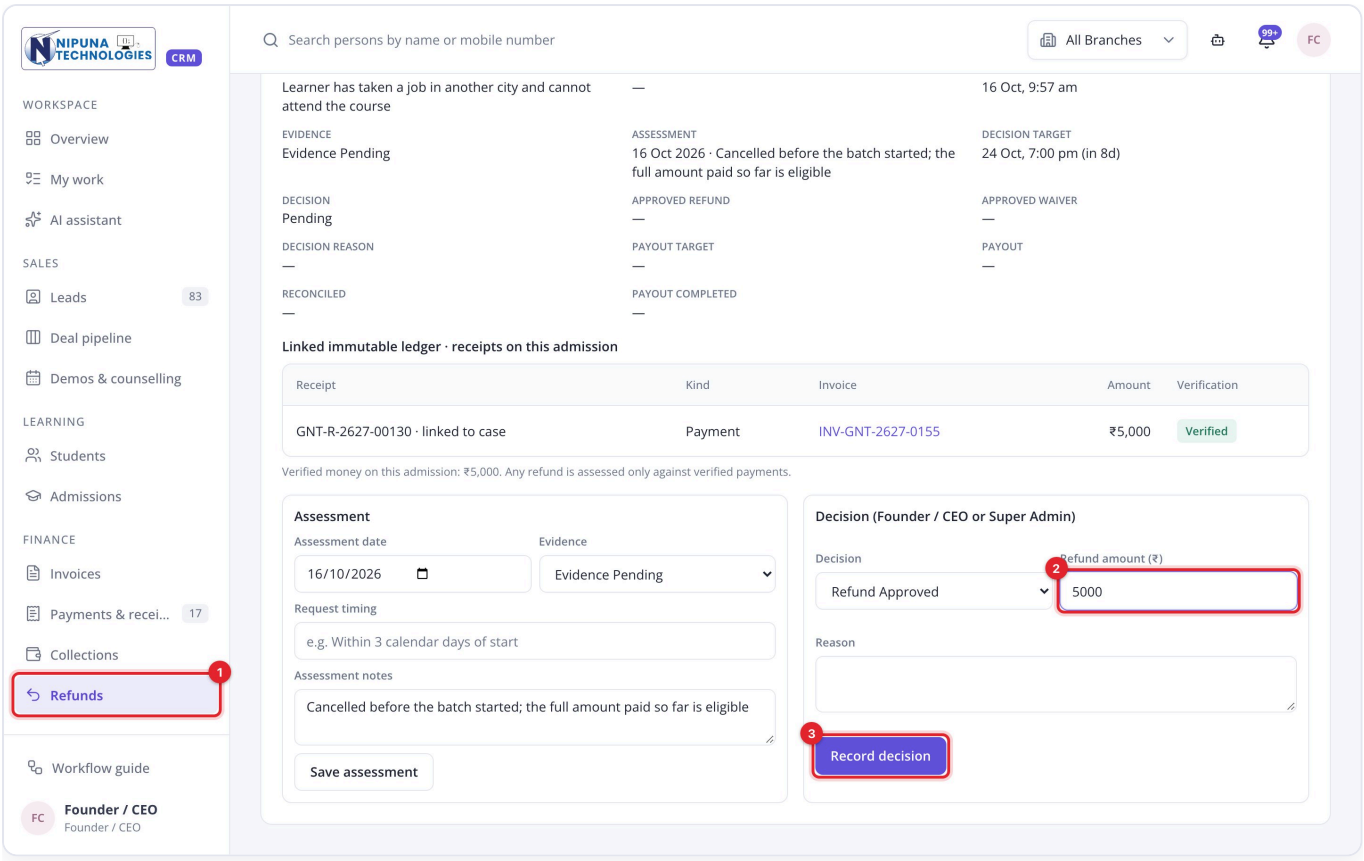

Figure 12 The refund case with the manager's assessment

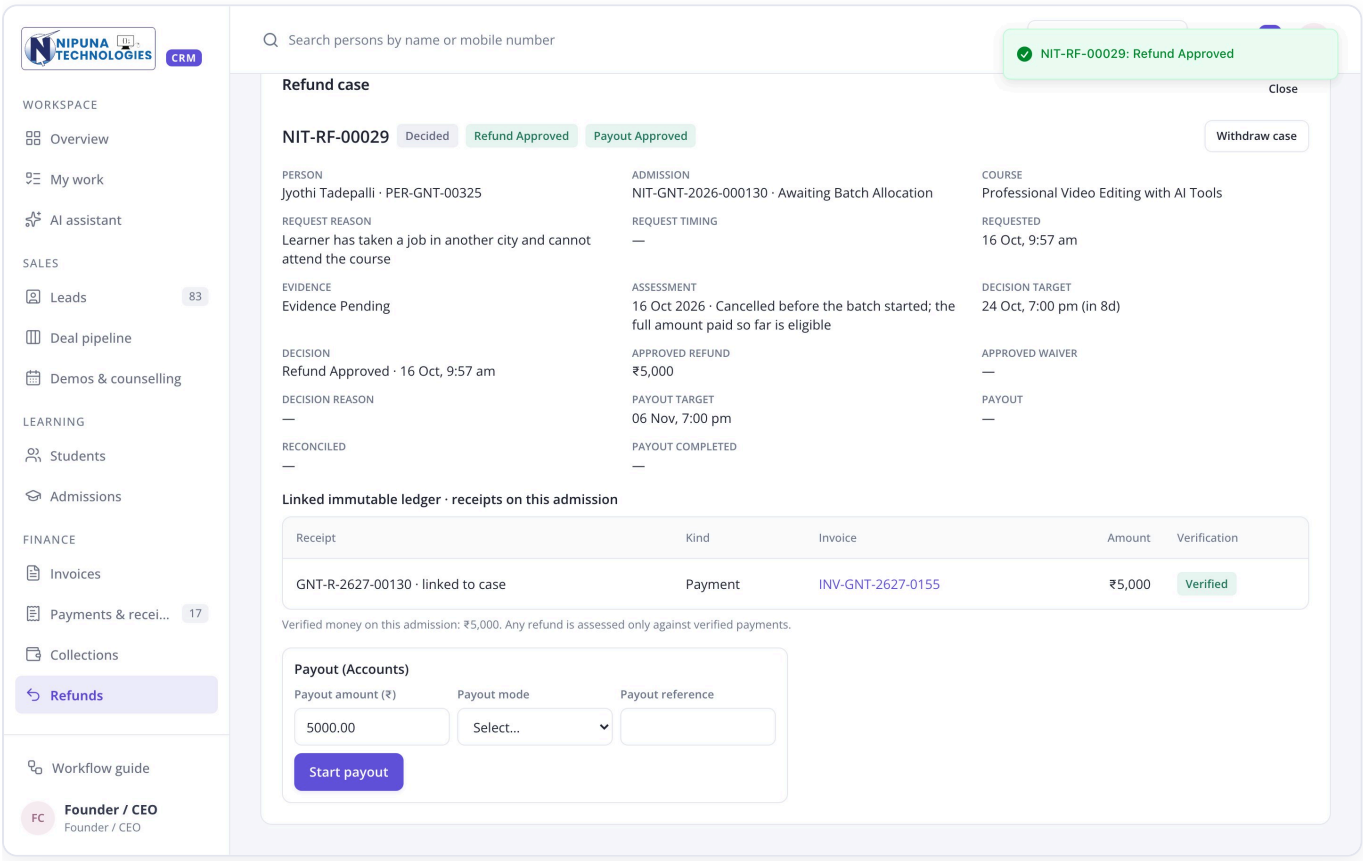

Figure 13 Decision recorded: awaiting payout by Accounts

> **RULE** Decision target: 7 working days from registration. Payout target: 18 working days. Accounts, not you, starts the payout and reconciles it.

2.5 Set and approve targets in Target Master

Targets are monthly goals for verified collections and paid admissions, per branch and for the company. A new version is drafted first and only counts once approved. Approving replaces the overlapping version and keeps the history.

1. Open **Target Master** (1) under **More**. The top panel shows achievement against the approved target for the current month, and the list below holds every version.
2. Click **New target version** (2). Never edit an approved version: always draft a new one.
3. Enter the period, then the company and branch targets (3). Leave a measure blank to keep it **Not Set**.
4. Click **Save draft** (4). The version appears as **Draft**.
5. Click **Approve** (5) on its row and confirm. It turns **Approved** and replaces any overlapping version.

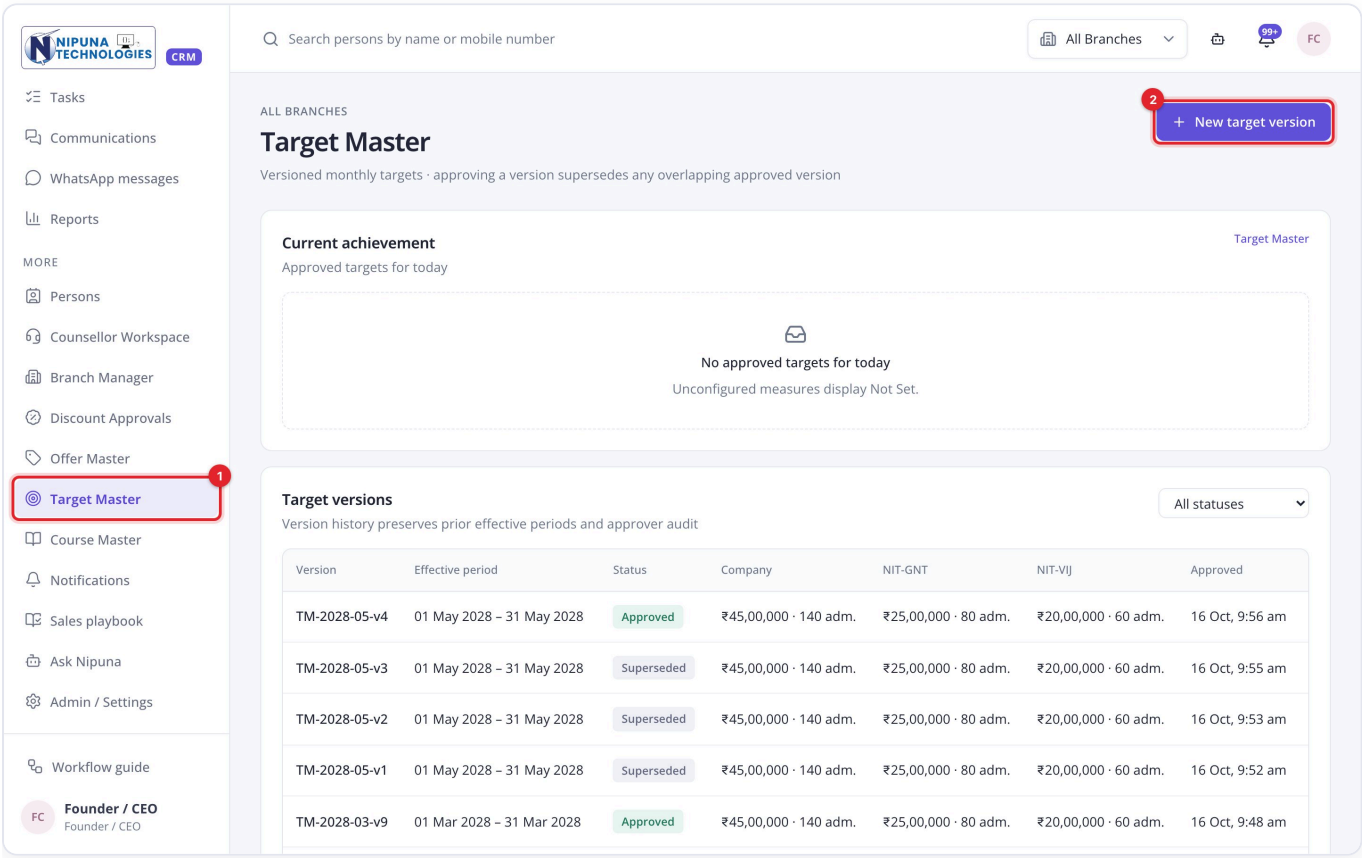

Figure 14 Target Master with current achievement

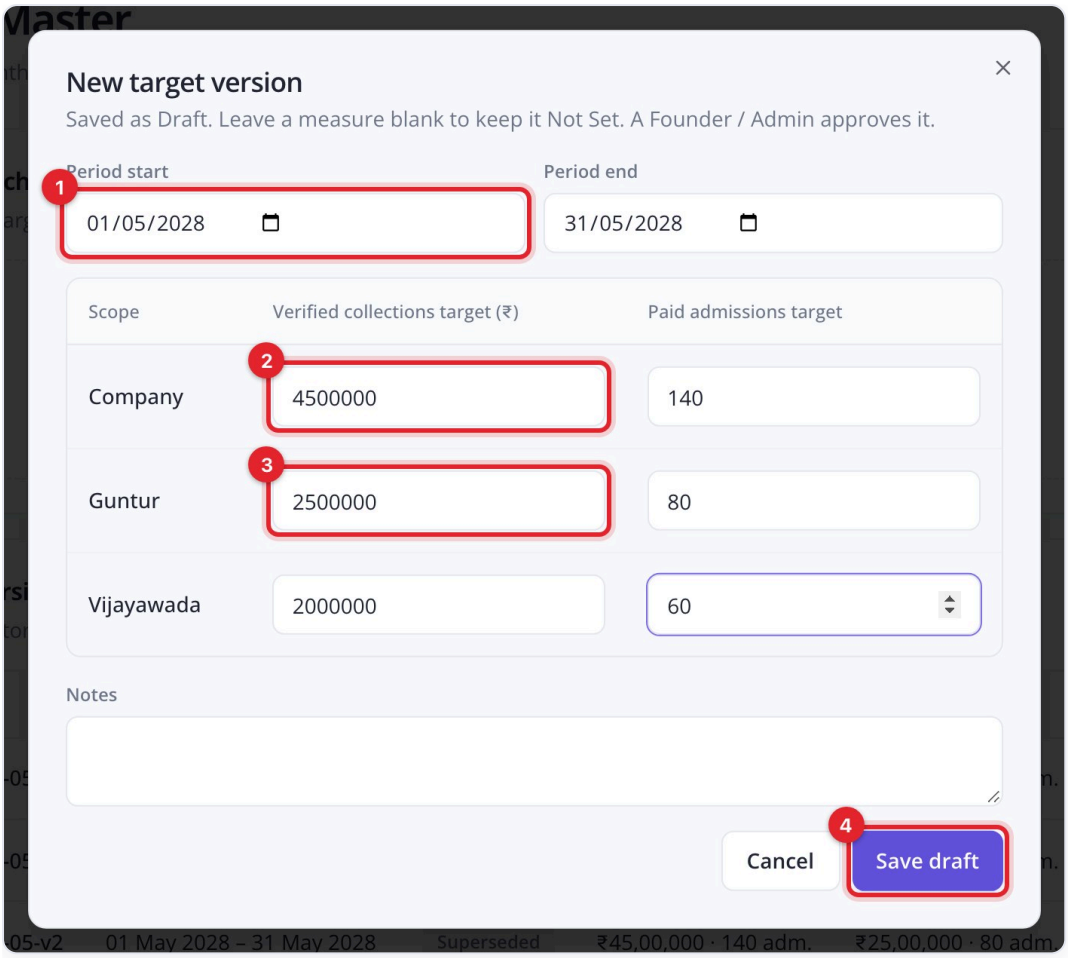

Figure 15 Drafting a new target version for May 2028

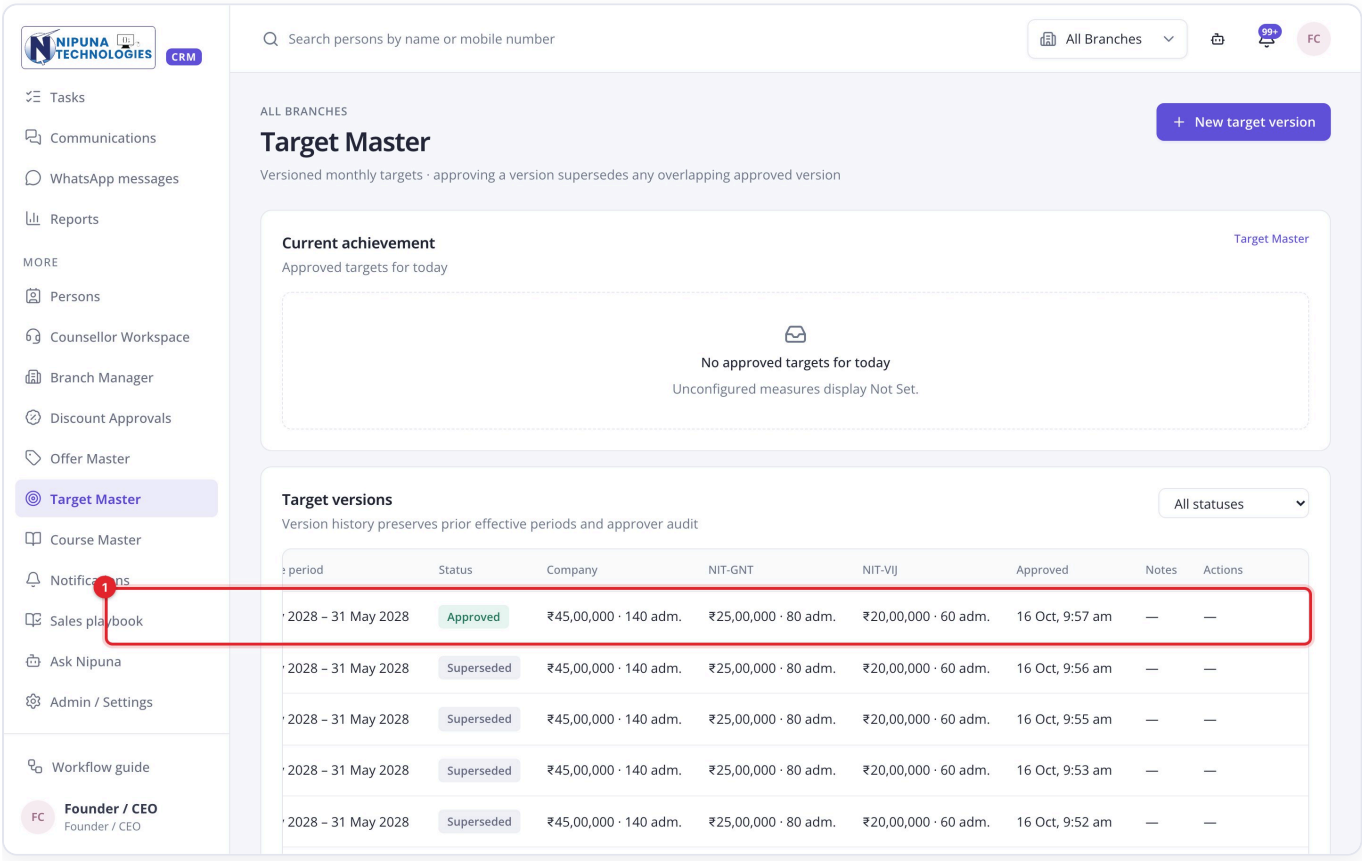

Figure 16 The version is now Approved

> **TIP** Every approved version stays in the list, so you can always see which target applied in which month.

2.6 Create and activate an offer in Offer Master

An offer is a discount or a complimentary course that counsellors can attach to a fee version without asking for approval. An active offer cannot be edited: to change it, make a new version.

1. Open **Offer Master** 1 and click **New offer** 2.
2. Enter an **Offer code** 1, **Offer name**, **Discount amount (₹)** 2 and the **Valid from** 3 and **Valid to** dates. Click **Create offer** 4.
3. While it is a draft, use **Scope** to limit the offer to some branches or courses, and **Complimentary courses** to add a free course with a minimum final fee.
4. Click **Activate** and confirm with your password. Activating a version deactivates any other active version of the same code.
5. An active offer shows **New version** 1 and **Deactivate** 2 instead of **Edit**. When the offer should stop, click **Deactivate** and confirm.

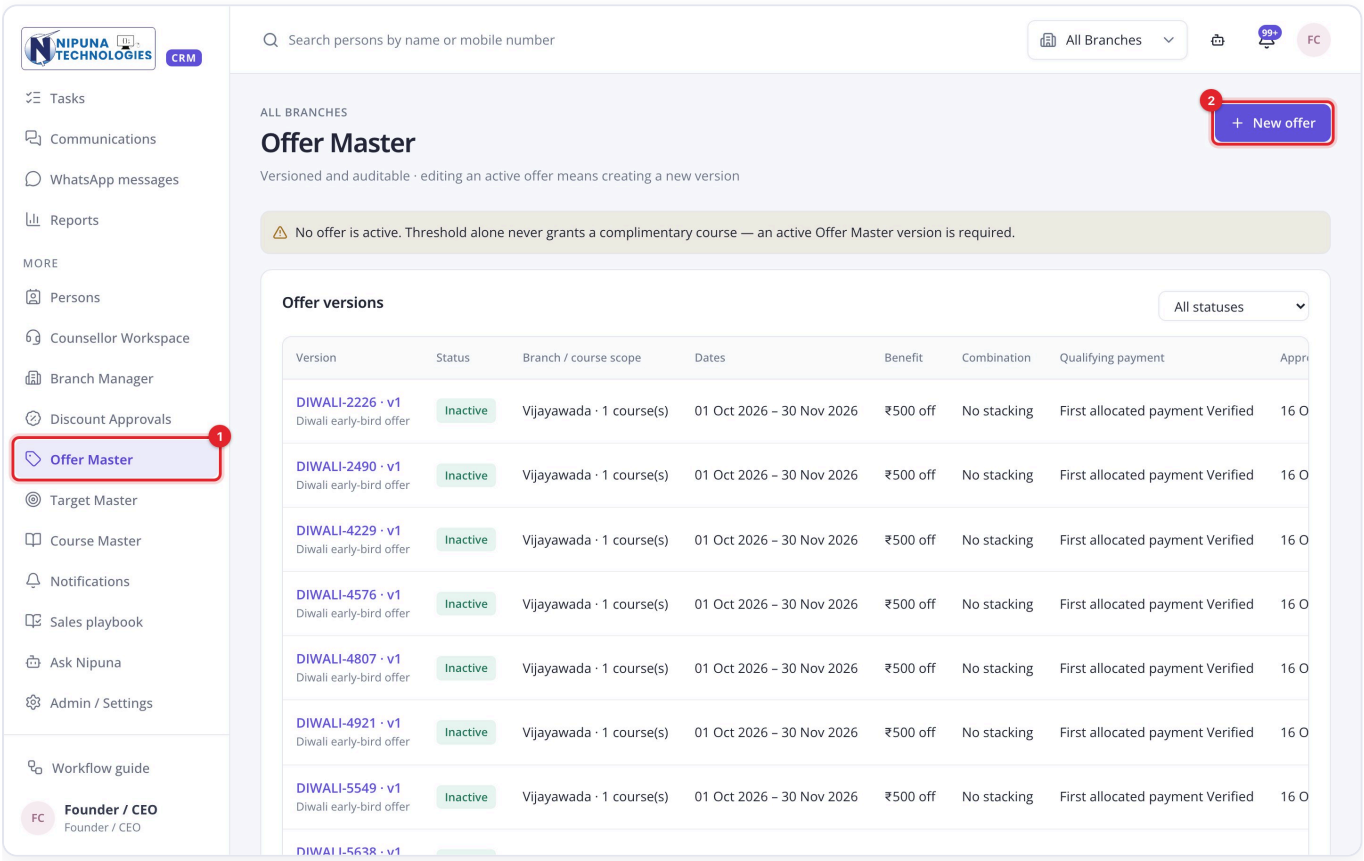

Figure 17 Offer Master

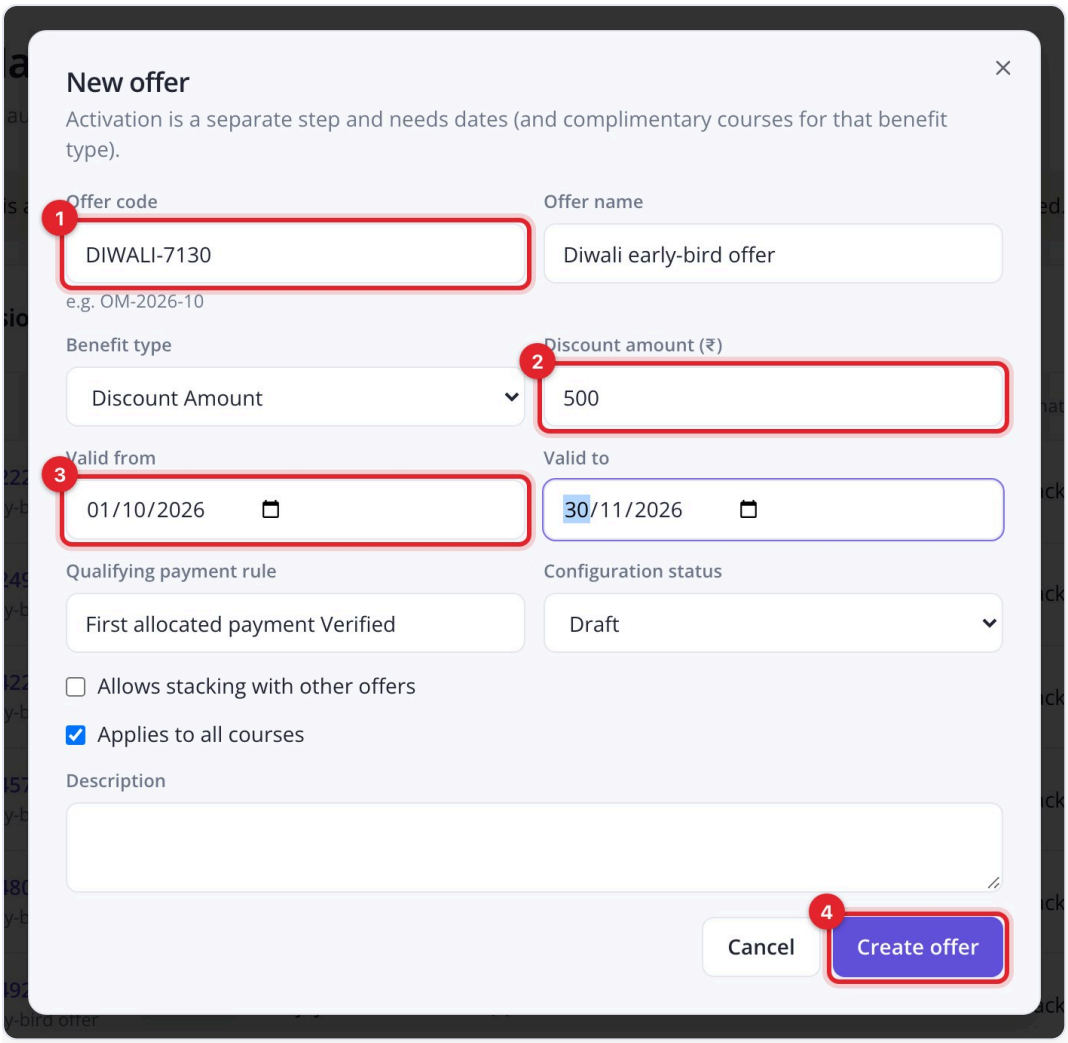

Figure 18 The New offer dialog

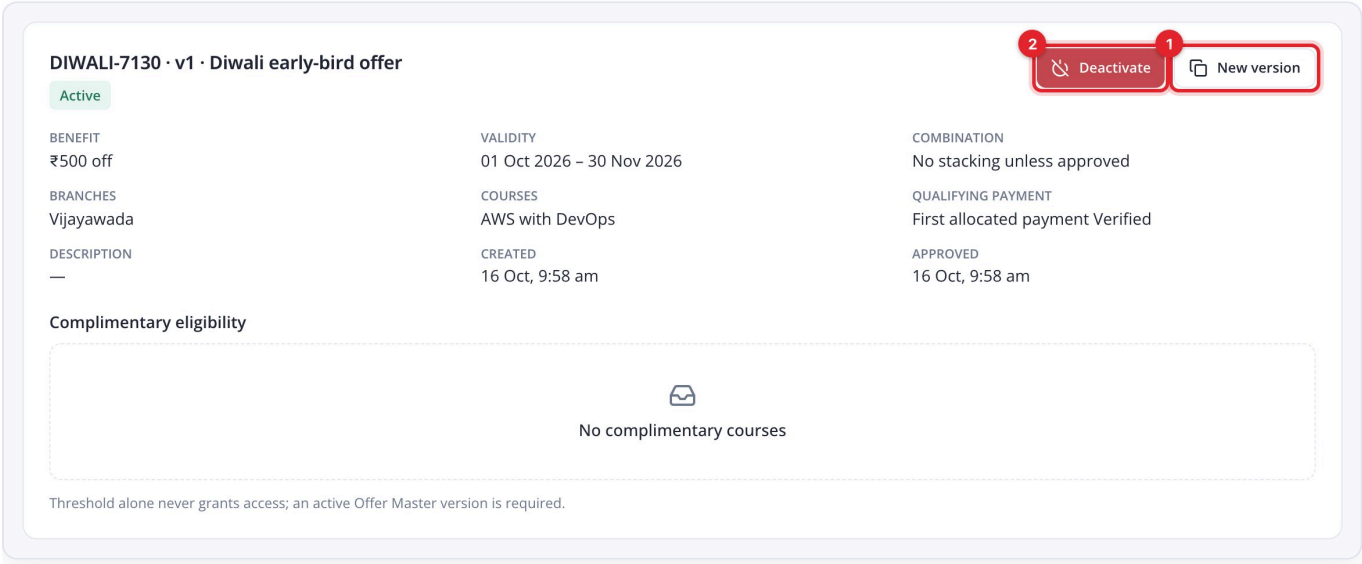

Figure 19 The offer is active: it can no longer be edited

> **RULE** The offer here is limited to one course at the Vijayawada branch and has been deactivated again after the screenshots. Deactivated offers stay in the list for history.

2.7 Create a user, grant access and reset a password

Admin / Settings is where you decide who can use the CRM and what they can do. Every account has a role and a branch scope. Passwords are shown only once, when you create or reset an account.

1. Open **Admin / Settings** 1. The **Users & Access** tab lists every account. Click **New user** 2.
2. Fill in **Full name** 1, **Email**, **Mobile** (2; required, one active account per number, used for the forgot-password code) and **Role** 3. Branch roles also need a **Branch**; company-wide roles get every branch.
3. Click **Generate** for a random password, or type one, then click **Create user** 4.
4. The one-time credentials appear. Click **Copy credentials** 1 or **Download CSV** 2 and give them to the person. They must change the password at first sign-in. Click **Done**.
5. Open the user and click **Grant access**. Pick the **Role** 1 and **Branch scope** 2, optionally set an expiry date 3 and click **Grant** 4. **Revoke** removes a scope again.
6. On the user's page, **Grant access** 1 adds scopes and **Reset password** 2 issues a new temporary password; every session of that user is signed out.

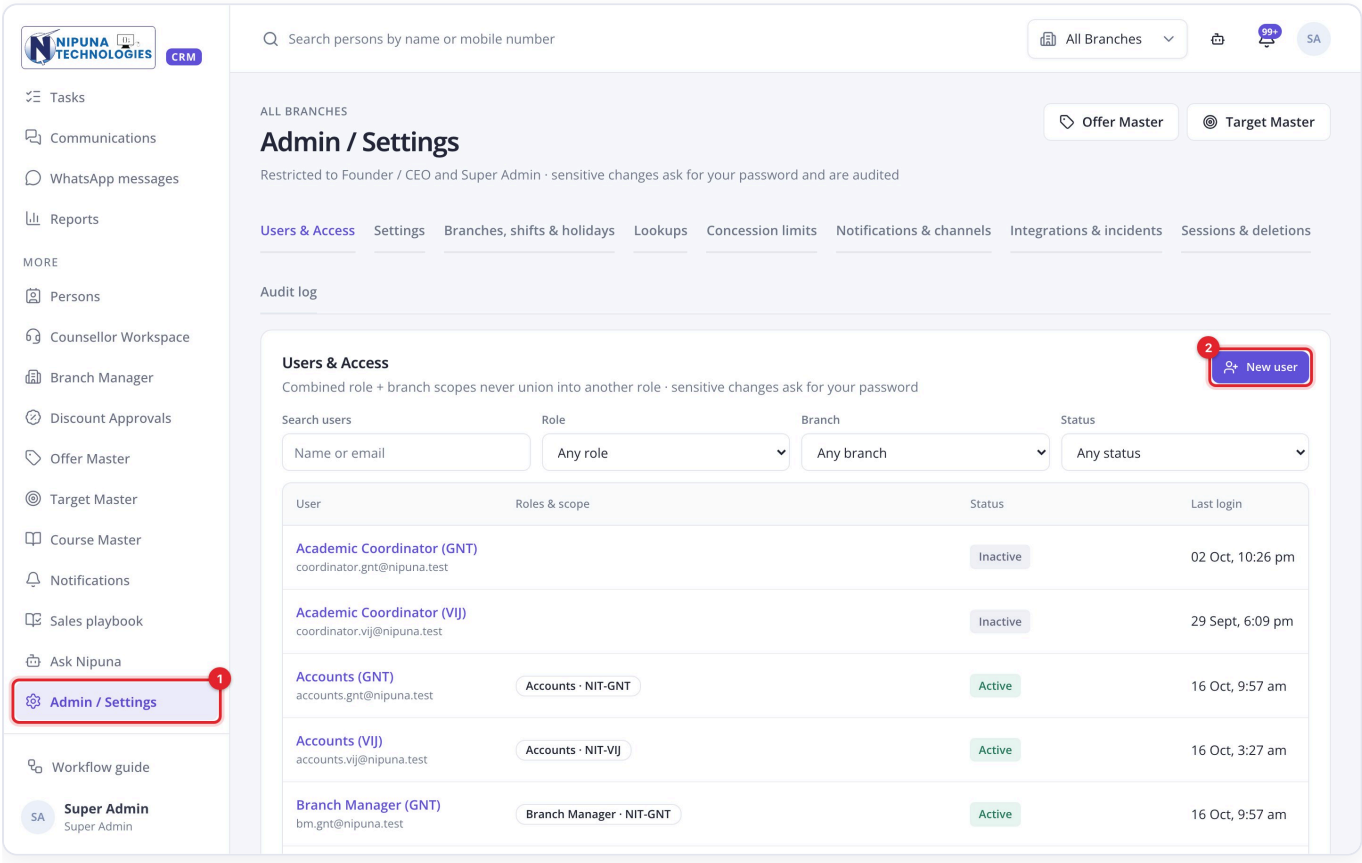

Figure 20 Admin / Settings: Users & Access

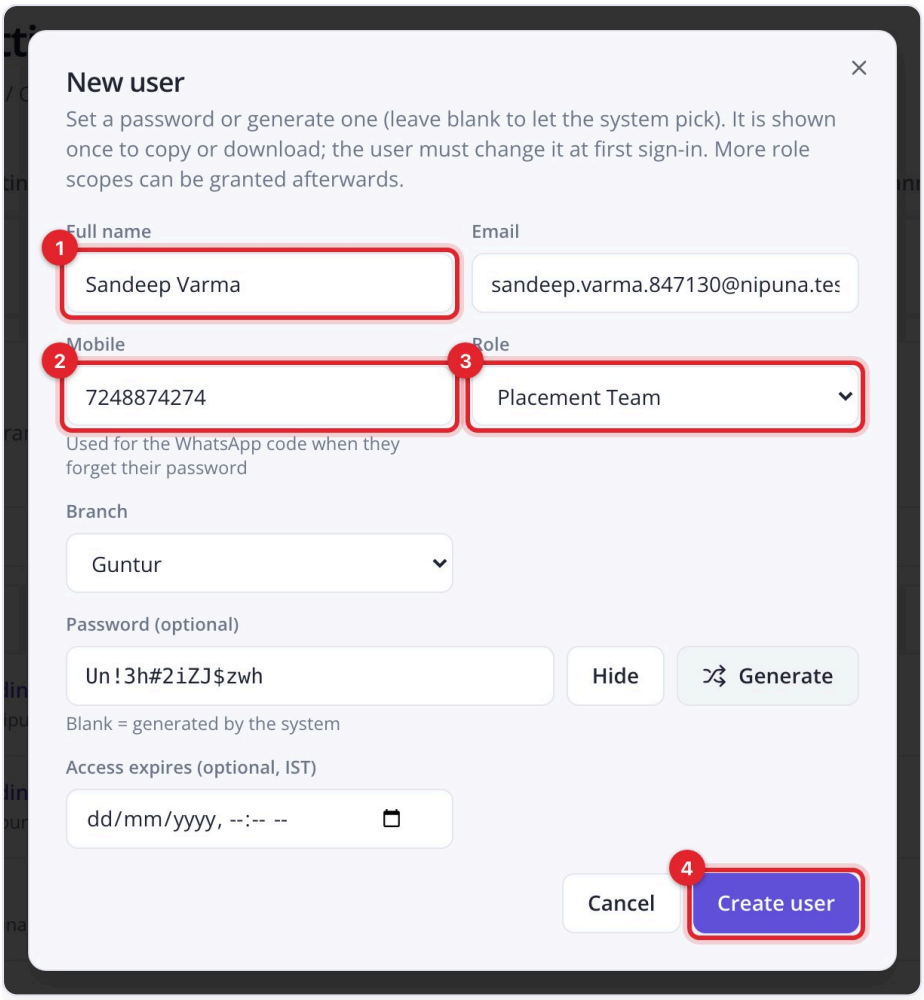

Figure 21 The New user dialog

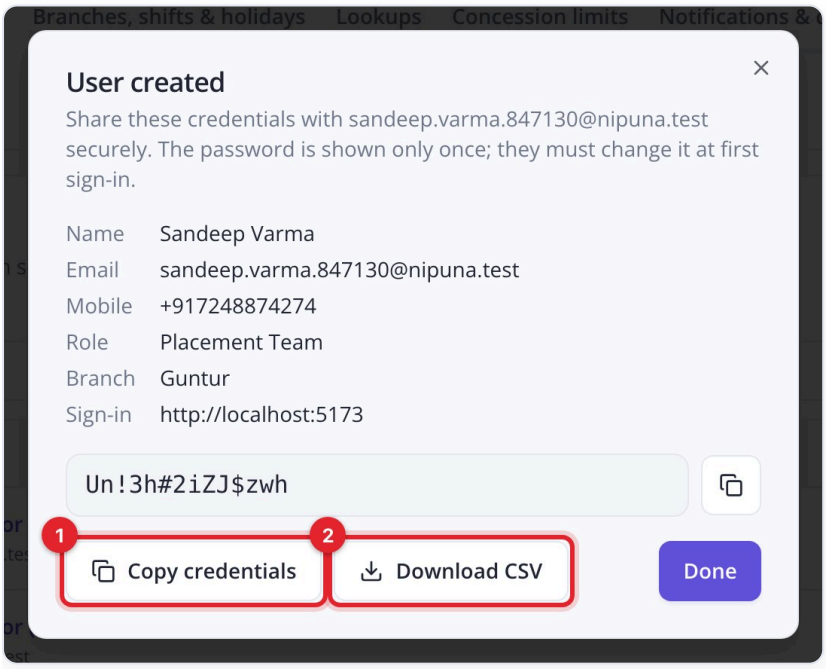

Figure 22 The credentials are shown once

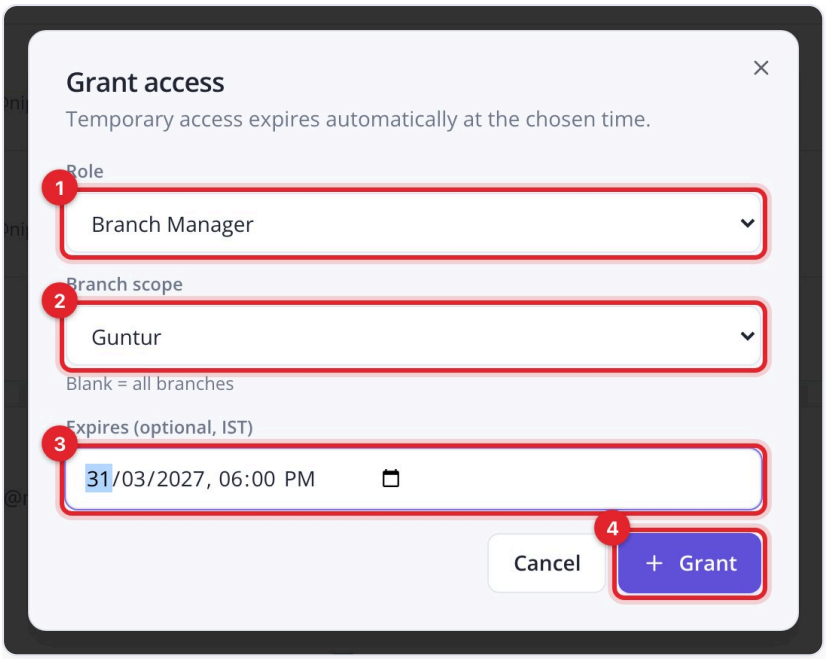

Figure 23 Granting a second role with an expiry date

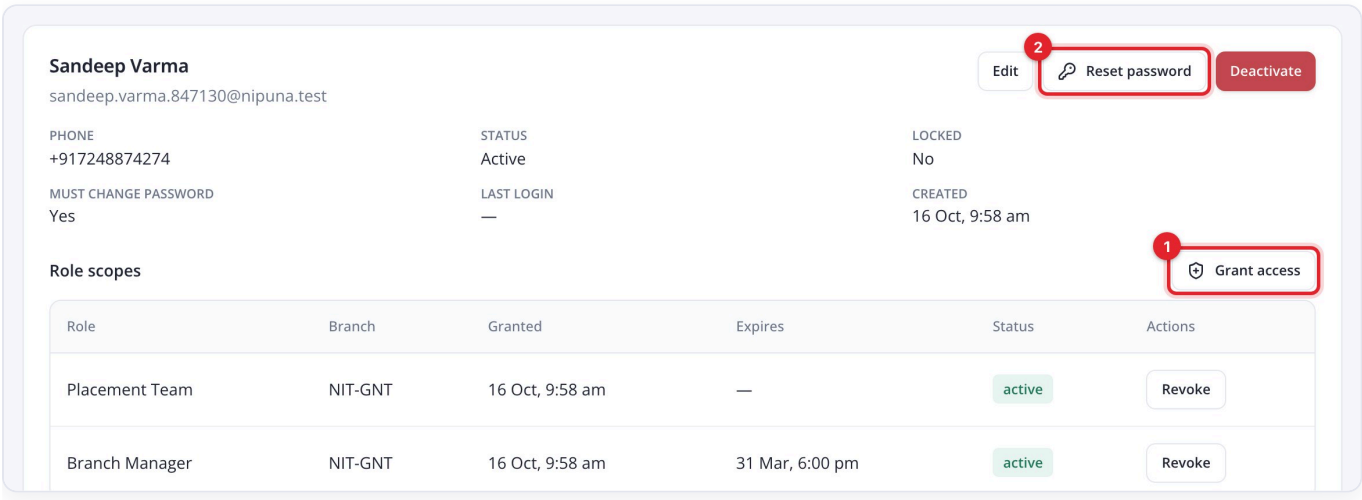

Figure 24 The user's role scopes

RULE You cannot deactivate yourself or change your own access, and only a Founder / CEO can grant Founder / CEO access. Revoke a role scope rather than deleting anything: access history stays in the audit log.

2.8 Settings, concession limits, notifications and branch hours (view only)

These tabs control how the whole CRM behaves. Change them rarely and with care: other roles' deadlines, limits and alerts depend on the current values. This tour only looks; it changes nothing. Saving a setting asks for your password and is recorded in the audit log.

1. Open **Admin / Settings** and click the **Settings** tab 1. Each row is one setting with its own **Save** button.
2. Click **Concession limits** 2: the extra concession each role may approve on its own, as the lower of a percentage and a rupee amount. Both blank means unlimited.
3. Click **Notifications & channels** 3: when each alert warns and escalates, and the WhatsApp, email and phone channels of each branch.
4. Click **Branches, shifts & holidays** 4: staffed hours and holidays. Every SLA, escalation and working day is counted in these hours only.

Area	What it controls
Settings	Sign-in security (idle timeout 30 min, 12 h maximum session, lock after 5 failed attempts, 10-character passwords), the 15-minute fresh-password window, follow-up and first-contact deadlines, refund targets, report cut-off time and more.
Concession limits	A Branch Manager may approve up to the lower of 5% or ₹1,000. Founder / CEO and Super Admin are unlimited. Below 70% of the standard fee always needs you plus a second approver.
Notifications & channels	Payment verification warns Accounts at 25 minutes and escalates to the Branch Manager at 30. Special closing warns the Branch Manager at 4 minutes and escalates to you at 5.
Branches, shifts & holidays	Currently Monday to Saturday, 9 am to 7 pm at both branches. Holidays are excluded from staffed time.
Lookups	Dropdown values (lead sources, lost reasons, payment modes). You can add, rename and deactivate; values are never deleted.

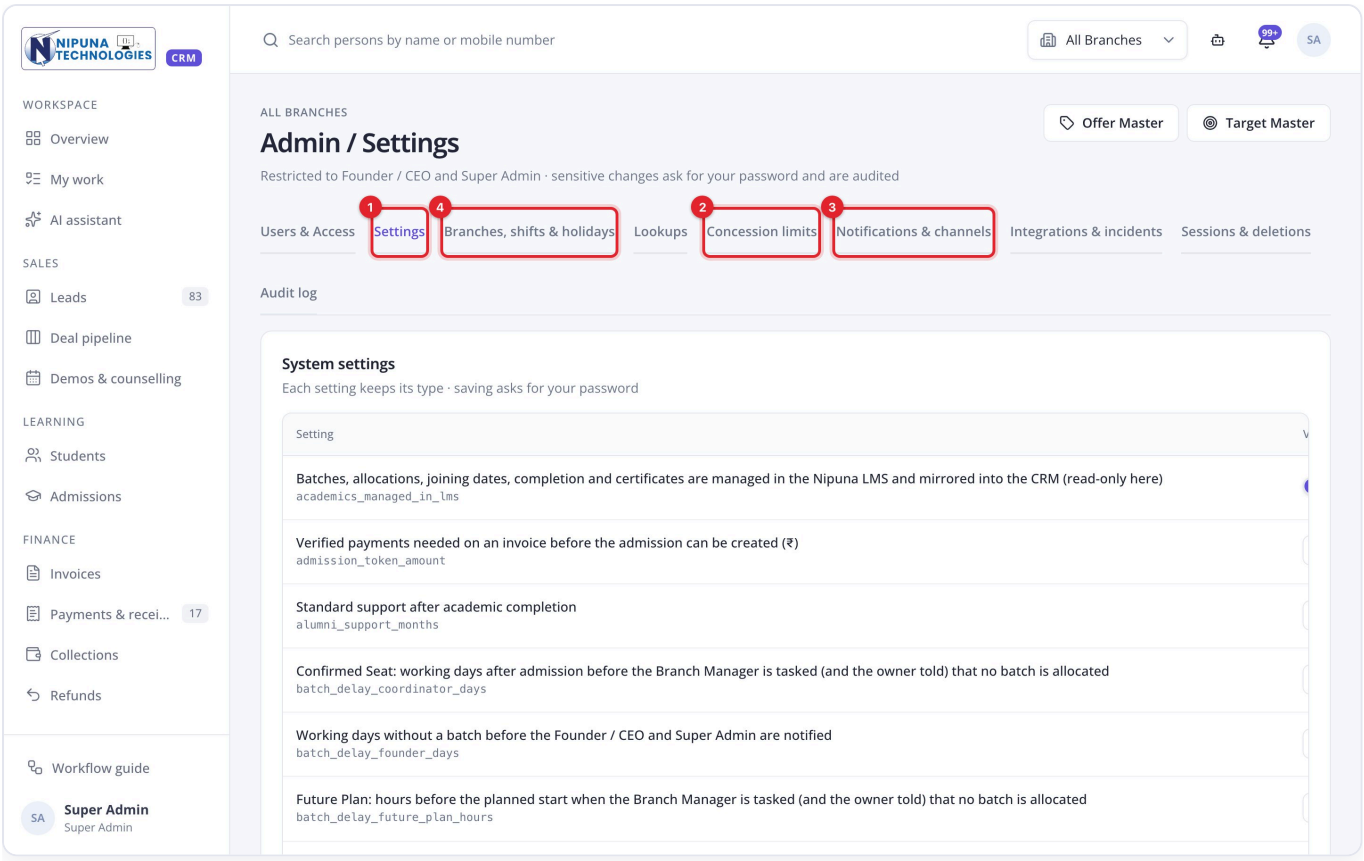

Figure 25 The Settings tab

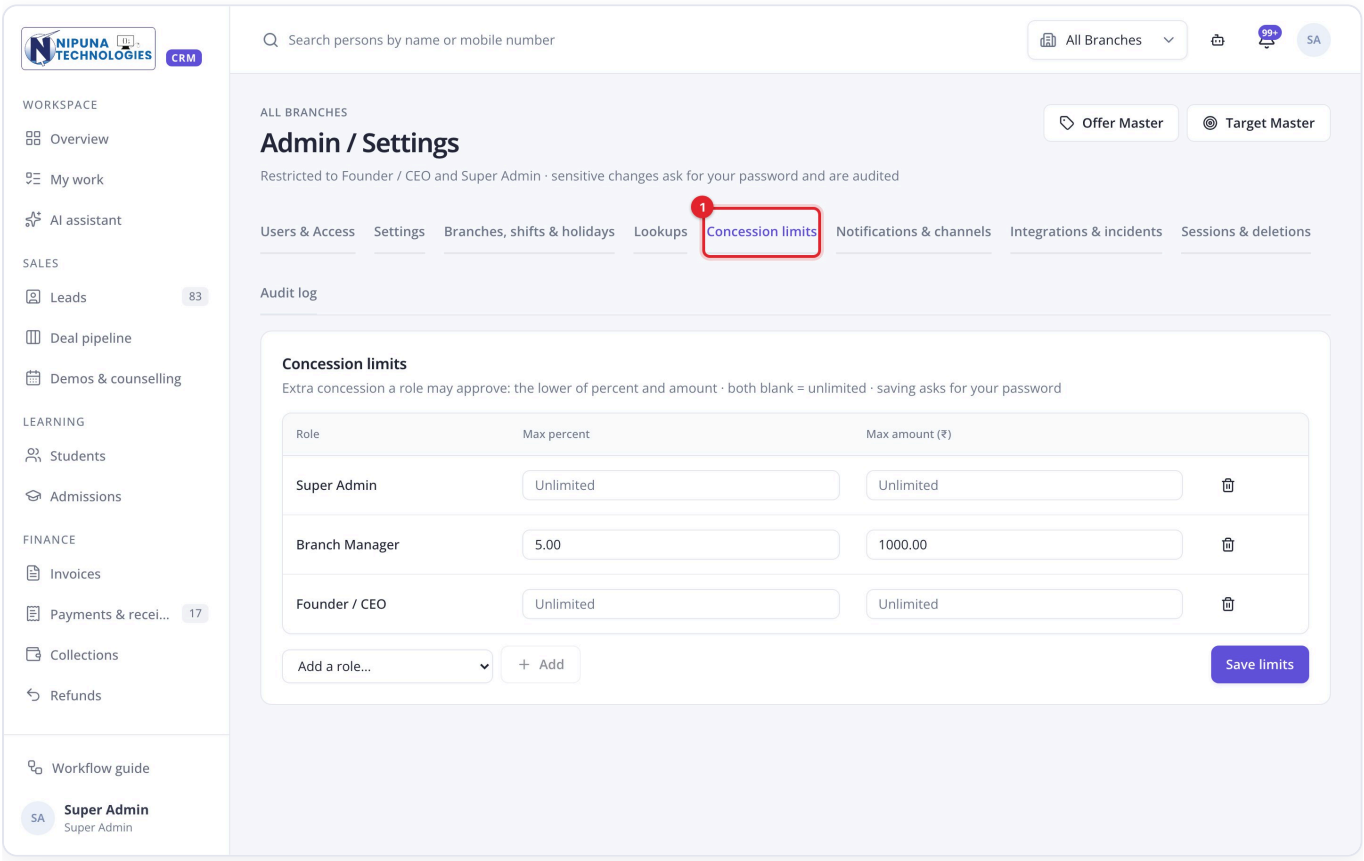

Figure 26 Concession limits by role

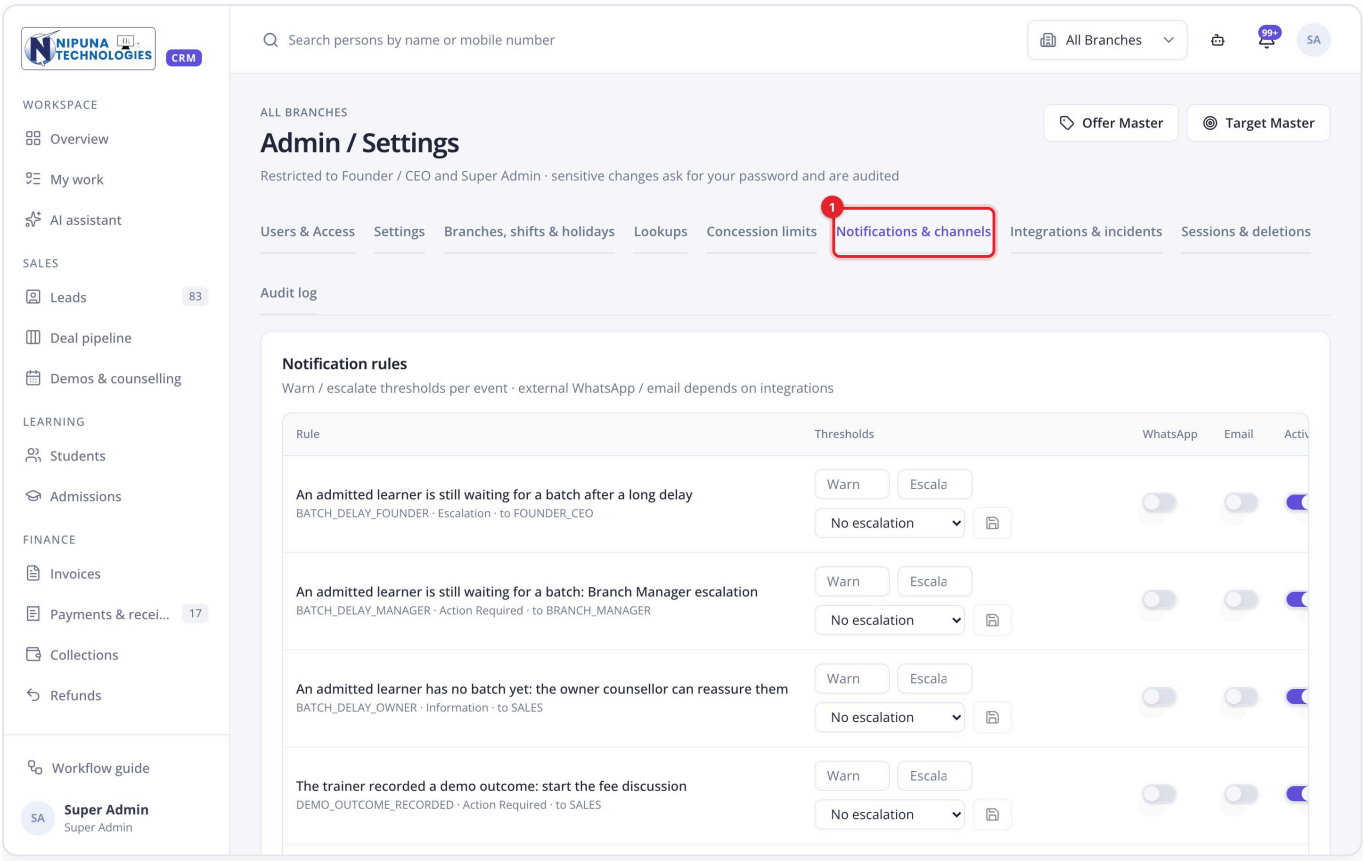

Figure 27 Notification and escalation rules

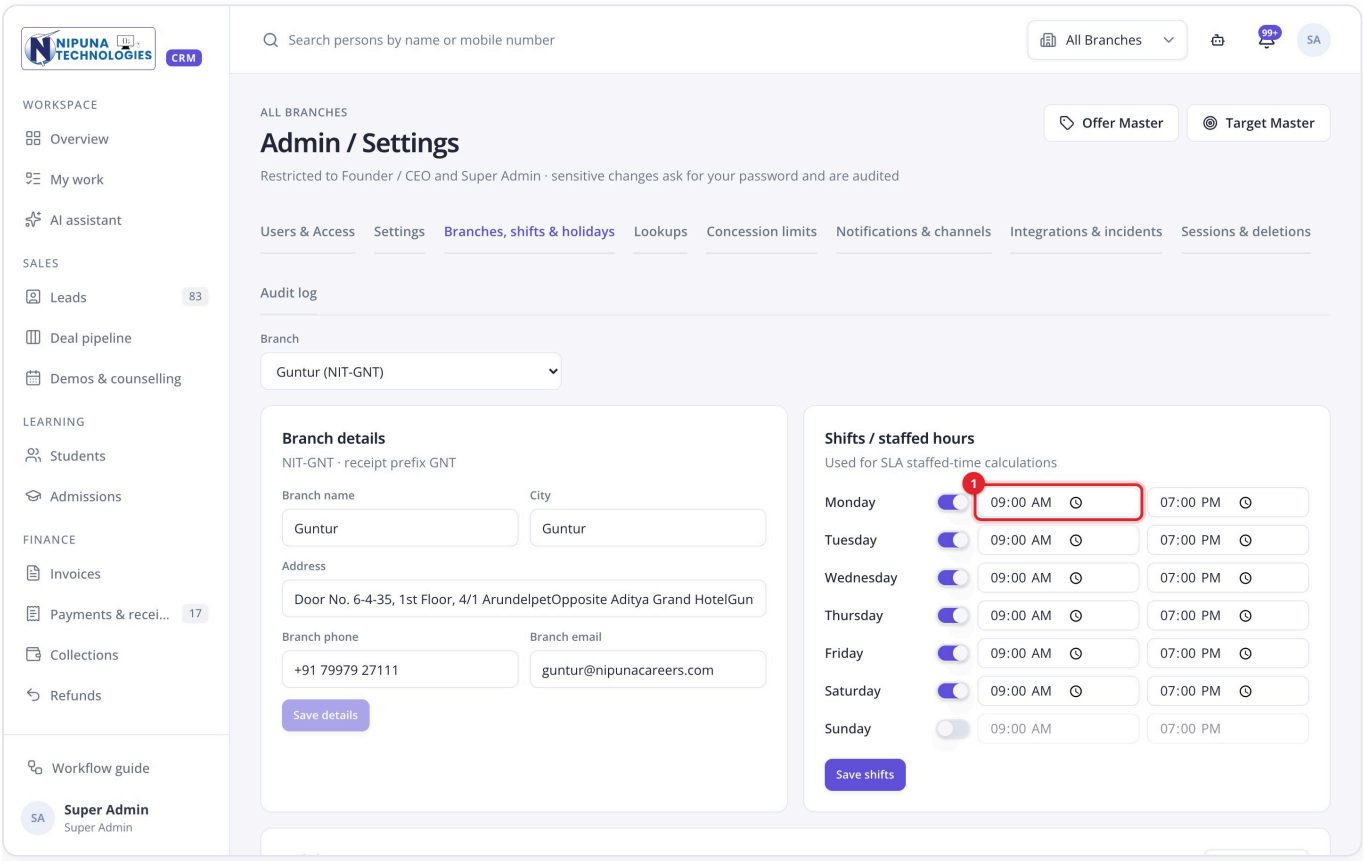

Figure 28 Branch hours and holidays

> **WATCH OUT** Look, do not change: other roles' screens, deadlines and approval limits follow these values immediately.

2.9 Force sign-out, deletion requests and the audit log

Use these tabs to see who is signed in, to end a session that should not continue, to approve sensitive deletions and to find out who did what.

1. Open **Sessions & deletions** 1. **Active sessions** lists who is signed in, from where and until when. Your own row says **This session**.
2. To end someone else's session (for example after a lost laptop), click **Sign out** 2 on their row and confirm. They are signed out immediately.
3. Further down, **Deletion requests** are listed. One admin requests a deletion with a **Record ID** and **Deletion reason**; a **different** admin approves it and then executes it.
4. Open **Audit log** 3. Every sensitive event is recorded: approvals, password resets, setting changes. Type an **Action** such as `DELETION_APPROVED` 4 and click **Filter** to narrow it down.

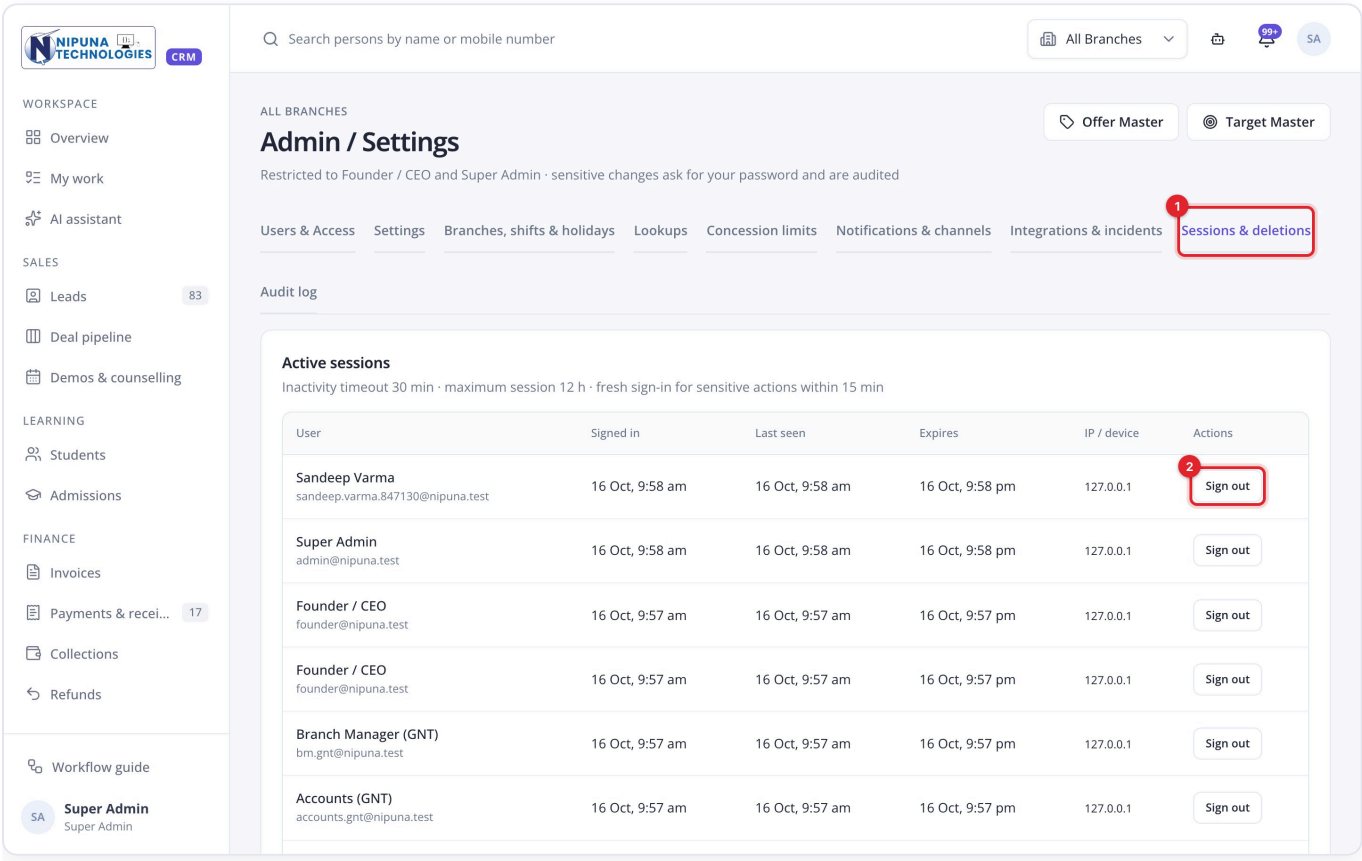

Figure 29 Active sessions

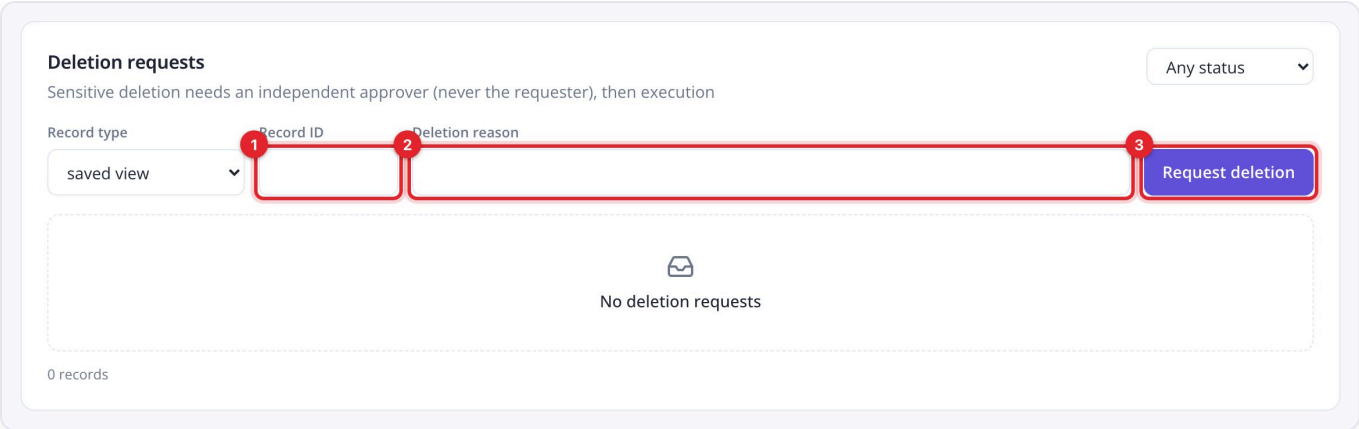

Figure 30 Deletion requests: one admin asks, a different admin approves

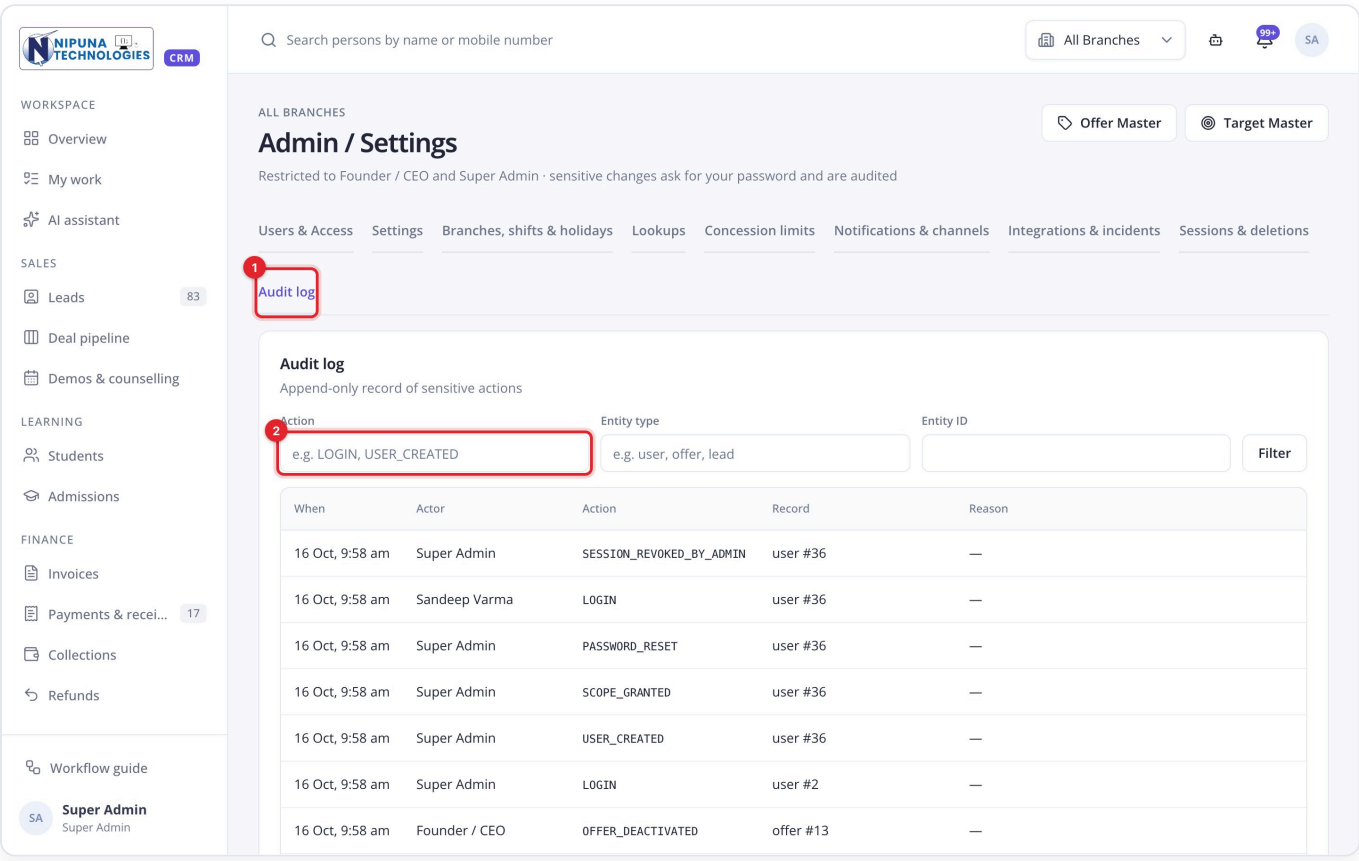

Figure 31 The audit log

> **TIP** When someone leaves, use **Deactivate** on their user: they are signed out at once and their records stay.

2.10 Reports and scheduled reports

Reports answer how the business is doing: collections, the lead funnel, performance by course, source and staff, and response-time compliance. A scheduled report sends the same figures by email on a fixed day.

1. Open **Reports** 1. Pick the period with the buttons 2 and narrow with the filters.

2. Use **Performance by** to switch between course, source and staff. Click **Export management CSV** 3 to download the figures.

3. Scroll to **Scheduled reports** and click **New schedule** 1. Choose **Frequency**, **Schedule day** and **Recipients**, then click **Save schedule**.

4. Each schedule has a switch. Turn it off to pause delivery without deleting it.

> **TIP** Reports count verified payments minus corrections, by payment date and collecting branch. Pending payments are never counted.
